Introduction

Enhancements were recently made to the Retalix ISS45 system. The changes are reflected in the accompanying ISS45 8.1.7.0-090 software. The Change Request Document (CRD) number assigned to the enhancement is listed in the description heading. Following the change description is an abbreviation of the ISS45 area affected:

(FO) – Front Office

(POS) – WinPOS

The enhancements are explained in the following pages and are not included in the latest Office Users Guide, WinPOS User Guide or Office Administrator's Reference. If you have any questions regarding this release, please contact Retalix Support.

384664 – Multi-Tenant Support for Connected Loyalty Reporting (FO)

Connected Loyalty reporting is now supported as a multi-tenant service in sites upgrading to this version of ISS45.

In support of this feature, the ReMA LoyaltyProvider.DLL has been modified to use a new General System Parameter to establish the chain ID for the store.

New Parameter

The following General System Parameter has been added to the Store \ Technical \ Retailx Loyalty folder.

Parameter	Explanation
Retailx Loyalty Chain ID	The parameter establishes the Chain ID of the store for Connected Loyalty Reporting purposes. If left blank, the Chain ID will be set to 1 in the configuration file.

Note:

Please contact Retailx for more information on the cloud-based implementation of the Connected Loyalty.

387221 – Control Report Summary Line Option (FO)

A new “Summary” report option in this release allows a date range Control Report to generate a summary line that sub-totals each tax rate in the range. The Detail and Summary options appear as a Control Report selection.

The screenshot shows the 'Control Report' dialog box. On the left, there are three main sections: 'Online', 'Period', and 'By Range'. The 'Online' section has a radio button selected. The 'Period' section has radio buttons for 'Day', 'Week', 'Month', and 'Year'. The 'By Range' section has 'From' and 'To' date pickers, both set to 11/22/2013. On the right, there is a 'Report Type' section with radio buttons for 'Detail' and 'Summary'. A callout box with the text 'New Report Type selection' and an arrow points to the 'Summary' radio button. Below the 'Report Type' section is a text area containing the text 'Select one of the reporting periods - Online, Period, By Range.' At the bottom of the dialog are four buttons: 'Schedule', 'Preview', 'Print', and 'Close'.

In previous releases, the Control Report reported taxable sales, tax amount, tax exempt sales and tax exempt amount for each tax rate, for each day in the date range. This same “Detail” report will be the default selection.

387225 – New XML Fields for IVR Survey (POS)

In previous releases, the XML text sent to the Dynamic Receipt Engine (DRE) for printing the IVR (Interactive Voice Response) survey included only the Store Number and Voucher Number. The XML text now includes data from the following General System Parameters located in the Store \ POST \ Presentation \ Retailer Information \ Retailer Information 2 folder.

- Retailer Information Line 1
- Retailer Information Line 2
- Retailer Information Line 3
- Retailer Information Line 4
- Retailer Information Line 5

Note:

The XML data sent to DRE can be seen in C:\ Program Files \ Retailix \ Dynamic Receipt \ Log \ posTransaction.xml.

Note:

In sites not using DRE, these fields can be included in the _IVR_SRVY template for printing on the receipt.

388182 – Suppressed Receipt Printing for ECC Tenders (FO/POS)

A new General System Parameter in this release provides the option to force the printing of the store copy receipt on all ECC Retailx Global Payments transactions. This parameter will override the setting of the existing General System Parameter "Suppress Store Copy Receipt for Non-Signature MTX Transactions" for ECC tenders only. In previous releases, if this parameter was to "Yes" and the existing General System Parameter "Use MTX Receipt Data" was set to "Yes", ISS45 suppressed the store receipt from printing for other tenders (e.g. Debit Card).

New Parameter

The following General System Parameter has been added to the Store \ POST \ MTX EFT folder.

Parameter	Explanation
Force Store Copy Receipt for ECC MTX Transactions	This parameter is set to "Yes", the system will force the store copy receipt for ECC tenders to print (overriding the "Suppress Store Copy Receipt for Non-Signature MTX Transactions" parameter).

Technical Reference Appendix

Out of Scope

A limitation of the new feature in this release is listed below (and was not addressed in development).

Note:

The limitations below are known as of this writing, and are provided in order to assist users and support personnel to plan, install and operate the capabilities described in this document. While Retalix endeavors to ensure that this information is correct and fairly stated, no attempt is made here to catalog all limitations that could be construed or that may become known in the course of use or experience.

FSD Number	Enhancement	Out of Scope
384664	Multi-Tenant Support for Connected Loyalty Reporting	Multi-Tenant Support for Connected Loyalty Reporting was added for the current release only (and will not be made to previous ISS45 releases).
387221	Control Report Summary Line Option	The new Control Report Summary Line Option was added for the current release only (and will not be made to previous ISS45 releases).
387225	New XML Fields for IVR Survey	The new XML Fields for IVR Survey were added for the current release only (and will not be made to previous ISS45 releases).
388182	Suppressed Receipt Printing for ECC Tenders	The Suppressed Receipt Printing for ECC Tenders was added for the current release only (and will not be made to previous ISS45 releases).
