PSI ACM Self Checkout System

MB-ISS45-1180

May 9, 2002

The ISS45 interface with Productivity Solutions, Inc.'s ACM Self Checkout system has been successfully tested and is being released by PSI. Fujitsu is extremely enthusiastic about this promising technology and the value that the combination of ISS45 and ACM can bring to the grocery business

Dealer interest from the earlier April 11 Update Bulletin and Press Release has been strong, and so Fujitsu contacted PSI for additional information on their ACM solution. This bulletin provides the additional information provided by PSI.

PRODUCTIVITY SOLUTIONS, INC.

Productivity Solutions, Inc. (PSI) is headquartered in Jacksonville, Florida and is the leading manufacturer and largest distributor of conveyor-based self checkout solutions in the US.

COMPLETE ACM MODULAR SELF-CHECKOUT PRODUCT LINE

The ACM (Automated Checkout Machine) product line provides retailers with the maximum operational flexibility and the highest ROI of any self checkout solution. ACM features both conveyor based and "scan & bag" solutions, and retailers can mix and match the units to implement the configuration that best suits their requirements in each of their formats.

The ACM product line includes:

- ACM 750, conveyor-based self checkout lane
- ACM 500, scan & bag express solution
- ACM 300, kiosk unit
- ACM Handheld, PDA RF device

ACM ADVANTAGES

➤ *Patented conveyor-based lane design of ACM 750*

- Handles both large and small orders equally well – can be direct substitute for conventional lane
- Offers highest level of security – ACM is the only self checkout with both weight and dimensional verification
- Facilitates face-to-face customer service at the lanes
- Proven product success of conveyor-based solution in large installed base

This document and information are supplied to Fujitsu Transaction Solutions personnel and third parties to assist them in doing business with Fujitsu. They are not to be used or distributed for any other purpose.

Fujitsu Transaction Solutions Inc. endeavors to ensure that the information in this document is correct and fairly stated, but does not accept liability for any error or omission.

- ***Best ROI of any self checkout***
 - ACM 750 handles large and express orders simultaneously, or can be used exclusively as express lanes – providing retailers with flexibility to manage all types of traffic patterns, from busy weekend mornings to slower off peak weekdays.
 - Since the ACM system is not limited to small orders like other self checkout products, stores can handle large orders through the self checkout lanes. This is critical since it will maximize the percentage of the item throughput that is handled by self checkout, providing a higher return for the store’s investment.
- ***Flexible – compact footprint fits any store front end***
 - 4 ACM lanes fit in space of 3 conventional lanes, 3 ACM lanes in space of 2
 - Three lane installations are possible
- ***Friendly and familiar – easiest self checkout system to use***
 - ACM shoppers see patented photo-icons for non bar-coded/produce items with voice prompting for each item
 - Familiar lane design encourages usage
 - Studies demonstrate that a higher percentage of shoppers will use an ACM system than competing self checkout products, further increasing usage and ROI.
- ***Modular - bagging options and lane sizes fit any store format and front end***
- ***Comprehensive service and support from most experienced self checkout team***

DIRECT INTEGRATION TO ISS45

ISS45 and ACM Self Checkout are now directly integrated. Because the ACM works well in both large and small store formats, all ISS45 users now have easy access to the self checkout system with the most flexibility, best shopper experience and best payback for the grocer.
