

## Update Bulletin

### XP for ISS45

October 11, 2003

StoreNext is pleased to announce the standardization of Microsoft Windows XP for ISS45 PoS services software.

Recent ISS45 versions for both V7 (7.0.8.3-050) and V8 (8.4.2\_63 and 8.0.6.0-050) have been validated and released over XP on the Fujitsu TeamPoS 2000 terminal. As of this week, all shipments to Dealers are being converted to ship the TeamPoS with Windows XP instead of Windows 2000.

XP is therefore included on all StoreNext TeamPoS 2000 packages and ISS45 Express systems.

Please note there are no changes to the MFS software for either ISS45 V8 or V7. Windows2000 Server (V8) and Pro (V7) are still the approved platforms.

Street prices for Windows XP are typically higher than those of Windows 2000. However, there will be no price increase for these StoreNext packages. New TeamPoS 2000 and ISS45 Express bulletins reflecting the new configurations will be forthcoming.

To Your Success,

***Tony***
