ISS45-895 – Support for new WIC Authority ‘WCD’ (FO).....	3
ISS45-1067 – PLU Audit Report to display PLU Name field data (FO)...	3
ISS45-1103 – Windows Updates	4
ISS45-1102 – MTX dll versions.....	5

Introduction

Enhancements were recently made to the ISS45 system. The changes are reflected in the accompanying ISS45 8.1.8.1-120 software. The Change Request Document (CRD) number assigned to each enhancement is listed in the description heading.

The Change Request Document (CRD) number assigned to each enhancement is listed in the description heading. Following the change description is an abbreviation (or combination thereof) of the ISS45 area affected:

(FO) – Front Office

(POS) – WinPOS

(Fuel) – ISS45 Fuel

(Sys) – System / Services

(SSCO) – Self-Service Check-Out

These enhancements are explained in detail in the following pages and are not included in the latest Office Users Guide, WinPOS User Guide or Office Administrator's Reference. If you have any questions regarding this release, please contact NCR Support.

ISS45-42 (451741) – Electronic WIC: support for EAN 13 and Databar UPC's (FO)

An improvement was made concerning WIC items that have an EAN 13 or Databar UPC number. Depending on how the GSP “PLU includes check digit (for POS)” is set, the check digit of APL items may or may not be stored in the ISS45 PLU/Item QDX file. One criteria for WIC claim files, that contain EAN 13 or Databar UPC items, to be accepted, is that the check digit must be included as part of those specific UPC's.

ISS45 is now calculating the correct check digit for EAN 13 and Databar UPC numbers. This calculation is happening within the ISS45 code, and ISS45 knows when it needs to make this calculation. No GSP's are needed for this logic to work. Both SmartWIC and Online-WIC are benefitted by this change.

ISS45-608 – Support for an invalid ProLogic member card number. (POS)

This enhancement is specific to the ProLogic loyalty program, and only affects customers who are using that program. A message will be presented to the cashier should a ProLogic member number or alternate Phone Lookup number be invalid.

A Cashier will enter either Keyboard Function: #932 “Swipe Member Card” or #1139 “Secondary ID/Phone Lookup”. The member card number or phone lookup number is sent to ProLogic. If the number is invalid, then ProLogic sends a message to the ISS45 POS of the invalid member number. The enhancement will now have the ISS45 POS display a message onto the cashier screen that lets the cashier know the member card entered was invalid.

Depending on which Keyboard Function was used the message will be one of the following:

Invalid Account No.

Member Phone # is Not on File

The cashier can then try again, or let the customer know that the card or phone number is not valid.

Note: Sites using C Brain configurations who are not having success with this enhancement should enable the GSP option "Member Card Number Includes Check Digit".

ISS45-895 – Support for new WIC Authority 'WCD' (FO)

The "Wichita, Caddo, Delaware (WCD), W1" WIC authority was added to the EBT_WIC_STATES table in the ISS45 Front Office database. This new WIC authority was also added to the State Maintenance application as well.

ISS45-1067 – PLU Audit Report to display PLU Name field data (FO)

Improved report information was accomplished for the PLU Audit report. All PLU Audit reports will now include the item description no matter what field was changed in the PLU. The report will show the PLU Name on both the Upd Old record line and the New record line. The report will show the PLU Name on inserted, updated, and deleted records as well.

ISS45-1103 – Windows Updates

The latest Windows Updates have been tested and applied in this release of the ISS45.

- This release was tested with the available Windows Updates applied 9/12/2017.

MFS1 – Nobilis – Windows 7 Professional SP1

POS – NCR RP60 – POSReady 7 SP1

ISS45-1102 – MTX dll versions

The updated MTX dll versions of Connected Payments and WinEPS are in this release of ISS45.

- This release was validated with the following Connected Payments and WinEPS dlls.

Connected Payments:

Verifone: Gold 31

MTX_POS.dll	828.7.0.21
MTX_EPS.dll	828.7.21.44
MTX_SE.dll	828.1.0.3

Equinox: Gold 8

MTX_POS.dll	829.2.0.17
MTX_EPS.dll	829.2.21.42
MTX_SE.dll	828.1.0.3

WinEPS:

MTX_POS.dll	828.1.1.207
MTX_EPS.dll	828.1.1.372

MTX_POS_CPMX.dll	828.7.0.21
MTX_POS_CPEQ.dll	829.2.0.17
MTX_POS_WinEPS.dll	828.1.1.207
MTX_POS_EMPTY.dll	No version
