Solidcore on ISS45 MFS1 — DEPEND File Problem

S3-TECH-14:02
February 5, 2014

ISSUE

Solidcore may not work properly on the MFS1 with the current DEPEND file provided on the current Solidcore installation CD. This will affect the MFS1 for ISS45 V7 and V8.

SOLUTION

For ISS45 V8 — download and copy the DEPEND_ISS45_V8.Reg file to the MFS1 Solidcore folder and double click to install this updated registry file.

[Click Here](#) to download the file.

For ISS45 V7 — do not install any DEPEND files. Even though this installation is indicated in the Solidcore installation document on the Solidcore CD, the DEPEND file is not needed with ISS45 V7 and it should not be installed.

If further assistance is required, please contact ISS45 Support.
