Introduction

A change was made recently to the StoreNext ISS45 system. This change is reflected in the accompanying ISS45 7.1.3.0-170 software.

The Change Request Document (CRD) number assigned to the enhancement is listed in the description heading. Following the change description is an abbreviation of the ISS45 area affected:

(POS) – WinPOS

If you have any questions regarding this release, please contact StoreNext Support.

13050 – Weights and Measures Rule Reversal (POS)

As part of the Weights and Measures certification, POS development instituted a “Remove Previous Weight” warning message in ISS45 7.1.3.0-160 that was issued when the scale weight was not reset (to zero weight) prior to the next weight command being received.

A subsequent ruling by Weights and Measures reversed this requirement. Therefore, logic surrounding the enforcement of a stable, zero weight between scale reads has been removed in this release.

Technical Reference Appendix

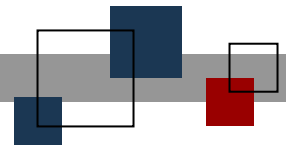

Out of Scope

Limitations of features in this release are listed below (and were not addressed in development).

Note:

The limitations below are known as of this writing, and are provided in order to assist users and support personnel to plan, install and operate the capabilities described in this document. While StoreNext Retail Technologies LLC endeavors to ensure that this information is correct and fairly stated, no attempt is made here to catalog all limitations that could be construed or that may become known in the course of use or experience.

FSD Number	Enhancement	Out of Scope
13050	Weights and Measures Rule Reversal	Changes made for the Weights and Measures Certification Reversal were made for the current release only (and will not be made to previous ISS45 releases).
