

## Update Bulletin

### Magellan and Other PSC Products from StoreNext For Enterprise Dealers

May 17, 2006

You do not have to overpay just because your customers need the best scanner/scales and hand-held scanners in the business!

StoreNext is now able to offer our StoreNext Enterprise Dealers the PSC line of Magellan® scanner/scales, hybrid and hand-held scanners at aggressive dealer-net prices that will increase your profits compared to your current distributor or vendor.

PSC has taken over the worldwide #1 position in scanner shipments, and it will be obvious why after experiencing PSC's performance, ease of setup and use and reliability. StoreNext's PSC line includes their top-of-the-line Magellan 8500 and 9500 scanner/scales as well as the new Magellan 1000i and the QuickScan 6500BT (this is the one that uses Bluetooth to eliminate those clumsy cables...) Of course you'll also find the yeoman Magellan 8200s, 2200 and 2300 and Duet, plus the low-cost QuickScan 2500s.

And don't forget those Falcons we told you about recently — yep, StoreNext has these waiting for you too.

The Scanner/Scale Reference Bulletin is available, and the StoreNext Enterprise Dealer Web site has all the PSC presentations and other collateral, plus the complete set of PSC installation and service documentation for these outstanding products.

StoreNext wants to be your scanner/scale vendor regardless of POS — so check out our pricing and capability and don't hesitate to get with your Tom, Doug, Tom Saari or me with any questions or requirements.

And just in case you were wondering: if there are current PSC rebates on a unit? Yes, you'll double-dip with the full rebate value from StoreNext plus the low StoreNext prices.

To Your Success,

---
