Introduction

Several new features and enhancements were made recently to the StoreNext ISS45 system as a result of customer change requests and internal research and development. These changes are reflected in the accompanying ISS45 8.1.5.0-070 software.

The Change Request Document (CRD) number assigned to each enhancement is listed in the description heading. Following the change description is an abbreviation (or combination thereof) of the ISS45 area affected:

(FO) – Front Office

(POS) – WinPOS

(Sys) – System / Services

If you have any questions regarding this release, please contact StoreNext Support.

12746 – New EJ Report Transaction Count (FO)

The Electronic Journal Reports Search Results screen now contains a transaction count so retailers can easily identify the number of transactions that have met the search criteria.

Note:

The Electronic Journal Search Results screen will continue to display the total dollar amount and item count of the displayed transactions.

The screenshot shows the 'Electronic Journal' application window. At the top, there is a menu bar with options: Exit, Zoom, Set Sort, Search By, Lgdt, Print: By Ticket, and Print List. Below the menu, there are two input fields: 'Criterion' with the text 'LaneHawk Transactions' and 'Transaction File' with the path 'C:\PCMASTER\BAK\TRB00303.ZIP'. The main area contains a table of transactions with the following columns: Pos, Trans, Cashier, Date, Time, Amount, Items, Training, Offline, and Comments. The table lists 16 transactions from Pos 1, with various cashier numbers (995, 999) and dates (03/03/2010). At the bottom of the window, there is a summary section with the following text: 'Total : 206.45 36' and 'Transaction Count : 16'. A callout box labeled 'Transaction Count Location' points to the '16' in the 'Transaction Count' field. To the right of the summary is a 'Close' button. The bottom status bar shows 'ADMIN Ready' and system information including 'Ready', 'INS', 'SCRL', 'NUM', 'CAPS', '3/19/2010', '9:35 AM', and 'Ver. 8.1.2.0040'.

Pos	Trans	Cashier	Date	Time	Amount	Items	Training	Offline	Comments
1	63	995	03/03/2010	09:48:41		14.39	2		
1	64	999	03/03/2010	10:02:59		14.39	2

1	102	999	03/03/2010	16:19:47		26.59	4		

Total : 206.45 36
Transaction Count : 16

12942 – Expanded WIC Support for CFI Items (POS)

In support of the federal Combination Food Instruments (CFI) for Infant Foods program, ISS45 supports the purchase of fresh bananas using WIC checks. This option currently allows up to 2 pounds of bananas to be substituted for a set amount (ounces) of baby food under the WIC program.

The WinPOS 8.1.5.0-070 installation contains a new WICCFI.DAT file with the PLUs that qualify under this program. When WinPOS initializes at the POS, if a WICCFI.DAT file resides (in the Program Files \ POSware \ WinPOS folder) it will be loaded in to the GEN_TBL.QDX file.

When the POS is in WIC Sale Mode and an item is added to a ticket that has the WIC CVV flag set, the POS now checks if the item resides in the GEN_TBL.QDX file. If the item exists in the file, it will be added to the ticket (as if the WIC flag was checked).

Note:

It is the responsibility of the cashier to:

- Look at the WIC check to confirm the WIC CVV item is eligible.
- Ensure the quantity is accurate.
- Place the quantity of the item on the scale for weighing.

Note:

Items with the WIC CVV flag checked that do not reside in the WICCFI.DAT file will continue to be prohibited from being added to a WIC Ticket.

12959 – Weights and Measures Certification (POS)

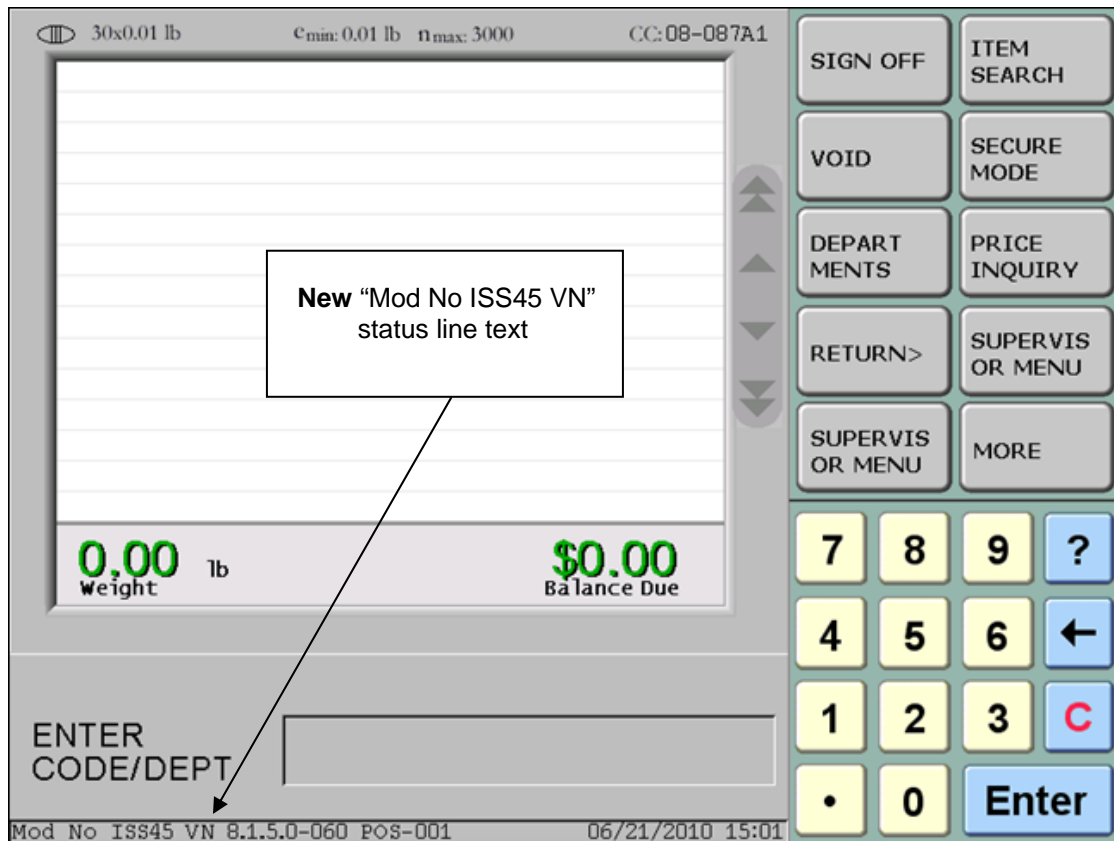

POS changes were made in this release for Weights and Measures certification in June 2010.

A “Remove Previous Weight” warning message now appears to the cashier when the scale weight is not reset (to zero weight) prior to the next weight command being received.

Example 1: If bananas are placed on the scale and added to the ticket and another scale item is added to the ticket without first taking the first item off the scale, this new error message displays.

Example 2: If bananas are placed on the scale and added to the ticket and additional scale weight is added to the scale (to ring another item) without taking the first item off the scale, this new error message displays.

In addition, to better indicate the software driving the retailer’s POS system, the Status Line of the WinPOS Screen displays new text for model number and software versioning:

Technical Reference Appendix

Out of Scope

Limitations of new features in this release are listed below (and were not addressed in development).

Note:

The limitations below are known as of this writing, and are provided in order to assist users and support personnel to plan, install and operate the capabilities described in this document. While StoreNext Retail Technologies LLC endeavors to ensure that this information is correct and fairly stated, no attempt is made here to catalog all limitations that could be construed or that may become known in the course of use or experience.

FSD Number	Enhancement	Out of Scope
12746	New EJ Report Transaction Count	<p>New EJ Report Transaction Count is available for the current release only (and will not be made compatible with previous ISS45 releases).</p> <p>New EJ Report Transaction Count development excluded:</p> <ol style="list-style-type: none"> 1. Including the Transaction Count on the report when the Print List function is executed.
12942	Expanded WIC Support for CFI Items	<p>Expanded WIC Support for CFI Items is available for the current release only (and will not be made compatible with previous ISS45 releases).</p> <p>Expanded WIC Support for CFI Items development excluded:</p> <ol style="list-style-type: none"> 1. Support of the feature using Smart Card WIC. 2. Support of the feature using eWIC. 3. Allowing a WIC item to be sold as a WIC CVV item.

FSD Number	Enhancement	Out of Scope
12959	Weights and Measures Certification	Changes made for Weights and Measures Certification were made for the current release only (and will not be made compatible with previous ISS45 releases).

Dependencies

Dependencies to utilize new features in this release are listed below.

FSD Number	Enhancement	Dependencies
12942	Expanded WIC Support for CFI Items	<ol style="list-style-type: none"><li data-bbox="574 940 1393 1010">1. Keyboard Function 1073 (WIC Ticket Key) programmed on the POS terminal.<li data-bbox="574 1045 1393 1079">2. WinPOS upgrade \ install that includes WICCFI.DAT.
