ISS45 7.7.1_56 New Features

MB-ISS45-1179

March 5, 2002

Fujitsu Transaction Solutions Inc. is pleased to announce that 7.7.1_56 is Generally Released. Besides providing a number of resolutions¹ to software faults three desirable enhancements are included at no charge with the 7.7.1_56 release.

The new features include:

- ***New Lines at the End of the Receipt*** — Users can now specify up to 60 lines of additional text to append to the end of the shopper receipt. These lines can be used for special promotions, messages, recipes, etc.
- ***Masking the Frequent Shopper Number*** — Some grocery companies would prefer for the Frequent Shopper numbers to be hidden during transactions. 7.7.1 can now mask the Frequent Shopper/Member Card number including instances where Frequent Shopper coupons are printed.
- ***Food Stamp Total on Display*** — Users may now display the Food Stamp Total using 7.7.1_56 where a single display is being used.

Instructions for setup of these features is provided in Technical Bulletin ISS45-TECH-02:06.

Please also note that Windows 98 has not been a supported platform for ISS45 since the 7.7.1 release. There have not been, however, any documented problems to date using Windows 98 with releases 7.7.1_50 through 7.7.1_55. This is emphatically **not** the case with 7.7.1_56. ISS45 7.7.1_56 **will not** operate over Windows 98.

Although patch 7.7.1_56 appears to install over Windows 98, it will not function. If there are any sites still using Windows 98 and wish to install 7.7.1_56 or future releases in the Version 7 line, an upgrade to Windows 2000 will be required. Fujitsu does not support Windows 98 as an operating system platform for any current ISS45, and there are no plans for engineering changes that would restore Windows 98 as a supported platform.

To Your Success,

Tony

Antony van Leventer
Director: Supermarket Systems
