

**Subject: New Hard Disk Drive Approved for TeamPoS 2000 Terminal**

**Update B:** Kit part numbers changed due to non-RoHS compliance.

**Update A:** Added Field Upgrade kit information and details for included IDE cable.

**Overview**

A new hard disk drive has been approved and certified with the TeamPoS 2000 terminal. The new drive consists of the following parts:

**Production:**

<u>Part Number</u>	<u>Description</u>
90001583	Hard Disk Drive with mounting rails, 2.5", 80GB

CA05951-6402	Cable, 80 Pin HDD	1
D900000288	Installation Instructions for HDD, IDE I/F	1

The drive is available now and should be seen in some of the new TeamPoS 2000 terminals during August 2007. The 80GB HDD incorporates a [special bracket](#) and interface adaptor because it is a 2.5" laptop drive instead of the usual 3.5" standard drive that is usually installed in the TeamPoS 2000 terminal. For those terminals that need to be upgraded that have an existing 40 pin IDE cable, a kit should be ordered that contains a 80 pin IDE cable, and labels.

In addition, the sixth and seventh digits of the intelligent PIN will now have the numeral "5" representing the 80GB hard disk drive.
