**Lindo's Overhauls Store Systems  
with StoreNext POS, Electronic Shelf Labeling**

**Bermuda independent speeds up delivery of price changes to customers**

**PLANO, Tex. – Dec. 14, 2005** – Lindo's Market, a 50-year-old, Bermuda-based independent grocer, has tapped StoreNext Retail Technologies LLC to upgrade their IT systems at the two-store operation.

The implementation includes StoreNext's ISS45 point-of-sale (POS) software and Fujitsu TeamPoS 2000 POS hardware. They've also rolled out StoreNext's Pricer<sup>®</sup> Electronic Shelf Labeling system for pricing management and accuracy, as well as Retailix Store and Retailix HQ back-office applications. Lindo's also will use the Retailix PocketOffice mobile store management application running on Fujitsu iPAD handhelds.

"StoreNext's Pricer solution offers us a storewide ESL system that is easy to use, makes price changes in seconds and ensures instant price accuracy throughout our stores," said Zach Moniz, Lindo's IT manager and the founder's grandson. "We stock an enormous variety of products for our size and StoreNext's cutting-edge technology makes things easy for our staff and customers. We're particularly impressed with the speed and accuracy of the labels."

"StoreNext helps retailers like Lindo's enhance and improve their customers' shopping experience with innovative solutions," said Ray Carlin, president and chief executive officer at Plano, Texas-based StoreNext. "Lindo's deployment of the Pricer ESL system demonstrates their commitment to technology leadership and will give store patrons additional assurance that product labels are current and accurate."

Data-Tech Limited, StoreNext's Bermuda dealer, worked in tandem with StoreNext on the technology rollout. Data-Tech has been associated with StoreNext for more than ten years. The installation at the Warwick store was completed within a week in August 2005. The implementation at the Devonshire store is slated for January 2006.

Lindo's was founded as a small butcher shop by Harry and Marion Lindo and has since successfully expanded to grocery stores at the two locations. Lindo's stocks a variety of products from the United States, United Kingdom, Portugal, Europe, Canada and the Caribbean. They also have a well-stocked produce and meat section.

Pricer is the most feature-rich ESL solution on the market. It provides a unique solution that fully adapts to any retail need with features including fast and reliable high-speed infrared communication technology and ruggedized, theft-proof labels that attach easily to shelf edges. StoreNext's Pricer system operates on the same PC controller used for all other store applications. The seamless tie-in with point-of-sale (POS) systems reduces price discrepancies in the store while making fast display changes possible.

### **About StoreNext**

StoreNext Retail Technologies LLC is the No. 1 supplier of retail technology to independent grocers and regional chains. Based in Plano, Texas, StoreNext is a joint venture of Retailix Ltd. (NASDAQ: RTLX) and Fujitsu Transaction Solutions Inc. and markets Fujitsu POS hardware, Retailix's ISS45 POS software and Internet Connected Services for managing stores via Web-enabled applications. StoreNext is the only major retail IT company focused exclusively on meeting the needs of this wholesaler-served market with packaged solutions that were previously available, affordable or practical only for large chains.
