Release Content

Please see the 8140-080 Release Table for a complete list of the items provided with this release.

Overview of New Functions

Variable Discounts by Item

Requirement:

1. Create a new function that will look like the price override screen, add to it “Percent off Item” and entry box. And “new price box” this field will show the calculated amount.
2. Allow this function to be performed several times in the same ticket.
3. This function can be performed only one time per sold item. However, if that same item is purchased multiple times in that same order, the function can be performed with different percentages for each sale occurrence.
4. POS will have no control over the percentage entered.
5. Add this function to the T-Log.

Usage, Dependencies, Limitations and Assumptions

1. Once the percent amount is entered, the new price will be displayed.
2. The cashier at this time can press the ‘Yes’ key to accept new price, cancel out , or enter in a different percent amount.
3. If a percent price override is done with a manual entry item with a price of 0, the new price calculated will always be 0.
4. No additional hardware, terminal types etc. will be supported by StoreNext via this enhancement other than those that will be supported by StoreNext under the version 8.1.4.1 release.
5. No reporting changes are provided.
6. Use of this specific Promotion Discount with Open Departments is out of scope.
7. This feature in regards net vs. non net will use the existing capabilities within the promotion setup.
8. Dynamic Receipt Changes or support are out of scope
9. Support for 2x20 displays is out of scope.
10. Same control check for standard price override will be used for percent price override
11. Percentage will be entered in whole numbers only.
12. There is no support for setting a key on the menusys for preset values to enter percentage off.

13. Only entries between 0 and 99 are allowed for percentage off.
14. A new flag to specify that a percentage off has been applied to PLU as well as the percent amount will be added to 0x60, 0x14 transaction (Price Override) in the T-Log.
15. The keyboard function for Percent Price Override is 1426.
