

This Issue 4 provides the new NCR Product IDs which must now be used with NCR Order Entry. The old "StoreNext" PINs are cross-referenced for each item for your information during the transition. Changes of significance are highlighted in **RED**.

This Pricing and Configuration bulletin provides information for ordering Pervasive SQL (PSQL), which is the required database platform for ScanMaster V2.

Pervasive was purchased by Actian Corporation, and the terms and conditions for PSQL purchases have changed compared to those in force before 2014.

PSQL AVAILABILITY AND LICENSE REQUIREMENTS

- PSQL licenses purchased from NCR may *only* be used with ScanMaster.
 - PSQL licenses purchased from NCR may not be used with any other product from any other vendor or for any other reason. Orders for new PSQL licenses can only be accepted when accompanied by a matching new ScanMaster license purchase on the same P.O.
- Conversely, ScanMaster licenses or V2 upgrades may not be sold without a matching Pervasive PSQL license. NCR must decline any ScanMaster license order unless it is accompanied by a PSQL license order sufficient to fully operate the ScanMaster system order.
- Channel Partners will purchase PSQL from NCR under distribution terms and conditions required by Actian (the Pervasive SQL's new owner). This requirement is new, and your rights and responsibilities governing PSQL resale are published in the Policies and Procedures manual.
 - The PSQL Reseller Distribution Agreement is automatically in force with inferred Channel Partner agreement upon the Channel Partner's first PSQL order to NCR, the Agreement governs that and all subsequent orders.

Some important provisions of the PSQL Reseller Agreement include:

- A copy of the PSQL v11 End-User License Agreement (EULA) must be provided to each end user that purchases a PSQL license. The EULA is available on the PSQL Master CD-ROM, or from the ScanMaster All-In-One Page on the Channel Partner Portal.
- Only one archive copy and one backup copy of the software may be made for each unique PSQL store license.
- Lab and demonstration licenses for PSQL are now treated the same as end-user licenses, and must be purchased at the same prices, discounts, terms and conditions.
- Channel Partners must maintain a list of all PSQL orders, license keys, site locations and end-user names – including internal lab/demo licenses – where PSQL has been resold, used and/or installed, including a record of any backup or archival copies that may have been made for those users.

PSQL CONFIGURATION

The method for Pervasive PSQL v11 database licensing is:

- Base license plus User Count Increase (UCI) licenses must total to at least the minimum user count required:
 - The minimum number of users equals the ScanMaster Controller/Server + ScanMaster workstations + POS terminals + self-checkout lanes.
 - Example: for a 5-lane ScanMaster system with no workstations, a license for $1+5+0=6$ users is required (1 controller + 5 lanes + 0 workstations = a 6-user license).
 - Example: a 7-lane system plus (4) self-checkouts and (1) ScanMaster workstation would require licenses for $1+7+4+1=13$ users (1 controller + 7 POS + 4 self-checkout + 1 workstation = 13-user license).
 - Pervasive allows combining licenses to achieve the total required. One “Base” license is required, and then “User Count Increase” (UCI) licenses can be stacked on top of the Base license to achieve the total needed.
 - For example, you can purchase a 5-User Base license plus a 3-user UCI license to create an 8-user system license.
- In addition to an x-user license, PSQL “Workgroup” licenses are required for each POS terminal, self-checkout lane and workstation in the ScanMaster system. A Workgroup license is *not* required for the server.
 - So for a 5-lane ScanMaster system with no workstations, $0+5=5$ Workgroup Licenses are required.
 - For a 7-lane system plus (4) self-checkouts and (1) ScanMaster workstation, $0+7+4+1=12$ Workgroup Licenses.
- NCR is now shipping PSQL v11 only, which is compatible with ScanMaster release 2.09. PSQL v10 has been withdrawn and is no longer available from NCR.

See the [ScanMaster Operating System and Database Matrix](#) on the Channel Partner Support Web site for complete information regarding PSQL versions and compatibility.

PSQL License and Ordering Details

PSQL BASE LICENSES

- NCR is shipping PSQL v11.3 (PSQL v11 with Service Pack 3).¹
 - PSQL v11.3 is the *only* PSQL version now available from NCR. All other versions have been withdrawn.
 - PSQL v11.3 has been certified with ScanMaster 2.09.00-050 and above.
 - The [ScanMaster Operating System and Database Matrix](#) on the Channel Partner Support Website provides complete information regarding Pervasive PSQL version compatibility with ScanMaster.
- An appropriately sized Pervasive PSQL license must be purchased with each new ScanMaster POS system.
 - ScanMaster Express systems that include PSQL in the Express package will not require a separate Pervasive PSQL purchase.

¹ NCR plans to introduce PSQL 12 when certified with a new version of ScanMaster at some time during 2016.

- New Pervasive PSQL Base licenses cannot be ordered from NCR without a corresponding ScanMaster purchase.
- Exactly one PSQL Base license is required for each Pervasive PSQL system. Every PSQL system must have one, but not more than one, Base PSQL license.
- Order only one (1) Pervasive PSQL Base license per purchase order to prevent confusion regarding which Base or User Count Increase licenses go with which.
- A single product key will support both 32-bit and 64-bit Windows versions of Pervasive PSQL v11.2 and forward. This enables one license to serve for mixed installations with 32-bit and 64-bit operating systems.
- A PSQL product key may be used on only one (1) machine (either physical or virtual) at a time. A PSQL product key must first be de-authorized before being used to authorize an instance of Pervasive PSQL.
- Starting with PSQL v11.2, a bit switch is not required to move from 32-bit to 64-bit use. Previous PSQL versions required new licenses to authorize a bit switch. (Users remaining on PSQL v11 with SP1 (and earlier) must pay for bit switches.)
- The 32-bit Windows Server includes the 32-bit Client. The 64-bit Windows Server includes 32-bit and 64-bit Clients.
- A license for Pervasive Backup Agent v3.1 is included with Pervasive PSQL v11 and later releases. Backup Agent v3.1 executables are included in Windows versions of PSQL v11.2.
- Support for Microsoft Volume Shadow Copy Service (VSS) is included with Pervasive PSQL v11.2 and later releases.
- Electronic versions of Pervasive PSQL documentation is provided on the PSQL media masters provided by NCR to authorized ScanMaster/PSQL Channel Partners. Hard-copy documentation is available only by special arrangement.

PSQL WORKGROUP LICENSES

- PSQL Workgroup licenses must also be ordered with each Pervasive system.
- One (1) Workgroup license is required for each ScanMaster POS or self-checkout lane and each ScanMaster Workstation.
- A Workgroup license is *not* required for the ScanMaster Server/Controller.
- Workgroup licenses are not eligible for upgrades. When a PSQL system is upgraded to a new version, new PSQL Workgroup licenses must be purchased for each required endpoint.

PSQL USER COUNT INCREASE (UCI) LICENSES:

- UCIs can be ordered as part of the initial PSQL purchase or can be used to add users to existing systems when later required.
- UCIs are not eligible for upgrades. Only PSQL Base licenses may be upgraded.
 - If upgrades are anticipated, it may be better to purchase a slightly larger Base license instead of a Base + UCI license where only the Base portion is eligible for later upgrades.
- PSQL UCIs added to installed sites must match the version of that existing PSQL Server installation.
- Before PSQL v11.2, the operating system running a UCI's machine (including its bit architecture) needed to match the original PSQL Server Engine's O/S. Beginning with PSQL v11.2 however, the single product key authorizing the UCI supports both 32-bit and 64-bit Windows platforms.

- A PSQL UCI product key may be used on only one (1) machine (either physical or virtual) at a time. A PSQL UCI product key must be de-authorized before being used to authorize an instance of the Pervasive PSQL UCI.

PSQL UPGRADES

Earlier versions of Pervasive may be upgraded to the current PSQL v11 product. Regarding PSQL upgrades:

- PSQL Upgrade licenses must have the same user count as the installed Base server license: increasing or reducing the user count is not allowed.
- ***Only PSQL Base licenses may be upgraded!***
 - PSQL User Count Increase (UCI) licenses and PSQL Workgroup licenses are not upgradable and must be repurchased when the associated PSQL Base license is upgraded.
- PSQL Upgrade licenses may only be purchased for PSQL databases running existing installed ScanMaster POS systems.
 - PSQL Upgrades cannot be used with new ScanMaster system licenses. New ScanMaster purchases must be accompanied by a new Pervasive PSQL Base system order.
- Proof of purchase is required for the installed Pervasive PSQL license and for the version being upgraded. For example, the original PSQL purchase order with the original ScanMaster POS order and SKIF can be used to demonstrate the original purchase.
- Upgrades can apply across operating system platforms.

Pervasive — Configuration and Pricing

Pervasive PSQL Workgoup Licenses

Pervasive PSQL Workgoup Licenses PIN	Description	List Price	Install Price	Maint Price
---	-------------	------------	---------------	-------------

G770-0071-0000 — Pervasive Workgroup License, One Required per POS or Self-Checkout Lane and Workstation

\$50

WORKGRP

This item was previously listed as StoreNext PIN: PSQL-WKG-01.
 ¶-Pervasive PSQL Workgroup license. One (1) Workgroup license is required for each ScanMaster POS and self-checkout lane, plus one (1) for each ScanMaster workstation. A Workgroup license is NOT required for the ScanMaster server/controller. ¶-For example, a store with five (7) POS lanes, four (4) self-checkout lanes and one (1) workstation would require twelve (7+4+1=12) Workgroup licenses. ¶-This PIN can be used for all Pervasive PSQL release versions (v8.x, 9.5, 10.x, 11 etc.). ¶-NOTE! PSQL Workgroup licenses are not upgradable. All Workgroup licenses in the PSQL system must be repurchased when PSQL is upgraded to a new major release. ¶-Replaces withdrawn PIN SMPCL

Partner Net Price: \$30.

Except where noted, Solution Providers will receive the standard discounts from the Platform discount schedule on the items immediately above in this section.

Pervasive PSQL Base Licenses

Pervasive PSQL Base Licenses

PIN	Description	List Price	Install Price	Maint Price
G770-0051-0000	— Pervasive User License, Base License, Pervasive PSQL V11, for up to 01 User	\$150		
01-USER BASE	<p>This item was previously listed as StoreNext PIN: PSQL-BAS-01-11.</p> <p>¶-Pervasive PSQL Base license. An appropriately sized Pervasive PSQL license must be purchased with each new ScanMaster POS system (ScanMaster Express systems may include PSQL in the Express package and do not require a separate Pervasive PSQL purchase). New Pervasive PSQL Base Licenses cannot be ordered from NCR without a corresponding ScanMaster purchase. ¶-Exactly one Base license from this section is required for each Pervasive PSQL system. More Users can be to a Base license by ordering one or more of the User Count Increase (UCI) licenses (see that section below). For example, a 5-User Base license and a 3-User User Increase license can be combined to provide an 8-User license. To count the total number of user licenses required, add (1) for each ScanMaster POS or self-checkout lane, (1) per ScanMaster Workstation and (1) for the ScanMaster Server/Controller. ¶-PSQL Workgroup licenses must be ordered with each Pervasive system. One Workgroup license is required for each ScanMaster POS or self-checkout lane and each ScanMaster Workstation. A Workgroup license is NOT required for the ScanMaster Server/Controller. ¶-PSQL v11.3 (Service Pack 3) is the only PSQL version now available from NCR. All other versions have been withdrawn. PSQL v11.3 has been certified with ScanMaster 2.09.00-050 and above. See the ScanMaster Operating System and Database Matrix on the Channel Partner Support Website for complete information regarding Pervasive PSQL version compatibility with ScanMaster. ¶-Order only one Pervasive PSQL Base License per P.O. to avoid confusion regarding which PSQL User Count Increase (UCI) or PSQL Workgroup licenses are intended to be grouped with which PSQL Base license. ¶-Replaces withdrawn PIN SMPSL01 and withdrawn PIN SMPSL01V</p> <p>▶ Partner Net Price: \$113. ◀</p>

Use this PIN to upgrade a 03-user Pervasive PSQL version 8.x Base license to a 03-user Pervasive PSQL version 11.x Base license. ¶-PSQL Upgrade licenses must have the same user count as the installed Base server license: increasing or reducing the user count is not allowed. PSQL Base licenses only may be upgraded: PSQL User Count Increase (UCI) licenses and PSQL Workgroup licenses are not upgradable and must be repurchased when the associated PSQL Base license is upgraded. PSQL Upgrades cannot be used with new ScanMaster system licenses: PSQL Upgrade licenses may only be purchased for existing installed ScanMaster POS systems, and new ScanMaster purchases must be accompanied by a new Pervasive PSQL Base system order. ¶-Proof of purchase is required for the installed Pervasive PSQL license and for the version being upgraded. The original PSQL purchase order with the original ScanMaster POS order and SKIF, for example will normally suffice. Upgrades can apply across operating system platforms. ¶-Replaces withdrawn PIN SMPSL03U-0810 and withdrawn PIN SMPSL03U-0809 and withdrawn PIN SMPSL03U-0709</p>			Partner Net Price: \$266.
