SQL 2000 Service Pack 4 Installation with ISS45

ISS45-TECH-07:17
June 20, 2007

Microsoft SQL 2000 Service Pack 4 has been certified with ISS45 V8.

WHERE TO INSTALL

SP4 is useful with the following platform setups:

Server	O/S	SQL	Add SP4
MFS1,MFS2 or any LFS	Win 2K Pro	SQL 2K	Yes
MFS1, MFS2 or any LFS	Win 2K Pro	SQL 2K Workgroup	Yes
MFS1	Win 2003 Server	SQL 2K	Yes
MFS1	Win 2003 Server	SQL 2K Workgroup	Yes
MFS1	XP Pro	SQL 2K Workgroup	Yes
MFS2 or any LFS	XP Pro	n/a	No

PRE-INSTALLATION

- 1) Exit ISS45 on all servers and workstations
- 2) Back up the FrontOff database before starting this installation
- 3) If Solidcore is installed on your system open a DOS command prompt and key in **SADMIN BU** and then depress the **ENTER** key
- 4) Insert the "SQL Server 2000 SP4" CD in the CD-ROM drive
- 5) Locate the file SQL2000-KB884525-SP4-x86-ENU.EXE on the CD and double click on the file to run it
- 6) This brings up a window asking where to extract the files, use the default directory - C:\SQL2KSP4, click on the **NEXT** button
- 7) When the extraction has completed click on the **FINISH** button
- 8) Close all windows and remove the CD

INSTALLATION

- 1) Open Windows Explorer and browse to C:\SQL2KSP4
- 2) Open the folder and then double click on the SETUP.BAT file
- 3) At the "Welcome" screen click on the **NEXT** button
- 4) At the "Software License Agreement" screen click on the **YES** button
- 5) At the "Instance Name" screen click on the **NEXT** button
- 6) At the "Connect to Server" screen click on the radio button next to the statement that reads '*The windows account information I use to log on to my computer with (Windows authentication)*', then click on the **NEXT** button
- 7) The system will take a few minutes to "validate" the user, **WAIT!**
- 8) At the "SA Password Warning" screen click on the radio button next to the statement that reads '*Ignore the security threat warning, leave the password blank*', then click on the **OK** button
- 9) At the "Error Reporting" screen do **NOT** check anything then click on the **OK** button
- 10) At the "Start Copying Files" screen click on the **NEXT** button
- 11) At the "Setup" screen click on the **OK** button
- 12) At the "Setup Complete" screen click on the **FINISH** button to restart your computer

POST INSTALLATION (AFTER REBOOT)

- 1) If Solidcore is installed on your system open a DOS command prompt and key in **SADMIN EU** and then depress the **ENTER** key
- 2) You can also delete the C:\SQL2KSP4 directory at this time.
