This documentation is designed for placement in a Fujitsu binder that can be ordered separately. To order the binder, contact your sales representative. Indicate PIN 45007/002 and/or part number 80192817.

This sheet contains spine cards that can be used to identify the binder for the appropriate documentation. Cut one of the cards along the dotted lines and insert it in the binder's spine pocket. Discard the remaining cards or save them for later use.

Specifications for Reward Check Feature

Reward Check Capabilities

- The Reward Check system is set up to use the Advanced Promotions/Member Card system for accumulating shopper points.
- A local Member file must be maintained on the ISS45 Office. Points are accumulated into the local Member File. Accumulation of points is done in real-time, not during EOD.
- After accumulation of a set number of points, the shopper is entitled to get a printed coupon (“Reward Check”). After finalizing the order, one coupon is printed for each X points, and the remaining points are stored in the Member file for subsequent visits.
- The Reward Check issued is a bar-coded coupon printed at the bottom of the receipt tape at completion of the order. The format of the Reward Check is set up as a template and allows the user to customize the text of the reward check. All Reward Checks (coupons) have the same barcode: 6666777788882. (2 is the check digit).
Note: A barcode can only be printed if an Axiohm or Epson 6000 ¹ printer is used, other printers don’t have the ability to print barcodes.
- A shopper can be entitled to several coupons — all the coupons will be printed at the bottom of the receipt tape at completion of the order.
- The text on the Reward Checks is customizable and can contain the shopper’s name (member name) and account number.
- Shoppers who have received a reward check coupon can redeem it during the next purchase.
- The barcoded Reward Check can be scanned at any time in a transaction. If there is no scanner, the barcode can also be entered manually.
- After the barcode is scanned an indication will be given on the screen and next scanned item is sold at frequent shopper price. The system then returns to normal pricing.
- If a Reward Check was scanned and the next item does not have a frequent shopper price, an error message is displayed.
- If an item with a linked Reward Check is cancelled, the Reward Check is cancelled as well. A message is displayed for the cashier to return the Reward Check.
- An unlimited quantity of Reward Checks can be redeemed within one sale.

¹ Epson 6000 support was added as of ISS45 Version 7.7.1_52.

- If a Reward Check was issued, the following points information will be printed on the ticket:
 - Beginning points
 - Points this visit
 - Rewards Check Issued (1)
 - Ending Points Balance
- If the Reorganized Receipt/Buffered Printing is set to ON, the 'Your savings today' section on the bottom of the receipt will show:

Promotions	X.XX
Rewards check redeemed	X.XX
Coupons	X.XX
- During EOD a report listing Daily Reward checks can be created.

Involved Parameters And Settings

- Member card in system (6-1-3-9-1) set to ON
- NO frequent shopper in system
- Set up member card scheme for points accumulation
- Set up card range for member card
- Items that allow redemption of reward check have to be defined with Freq Shopper discount.
- Local CCMS type (6-1-1-9) set to 'Reward check'
- In Member program maintenance (1-10-3) set up first member program as follows:
 - Redemption rule: 'Fixed barcode printed'
 - Redemption value: define the number of points required for one reward check to be printed
- In Receipt printing parameters (6-3-1-12) set the 'suppress printing points on receipt' parameter to ON. Special points summary is printed automatically for this feature.
- In Template Maintenance create a template named: CCMS_CPN01 for the reward check printout. Barcode is printed automatically if used an Axiohm or Epson 6000 printer.
- In EOD Job Stream reports (6-1-1-5), set Daily Rewards Check report to ON.

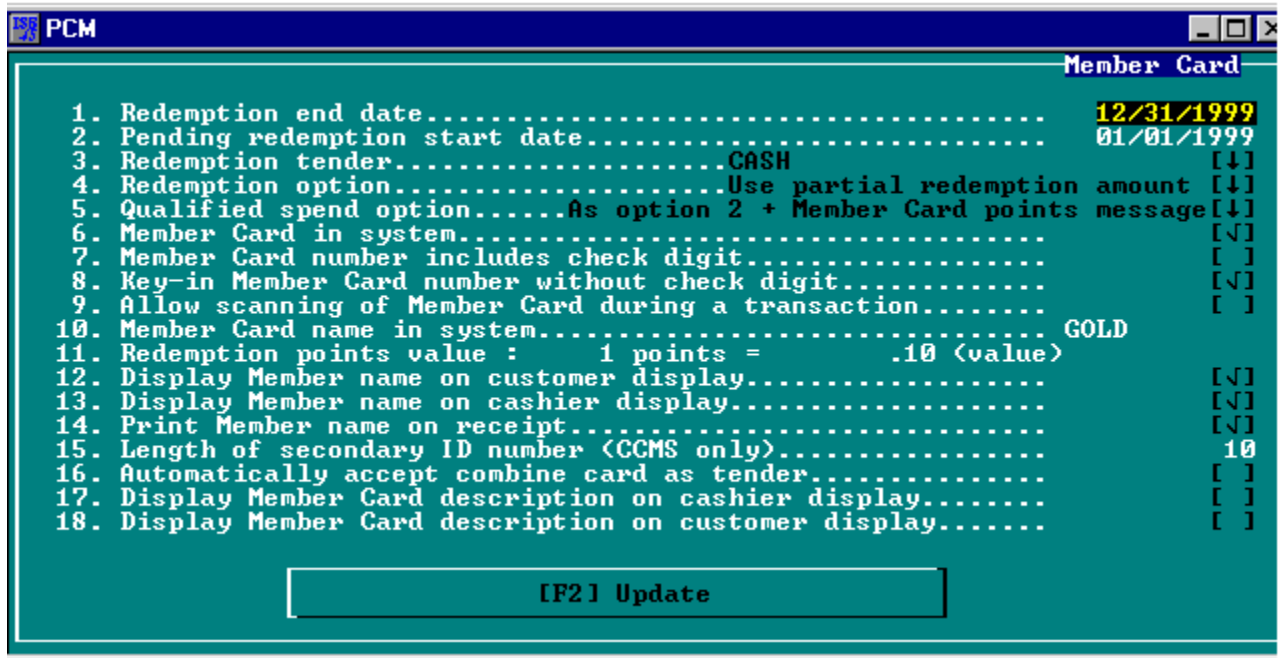

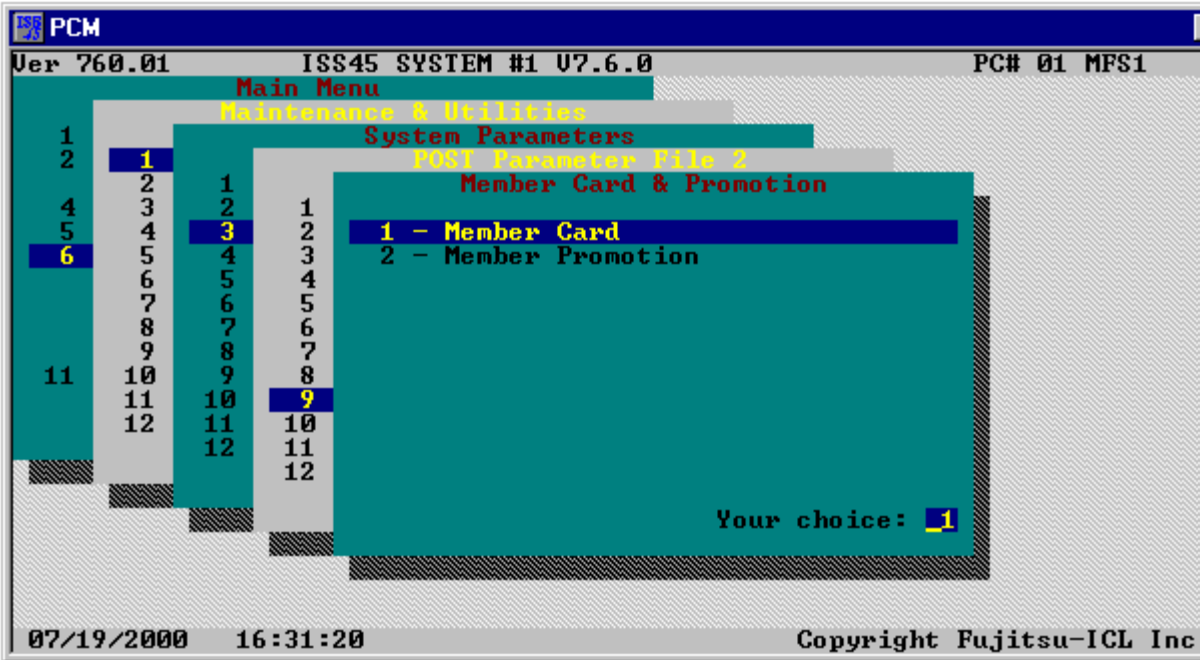

Transaction File:

- Opcode 6020, flag 'reward check used'.
