Introduction

Enhancements were recently made to the ISS45 system. The changes are reflected in the accompanying ISS45 8.1.8.1-130 software. The Change Request Document (CRD) number assigned to each enhancement is listed in the description heading.

The Change Request Document (CRD) number assigned to each enhancement is listed in the description heading. Following the change description is an abbreviation (or combination thereof) of the ISS45 area affected:

(FO) – Front Office

(POS) – WinPOS

(Fuel) – ISS45 Fuel

(Sys) – System / Services

(SSCO) – Self-Service Check-Out

These enhancements are explained in detail in the following pages and are not included in the latest Office Users Guide, WinPOS User Guide or Office Administrator's Reference. If you have any questions regarding this release, please contact NCR Support.

ISS45-1094 – New QDX2SQL.exe Included to Retain Service Fees with 64-bit OS

During the implementation of supporting 64-bit OS, the Service Fee information moved to a different QDX Location. During an upgrade to a 64-bit OS compatible Server, the Service Fee data would be lost.

A new executable was created to populate the QDX location and SQL table. This will preserve the Service Fee entries during the upgrade.

ISS45-1140 – Replacement of C Shared Drive with PCMaster Shared Drive

Due to security concerns an improvement has been implemented so that the C drive share no longer overly exposes the system to potential threats. In the past the C drive share was created to allow LFS systems access to transactional data through the Electronic Journal application. With this improvement, the PCMaster folder will replace the share of the C drive and will allow the Front Office to function normally.

To implement this change, the user will need to do the following:

Removal of C Share Instructions

- Right click on the C Drive.
- Click on Properties.
- Click on the Sharing tab.
- Click on the Advanced Sharing button.
- Unclick the 'share this folder' box.
- Click Apply.

Adding of the PCMaster Share

- Right click on the PCMASTER Folder.
- Click on Share with.
- Click on Specific people.
- Add the Administrator user that is to have access to the share.
- Adjust the permission level to allow read, write, or both.
- Click the Share button.
- Click Done.
