

Retalix Store™ Pricing

Store Pricing provides intuitive store-level price management capabilities that help you maintain prices and maximize profits. The solution offers complete pricing capabilities that allow stores to manage item and vendor information and execute pricing strategies. Now you can increase price accuracy, protect margins and make profitable merchandising decisions. Solution capabilities include:

- Item, vendor and price management
- Item movement reporting
- Point-of-Sale (POS) system interface
- Wireless shelf price audit
- Batching options

Streamlined screens and reports are easy to use and incorporate best practices across key business processes. Store also provides standard interface templates and packaged implementation services. These capabilities help reduce implementation complexity and speed installation and training so that retailers can derive immediate business value.

Full, Flexible Pricing

Retalix Store consolidates item, vendor and price information, so you can easily maintain prices and manage gross margins. Basic item movement reporting is provided to deliver sales and profitability information for improved decision making. The solution supports UPC bar codes and warehouse item numbers, and allows for multiple pricing levels and types, including regular prices, ad prices and temporary price reductions (TPRs).

Item information can be updated and set to take effect according to specified start and end dates. Cost and price association codes can be defined to reduce manual data entry and improve accuracy and consistency when maintaining groups of like items. Price verification capabilities ensure accuracy between shelf labels and POS system prices. Retailers can also improve price accuracy and price image by using wireless radio frequency (RF) devices to:

- Check prices
- Check item information
- Check future prices
- Correct prices
- Correct item information
- Send corrected prices to POS system or hold for review

StoreNext offers a comprehensive pricing and inventory management solution for headquarters (Retalix HQ™) and store-level (Retalix Store) operations that helps independent grocers speed decisions into action.

- Retalix HQ Standard offers centralized price management, hosting item files to stores, reporting capabilities, a wholesaler interface and personalization and integration tools
- Store Pricing offers store-level pricing capabilities, including POS connectivity and shelf price audit functionality. A special small-store version is available.
- Store Standard offers store-level pricing, Direct Store Delivery (DSD) receiving capabilities and a wholesaler interface. A special small-store version is available.
- Store Plus offers store-level pricing, DSD receiving, a wholesaler interface, Design-R-Label SE and Category Analyzer for sales and profitability reporting

Seamless Interfaces

POS system interfaces are provided to collect, store and report prices and item movement. TCI supports major POS systems, including:

- StoreNext ISS45 V7 and V8, Retalix StoreLine IBM 4680/4690 and ACE
- StoreNext ScanMaster (all) and NCR ScanMaster v1.01, 1.02 and v2.0/2.1
- IBM 4680/4690 and ACE

Flexible batching options enable item and price change data to be transmitted according to store preferences. For example, stores can organize batches by type or department to improve efficiency and reduce labor costs.

Supported Environments

Retalix Store is a 32-bit application that runs on Microsoft Windows XP Professional, Windows 2000 or Windows 2003 operating systems. It supports the Open DataBase Connectivity (ODBC) standard and can be deployed on Microsoft Data Engine (MSDE) or Microsoft SQL Server.
