NCR RealScan 79 — Configuration and Pricing

MB-POS-1244 Issue 4

December 16, 2015

This Issue 4 adds the Ingram ordering information, plus additional items, clarifications and updates. The special Q4-2015 rebates for 7879 volume purchases have now expired for new orders and have been withdrawn. Changes of significance are highlighted in **RED**.

NCR is pleased to offer the RealScan™ 79 (class 7879) scanner/scale for sale by authorized NCR Solution Providers.

This bulletin provides an overview of the RealScan 79's configuration scheme and provides pricing as well as configuration, compatibility, release and pricing notes with the available RealScan 79 items.

REALSCAN 79 PACKAGES

To maximize convenience, minimize turnaround time and limit ordering errors due to omitted required components, NCR has packaged the most popular RealScan 79 base configurations for the North American market. Additional packages will be added upon experience and demand.

The packages are for convenience and simplicity of ordering — the pricing of NCR POS hardware packages are equal to the sum of their parts. The configuration notes for each package provide the list of the NCR base components, features and kits included in that package. Wherever possible, packages use “feature-ized” components when using the Feature version of a component or cable will provide NCR Solution Providers with a minimum price.

While substitutions or component swaps within a package are not possible, any features and kits compatible with a package may typically be added to that package as desired.

“Package PINs” may be ordered via NCR’s Plano Order Entry team (for 2015 shipment only) or from ScanSource using these package PINs. Orders from Ingram must use different product ID numbers for these packages: these alternates are now provided with the package items in this bulletin.

Channel Partners may also order from ScanSource according to the ScanSource catalog item numbers, which (other than the packages) will be similar to the line-item PINs provided in this bulletin’s listings.

FEATURES AND KITS

The RealScan 79 product listings on the following pages adhere to NCR’s standard nomenclature of “Features” (identified with an “F”), “kits” (identified with a “K”) and corporate cables (identified with a “C”).

“Features” are ordered with the base unit and are installed either at the NCR factory, regional distribution center, a Regional Customer Fulfillment Center (CFC) or a distributor (such as ScanSource). **New configurations of your own creation using Feature Codes will not match up to existing stock, and require a custom build. To avoid long lead times, add to existing configurations with Kit items if possible, which are separately stocked and more likely available for quick shipment.**

“Kits” may be packaged or shipped separately and will likely require installation or assembly by the NCR Solution Provider.¹

KIT AND FEATURE PRICING DIFFERENCES

Kits may also carry a different price from an otherwise identical Feature. Where pricing of a Feature differs from the Kit or component version, the configuration notes for those items normally provide guidance and point the Solution Provider to the lowest-cost alternative. With respect to the RealScan 79, for example, several cables and add-on Features carry a lower price than the corresponding Kit or component.

CERTIFICATION WITH NCR POS SYSTEMS — ISS45, SCANMASTER AND ACS

NCR endeavors to provide Solution Providers with fully supported “plug-and-play” POS configurations that have been carefully tested and documented to minimize our Channel Partners’ staging and configuration effort.

RealScan 79 Certification has been completed for the ISS45 and ScanMaster POS platforms, and ACS and ACS-IR Certification is expected presently. Updates to the Compatibility Notes within the Pricing and Configuration bulletin listings will continue to reflect the RealScan 79’s certification status.

With all NCR POS terminals and components, ISS45 and ScanMaster Certification projects necessarily prioritize the best and most commonly purchased technologies and standards to cover the greatest number of configurations practicable. NCR RealScan 79 Certifications will therefore focus on:

- The current and supported versions of ISS45 and ScanMaster
- Up-level NCR OPOS over POSReady 7, the default operating system
- USB connection
- Current and compatible models of host POS terminals, with priority given to high-volume, certified, and current e-box models such as:
 - RealPOS 82XRT
 - RealPOS 40 Release 2
 - RealPOS 60 Release 2
 - RealPOS 25 Release 2
 - RealPOS XR7
 - **RealPOS XR6**

With the enormous number of permutations across RealScan 79’s many hardware options, NCR recommends that Solution Providers stay with the Certified/supported product configurations whenever possible. Further, NCR supports only the Certified hardware configurations as tested with the POS software platforms and other associated hardware.

Some versions of the RealScan 79 are declared Certified by proxy. For example, the Full-Sized RealScan 79 footprint versions are the only models physically Certified, but the Mid-Sized and

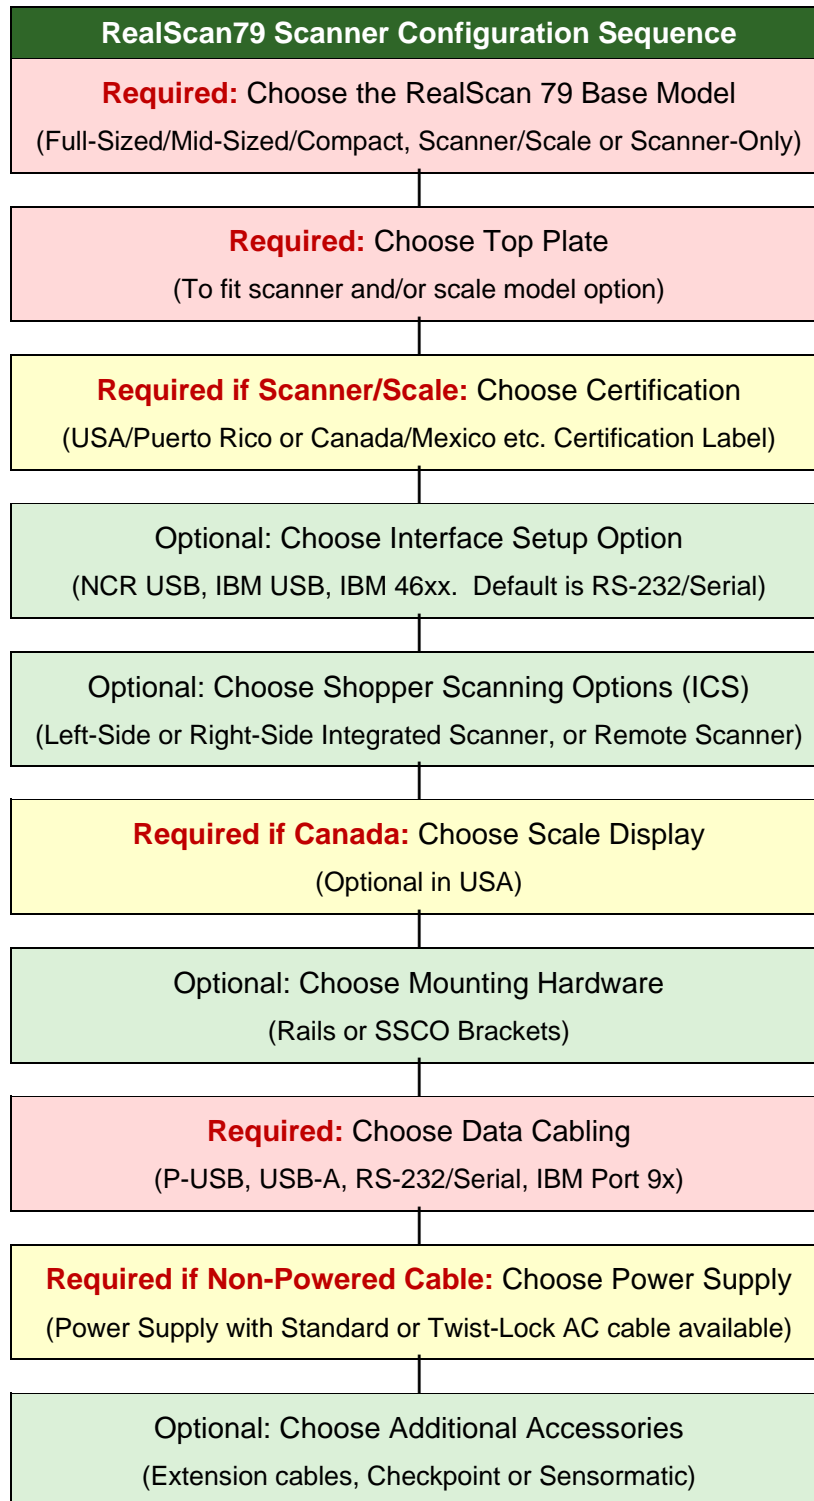

¹ For packaging and inventory, consistency or convenience purposes, distributors such as ScanSource may provide pre-installation of Kits or components as if they were ordered via Feature Codes.

Compact versions also receive full support, given the low risk of electronic or compatibility problems from footprint differences alone.

In other cases, Compatibility Notes within the listings may advise Solution Providers that the item is not Certified or supported, but there have been no problems known to date or likely to occur in normal circumstances. Yet other options and devices will be listed as Not Recommended or Not Compatible (no facilities within the software to use that item or option) according to the software's own capabilities and features.

REALSCAN 79 CONFIGURATION FLOW

The following flowchart shows the sequence of choices required when configuring the RealScan 79 scanner/scale from the most basic component and feature level. The flow echoes the sequence of the RealScan 79 Configuration and Pricing presented in the immediately following sections of this bulletin. **To minimize forecasting and lead times, the most popular models are stocked as pre-configured items that can be ordered using the package PINs (from ScanSource) or the alternate "M-BOM" part numbers (from Ingram).**

Configuration and Pricing

RealScan79 Scanner/Scales: Special Offers

The following Special Offers are available as of this Bulletin's release date.

See the requirements, deadlines and notes provided for each the items below, and refer to the listed Announcements for complete details regarding these special offers.

RealScan79 Scanner/Scales: Special Offers PIN	Description	List Price	Install Price	Maint Price
NCR-7879-REBATE-100-15	NCR RealPOS 7879 \$100 Instant Rebate for Scanner/Scales Q4 2015, 100+ Volume Order Required This offer expired on 12-Dec-15 for additional orders, and has been withdrawn ▶ Partner Net Price: (\$100). Product Withdrawn ◀	(\$100)		
NCR-7879-REBATE-75-15	NCR RealPOS 7879 \$75 Instant Rebate for Scanner/Scales Q4 2015, 50+ Volume Order Required This offer expired on 12-Dec-15 for additional orders, and has been withdrawn ▶ Partner Net Price: (\$75). Product Withdrawn ◀	(\$75)		

RealScan79 All-Imaging Scanner/Scale Packages

The NCR RealScan79 (Class 7879) All-Imaging Scanner/Scale offerings are listed below.

Complete RealScan79 packages are listed first, with the subsequent pages and listings following the overall 7879 configuration flow listed on Page 3 of this bulletin.

RealScan79 All-Imaging Scanner/Scale Packages: USA

PIN	Description	List Price	Install Price	Maint Price
NCR-7879-PK-01	NCR Scanner/Scale Package, Class 7879 All-Imaging, Full-Sized, ClearShield Glass, Side Rails, P-USB Interface/Power Cable, US	\$3,050		\$185

P-USB USA

NCR 7879 Scanner/Scale P-USB US package includes:

- 1 @ NCR-7879-2000-9090 — NCR Scan/Scl 7879 Scanner/Scale Only, Full
- 1 @ NCR-7879-F593 — NCR Scan/Scl ClearShield Glass 7879, Full Ftr
- 1 @ NCR-7879-F620 — NCR Cbl P-USB 12V /4M Blk 7879 Ftr
- 1 @ NCR-7879-F703 — NCR Scan/Scl Side Rails, 7879 Ftr
- 1 @ NCR-7879-F369 — NCR 7879 NCR USB Interface Setup, 7879 Ftr
- 1 @ NCR-7879-F721 — NCR 7879 NTEP Certification Feature US etc.

¶ Includes P-USB cable for signal and power, and default factory USB interface setup. No separate power supply required or included. Select this package only when used with a terminal providing 12V powered USB connector and sufficient amperage. For serial/RS-232 connection and a separate power supply, select instead package NCR-7879-PK-02. ¶ Includes NTEP scale certification and label for USA, Puerto Rico, Honduras and Panama installation. For Canada or Mexico installation, select similar package NCR-7879-PK-01C, which provides instead Canada NTEP scale certification and the required 7825 Scale Display. ¶ Does not include optional imaging module to enable shoppers to scan mobile phone screens or 2-D items. To order with the initial package order, select the Feature Coded option NCR-7879-F151 (installed on the left) or NCR-7879-F152 (right side). For existing deployed 7879 units, select instead the Kit version (NCR-7879-K151, installable either Left or Right). A Remote Imaging Module Kit (with 6-foot cable) is also available, which can be ordered with new or existing deployed 7879 units (see NCR-7879-K352). ¶ Includes side rail feature, enabling scanner/scale mounting in the traditional NCR checkstand cutouts.

See Pricing, Release and Compatibility Notes ▶

▶ Use the Package PIN NCR-7879-PK-01 for ScanSource orders. For Ingram, order instead:

- 1 @ NCR-7879M13 — List Price/MRP: \$3,050 — NCR Scanner/Scale Package, Class 7879 M-BOM, Includes: 1@NCR-7879-2000-9090; 1@NCR-7879-F593; 1@NCR-7879-F620; 1@NCR-7879-F703; 1@NCR-7879-F369; 1@NCR-7879-F721.

▶ Ingram uses different PINs for this item. (See notes above.) In early ship phase: inventory may be limited. Check lead times with Plano Order Entry.

Certified with ISS45 and ScanMaster. This is the preferred selection. ACS Certification in process. ISS45 and ScanMaster compatibility with this Package may require software update or atypical install: see docs. ◀

NCR-7879-PK-02	NCR Scanner/Scale Package, Class 7879 All-Imaging, Full-Sized, ClearShield Glass, Side Rails, Serial Interface Cable, Power Supply, US	\$3,075		\$185
----------------	---	----------------	--	--------------

RS-232 USA w/PWR SUPP

NCR 7879 Scanner/Scale P-USB US package includes:

- 1 @ NCR-7879-2000-9090 — NCR Scan/Scl 7879 Scanner/Scale Only, Full
- 1 @ NCR-7879-F593 — NCR Scan/Scl ClearShield Glass 7879, Full Ftr
- 1 @ NCR-7892-K111 — NCR Scan/Scl Power Supply Kit
- 1 @ NCR-7879-F512 — NCR Cbl RS-232 Scanner/Scale 4M Blk, 7879 Ftr
- 1 @ NCR-7879-F703 — NCR Scan/Scl Side Rails, 7879 Ftr
- 1 @ NCR-7879-F721 — NCR 7879 NTEP Certification Feature US etc.

¶ Includes non-powered serial/RS-232 interface cable and separate power supply, with default factory serial interface setup. For powered USB (P-USB) connection, select instead package NCR-7879-PK-01. ¶ Includes NTEP scale certification and label for USA, Puerto Rico, Honduras and Panama installation. For Canada or Mexico installation, select similar package NCR-7879-PK-01C, which provides instead Canada NTEP scale certification and the required 7825 Scale Display. ¶ Includes side rail feature, enabling scanner/scale mounting in the traditional NCR checkstand cutouts.

See Pricing, Release and Compatibility Notes ▶

▶ Use the Package PIN NCR-7879-PK-02 for ScanSource orders. For Ingram, order instead:

- 1 @ NCR-7879M63 — List Price/MRP: \$3,040 — NCR Scanner/Scale Package, Class 7879 M-BOM, Includes: 1@NCR-7879-2000-9090; 1@NCR-7879-F593; 1@NCR-7879-F512; 1@NCR-7879-F703; 1@NCR-7879-F721.

- 1 @ NCR-7892-K111 — List Price/MRP: \$35 — NCR Scanner/Scale, Power Supply, with US Power Cable, Kit.

▲▲ See Configuration Note for the first PIN in this section for additional configuration information.▲▲

▶ Ingram uses different PINs for this item. (See notes above.) In early ship phase: inventory may be limited. Check lead times with Plano Order Entry. Not supported but there are no known ISS45 or ScanMaster problems with this Package. ISS45 and ScanMaster compatibility with this Package may require software update or atypical install: see docs. There are no plans to Certify this item with those POS applications. USB/OPOS certified and supported only with ISS45 and ScanMaster. Check with NCR for ACS Certification status. ◀

RealScan79 Required Selections

RealScan79 Required Selections: Top Plates

PIN	Description	List Price	Install Price	Maint Price
NCR-7879-F593	NCR Scanner/Scale, Top Plate with ClearShield Glass for 7879, Full-Sized, Feature	\$200		
FULL-SIZED CLEARSHLD	Model 7879 20-inch/50.8cm (full-sized) top plate with new ClearShield glass. Required for (and fits only) NCR-7879-1000-9090 and NCR-7879-2000-9090 full/sized scanner or scanner/scales. Not supplied with purchase of base 7879 unit (NCR-7879-2000-9090 or NCR-7879-1000-9090). ¶-ClearShield is a new clear version of the high performance Everscan glass, and carries a Lifetime Warranty against scratching in the food & drug environment. Sapphire glass is not yet available for the 7879, but is only now recommended for hardware/home improvement retailers, since items passing across the scanner can be unusually abrasive.			
NCR-7879-F598	NCR Scanner/Scale, Top Plate with ClearShield Glass for 7879, Mid-Sized, Feature	\$200		
MID-SIZED CLEARSHLD	Model 7879 13.9-inch/35.3 cm (mid-sized) top plate with new ClearShield glass. Required for the NCR-7879-4000-9090 and NCR-7879-5000-9090 mid-sized scanner. Not supplied with purchase of base 7879 unit (NCR-7879-3000-9090 or NCR-7879-4000-9090). ¶-This NCR-7879-F598 top plate version is also required whenever a third-party scale (such as Avery, Bizerba or Mettler-Toledo) is added to the NCR-7879-3000-9090 compact scanner: when a third-party scale is added to the compact version 7879, this mid-size top plate (NCR-7879-F598) is required. ▲▲ See Configuration Note for the first PIN in this section for additional configuration information.▲▲			
NCR-7879-F599	NCR Scanner/Scale, Top Plate with ClearShield Glass for 7879, Compact, Feature	\$200		
COMPACT CLEARSHLD	Model 7879 13.9-inch/35.3 cm (mid-sized) top plate with new ClearShield glass. Required for (and fits only) NCR-7879-3000-9090 compact scanner. Not supplied with purchase of base 7879 unit (NCR-7879-3000-9090). ¶-Required for all NCR RealScan79 (7879) Compact configurations that are NOT using a third-party scale (in which case use the MID-SIZED top plate (NCR-7879-F598)). Do NOT order this top plate when adding a third-party scale (such as Avery, Bizerba or Mettler-Toledo) to the NCR-7879-3000-9090 compact scanner: when a third-party scale is added to a compact 7879, instead order the mid-size top plate (NCR-7879-F598). ▲▲ See Configuration Note for the first PIN in this section for additional configuration information.▲▲			

RealScan79 Required Selections: Certifications

PIN	Description	List Price	Install Price	Maint Price
NCR-7879-F721	NCR Scanner/Scale, Certification for 7879, 30.00 lb., NTEP USA /Puerto Rico /Honduras /Panama, Feature	\$0		
USA NTEP CERT	Provides 30.00 lbs calibration and regulatory compliance certification label for the 7879 scale in the US, Panama, Puerto Rico and Honduras.			
NCR-7879-F754	NCR Scanner/Scale, Certification for 7879, 15.00 kg., NTEP Canada /Mexico, Feature	\$0		
CANADA NTEP CERT	Provides 15.00 Kg calibration and NTEP regulatory compliance certification label for the 7879 scale in Canada and Mexico. Note! This item does NOT include the special scale timing setting for use in Quebec.			

RealScan79 Scanner/Scale Options: Interface Setup

PIN	Description	List Price	Install Price	Maint Price
NCR-7879-F369	NCR Scanner/Scale, Interface Setup, NCR USB, for 7879, Feature	\$0		
NCR USB SETUP	The 7879 scale is pre-configured for RS-232/serial communication with the host terminal. Selecting this Feature with the initial purchase will factory-configure the default setting to the NCR USB interface instead. Configuration to USB and other interfaces can be performed in the field via barcode programming.	DL scanning not supported with this interface setup.		
NCR-7879-F368	NCR Scanner/Scale, Interface Setup, IBM USB, for 7879, Feature	\$0		
IBM USB SETUP	The 7879 scale is pre-configured for RS-232/serial communication with the host terminal. Selecting this Feature with the initial purchase will factory-configure the default setting to the IBM version of the USB interface instead. Configuration to USB and other interfaces can be performed in the field via barcode programming.	There are no plans to Certify this Feature with ACS: ACS support not available. Not recommended. See installation documentation.		
NCR-7879-F359	NCR Scanner/Scale, Interface Setup, IBM 46xx, for 7879, Feature	\$0		
IBM 46xx SETUP	The 7879 scale is pre-configured for RS-232/serial communication with the host terminal. Selecting this Feature with the initial purchase will factory-configure the default setting to the IBM 468x / 469x interface instead. Configuration to USB and other interfaces can be performed in the field via barcode programming.	No system facilities to support this Feature in ISS45, ScanMaster or ACS.		

RealScan79 Scanner/Scale Options: Imaging Modules

PIN	Description	List Price	Install Price	Maint Price
NCR-7878-K352	— NCR Scanner/Scale, Remote Imaging Shopper Scan Module, for 7878 or 7879, Bracket, 6-Foot Cable, White Illumination, Kit	\$575		\$85
REMOTE IMAGER	<p>Remote Customer Imaging scanner for shopper scanning of mobile phone or 2-D barcodes, drivers licenses, ID cards, coupons etc. This imager model provides white illumination (the similar but discontinued NCR-7878-K350 model provided red illumination). ¶-This Remote Imager is a small module providing flexible checkstand integration and mounting. A standard basic mounting bracket is included, but some users may choose to create their own brackets for customized checkstand mounting. Includes 6-foot (1.8 meter) cable for connection to the Class 7878 or Class 7879 Scanner/Scales. ¶-Scanner programming is required for proper operation. Specific bar code symbologies can be individually enabled or disabled depending on the store's requirements. ¶-This item is a Kit, and may be ordered for RealScan 7878 and 7879 scanner/scales already delivered or deployed. Since there is no Feature Code version of this item, this Kit item should be used to include the Remote Imager with new 7878 and 7879 orders. ¶-Replaces withdrawn product NCR-7878-K350</p>			<p>In early ship phase: inventory may be limited. Check lead times with Plano Order Entry. Certified with ISS45 and ScanMaster. ACS Certification in process. ISS45 and ScanMaster compatibility with this Kit may require software update or atypical install: see docs. For 7878 and 7879 scanners or scanner/scales only. Not compatible with 7874. DL scanning requires IBM USB setting.</p>
NCR-7879-F151	— NCR Scanner/Scale, Integrated Imaging Scan Module, Shopper-Facing for 7879, Left, Feature	\$425		\$45
LEFT SIDE SHOPPER IMGR	<p>Integrated shopper-facing Imager Module adds 2-D reading capability (for mobile phones, coupons etc.) to model 7879 Scanner/Scales. The module is installed on the rear of the scanner/scale and can be located either on the Left or Right (as faced by the shopper). Some checkstands will not accommodate this integrated solution without modification; before ordering, please ensure that display poles and checkstand features do not interfere. ¶-This feature will factory-install the module on the LEFT side of the rear of the 7879 Scanner/Scale (as faced by the shopper). For RIGHT-side placement, order instead NCR-7879-F152. ¶-This Feature-Coded product may be ordered only with the initial scanner/scale purchase. For existing deployed 7879 Scanner/Scales, select the field retrofit Kit NCR-7879-K151. ¶-Scanner programming is required for proper operation. Specific bar codes can be individually enabled or disabled depending on the store's requirement.</p>			<p>ACS Certification in process. A similar product was Certified for ISS45 and ScanMaster: this product supported by proxy. ISS45 and ScanMaster compatibility with this Feature may require software update or atypical install: see docs. DL scanning requires IBM USB. See release docs for scope limitations.</p>
NCR-7879-F152	— NCR Scanner/Scale, Integrated Imaging Scan Module, Shopper-Facing for 7879, Right, Feature	\$425		\$45
RIGHT SIDE SHOPPER IMGR	<p>Integrated shopper-facing Imager Module adds 2-D reading capability (for mobile phones, coupons etc.) to model 7879 Scanner/Scales. The module is installed on the rear of the scanner/scale and can be located either on the Left or Right (as faced by the shopper). Some checkstands will not accommodate this integrated solution without modification; before ordering, please ensure that display poles and checkstand features do not interfere. ¶-This feature will factory-install the module on the RIGHT side of the rear of the 7879 Scanner/Scale (as faced by the shopper). For LEFT-side placement, order instead NCR-7879-F152. ¶-This Feature-Coded product may be ordered only with the initial scanner/scale purchase. For existing deployed 7879 Scanner/Scales, select the field retrofit Kit NCR-7879-K151. ¶-Scanner programming is required for proper operation. Specific bar codes can be individually enabled or disabled depending on the store's requirement.</p>			<p>ACS Certification in process. A similar product was Certified for ISS45 and ScanMaster: this product supported by proxy. ISS45 and ScanMaster compatibility with this Feature may require software update or atypical install: see docs. DL scanning requires IBM USB. See release docs for scope limitations.</p>
NCR-7879-K151	— NCR Scanner/Scale, Integrated Imaging Scan Module, Shopper-Facing for 7879, Left/Right, Kit	\$450		\$45
LFT+RGT KIT SHOPPR IMGR	<p>Integrated shopper-facing Imager Module adds 2-D reading capability (for mobile phones, coupons etc.) to model 7879 Scanner/Scales. The module is installed on the rear of the 7879, and can be located either on the Left or Right (as faced by the shopper). Some checkstands will not accommodate this integrated solution without modification; before ordering, please ensure that display poles and checkstand features do not interfere. ¶-This Kit is designed for field upgrades, and includes all required parts to configure an existing 7879 scanner/scale, including Left or Right-side placement as preferred. ¶-Scanner programming is required for proper operation. Specific bar codes can be individually enabled or disabled depending on the store's requirement. ¶-This Kit may be ordered to upgrade existing/deployed 7879 scanner/scales. To order with initial 7879 scanner/scale purchases, select instead Feature Code NCR-7879-F151 or NCR-7879-F152 (for LEFT or RIGHT-side placement respectively) for factory installation prior to shipment.</p>			<p>Certified with ISS45 and ScanMaster. ACS Certification in process. ISS45 and ScanMaster compatibility with this Kit may require software update or atypical install: see docs. DL scanning requires IBM USB. See release docs for scope limitations.</p>

RealScan79 Scanner/Scale Options

RealScan79 Scanner/Scale Options: Mounting Hardware

PIN	Description	List Price	Install Price	Maint Price
NCR-7879-F703	— NCR Scanner/Scale, Side Rails for 7879, Feature	\$10		
SIDE RAILS FEATURE	Side rail kit increases scanner/scale width from 11.5 inches (29.2 cm) to 12 inches (30.5 cm). Includes metal rails, one on each side of the scanner at checkstand level, which improve spill drainage and confirm to the standard legacy NCR scale width. For the RealScan 79, the Side Rails match the mounting dimensions of legacy Full-Sized NCR scanners and more recent models (such as the models 7875, 7876, 7878 etc.) when they were fitted with the Side Rail option — therefore fitting the existing mounting areas. Kit contains two (2) rails and four (4) screws. ¶-Side Rails are available only for Full-Size RealScan 79 scanner/scales. Do not order Side Rails with Mid-Size or Compact versions of the RealScan 79. It is normally recommended to include Side Rails when the Full-Sized RealScan 79 configuration includes the scale. Note: Datalogic Magellan checkstand holes are narrower so the RealScan 79 with Side Rails will not fit. ¶-This is a Feature-Coded product, orderable only with new full-sized Model 7879 scanner/scales (NCR-7879-1000-9090 or NCR-7879-2000-9090). For existing deployed 7878 or 7879 scanner/scales, order instead the kit version of this item (NCR-7878-K732).			
NCR-7878-K732	— NCR Scanner/Scale, Side Rails for 7878 Release II/7879, Kit	\$25		
SIDE RAILS KIT	The Side rail kit increases scanner/scale width from 11.5 inches (29.2 cm) to 12 inches (30.5 cm). Includes metal rails, one on each side of the scanner at checkstand level, which improve spill drainage and confirm to the standard legacy NCR scale width. When used with the RealScan 79, the Side Rails match the mounting dimensions of legacy Full-Sized NCR scanners and more recent models (such as the models 7875, 7876, 7878 etc.) when they were fitted with the Side Rail option — therefore fitting the existing mounting areas. Kit contains two (2) rails and four (4) screws. ¶-Side Rails are available only for Full-Size RealScan 79 scanner/scales. Do not order Side Rails with Mid-Size or Compact versions of the RealScan 79. It is normally recommended to include Side Rails when a (Full-Sized) RealScan 79 configuration includes the scale. Note: Datalogic Magellan checkstand holes are narrower so the RealScan 79 with Side Rails will not fit. ¶-Select this kit when ordering for existing deployed 7878 or 7879 scanner/scales. For new 7878 orders, select instead the 7878 Feature-Coded version (NCR-7878-F703), and for new 7879 orders, select instead the 7879 Feature-Coded version (NCR-7879-F703).			
NCR-7879-K999	— NCR Scanner/Scale, Adapter Bracket for NCR SSCO v4, 7879, Kit	\$40		
SSCO v4 BRCKT - KIT	Adapter bracket required for NCR Model 7879 scanner/scales when used with NCR Self-Checkout v4 (7343, 7346). ¶-This is the Kit version to order for existing deployed 7879 scanner/scales, and will be shipped one-per-box. With new 7879 scanner/scales, order instead the Feature-Coded version (NCR-7879-F999), which will be packed together with the Model 7879 when shipped.			
NCR-7879-F999	— NCR Scanner/Scale, Adapter Bracket for NCR SSCO v4, 7879, Feature	\$40		
SSCO v4 BRCKT - FTR	Adapter bracket required for NCR Model 7879 scanner/scales when used with NCR Self-Checkout v4 (7343, 7346). ¶-This is the Feature-Coded version, and may be ordered only with new Model 7879 scanner/scale orders. This item will be packed together with the 7879 in the shipping carton. For use with existing deployed 7879 scanner/scales, order instead the Kit version NCR-7879-K999.			

Your standard NCR POS hardware discounts apply to all items in the above section that are not otherwise marked. These discounts are specified in your NCR Interact Solution Provider Agreement.

RealScan79 Scanner/Scale Cables

RealScan79 Scanner/Scale Cables: Most Common Selections

PIN	Description	List Price	Install Price	Maint Price
	NCR-7879-F620 — NCR Cable, Scanner/Scale, P-USB Plus Power, 12V, 4M, Black, 7879 Feature	\$40		
P-USB 4M	12V P-USB cable, 4 meters, provides signal and power from a host POS terminal to the 7879 scanner/scale. ¶ Connects to a latching 12V USB-Plus-Power type connector on NCR or other POS terminal. Note: If used to power the scanner from the host terminal, the terminal power supply must be large enough to supply adequate power to both scanner and all other terminal-powered devices. Customer consultation and testing is required before proposing. This cable may also be used with an external power supply, in which case the cable is used for communications only. ¶-This is a Feature-Coded item available only with new purchases of the Model 7879 scanner/scale. For existing/deployed 7879 scanner/scales or other purposes, order instead NCR-1432-C156-0040.			Certified with ISS45 and ScanMaster. This is the preferred selection. ACS Certification in process. This will be the preferred selection.
	NCR-1432-C156-0040 — NCR Cable, Universal, P-USB Plus-Power, Standard, 12V, 4M, Black	\$65		
P-USB 4M	12V P-USB cable, 4M, for use with P-USB displays, 7879, 7878 and 7874 scanner/scales and other devices requiring 12V P-USB. ¶-Provides 4-meter (157.48") 12V USB power cable with latching connectors on host and device end with strain relief. Requires 12V USB port on host terminal. ¶-This is the component version of this item, and it can be ordered for existing deployed devices. For new orders, select instead the Feature Coded version where offered, for example NCR-7879-F620 for the Model 7879 scanner/scale, which may have a lower cost.			Certified with ISS45 and ScanMaster. This is the preferred selection. ACS Certification in process. This will be the preferred selection.
	NCR-7879-F512 — NCR Cable, Scanner/Scale, RS-232 Non-Powered to POS Terminal DB9 Port, Shell, 4-meter, Black, for 7879, Feature	\$30		
RS-232 4M NON-PWR	Provides DB9F shell connector for host terminal. Use with 7879, 7878, 7874 and 7884 scanner/scales for serial/RS-232 connection. ¶-This cable does not transmit power. A power supply with AC mains cable (NCR-7892-K111, available separately) is required for device when using this cable. ¶-This is Feature-Coded version of this product and may only be ordered with the 7879 scanner/scale's original purchase. For existing/deployed scanner/scales, select instead NCR-1416-C019-0040.			Not supported but there are no known ISS45 or ScanMaster problems with this Feature. There are no plans to Certify this item with those POS applications. ISS45 and ScanMaster are Certified and supported with USB interfaces only.
	NCR-1416-C019-0040 — NCR Cable, Scanner/Scale, RS-232 Non-Powered to POS Terminal DB9 Port, Shell, 4M, Black	\$40		
RS-232 4M NON-PWR	Provides DB9F shell connector for host terminal. Use with 7879, 7878, 7874 and 7884 scanner/scales for serial/RS-232 connection. ¶-This cable does not transmit power. A power supply with AC mains cable (NCR-7892-K111, available separately) is required for device when using this cable. ¶-This is a component/Kit version of this product and can be ordered for existing/deployed scanner/scales. When purchasing new scanner/scales, consider instead the Feature-Coded version of this product (such as NCR-7879-F512 for the 7879 scanner/scale) which may have a lower cost.			Not supported but there are no known ISS45 or ScanMaster problems with this item. There are no plans to Certify this item with those POS applications. ISS45 and ScanMaster are Certified and supported with USB interfaces only.
	NCR-1432-C158-0040 — NCR Cable, Scanner/Scale, USB-A Non-Powered, for 7878/7879, 4M, Black	\$70		
USB-A 4M	Non-powered 4-meter USB cable connects to standard Type A USB connector on the host POS terminal. ¶-Note! The scanner end of this cable is not compatible with any other NCR scanners except the 7878 and 7879 classes. ¶-Use of this cable requires the external power supply (NCR-7892-K111) for the scanner/scale, available separately.			ACS Certification in process. A similar product was Certified for ISS45 and ScanMaster: this product supported by proxy.

RealScan79 Scanner/Scale Cables: Not-So-Common Selections

PIN	Description	List Price	Install Price	Maint Price
NCR-1432-C219-0040	— NCR Cable, Scanner/Scale, RS-232 Powered to NCR POS Terminal DB9 Port, 4M, Black	\$70		
RS-232 4M w/PWR NCR	Powered 4-meter RS-232 cable with FEMALE 9-pin D-Shell host connector for NCR POS terminals (recent Model 7458 / 7459 e-boxes). ¶-The cable is split at the scanner end to provide signal and power to separate connectors. Usable for scanner or single-cable scanner/scale communications with NCR terminals only: do NOT use as the scale cable within a dual-cable scanner/scale installation. ¶-Use of this cable requires the NCR host terminal to provide power to the scanner/scale via the host's serial I/O connector. Testing is required to ensure sufficient power for proper operation. If host power from the serial port is insufficient, select instead the non-powered version of this cable (NCR-1416-C019-0040 / NCR-7878-F512 / NCR-7879-F512) with an external power supply (NCR-7892-K111), all available separately.			Not supported but there are no known ISS45 or ScanMaster problems with this item. There are no plans to Certify this item with those POS applications. ISS45 and ScanMaster are Certified and supported with USB interfaces only.
NCR-7879-F501	— NCR Cable, Scanner/Scale, Port 9B/9E Non-Powered to IBM POS Terminal, 4M, Black, 7879 Feature	\$30		
IBM N/P 4M PORT 9B/9E	Non-powered RS-485 4-meter cable for connection to IBM POS terminals (4682 /4683 /4684/ 4693 /4694). ¶- Connects to Port 9B on IBM 4682 and 4693 terminals, or Port 9E on IBM 4694 and SurePOS 700 series terminals. ¶-Use of this cable requires the external power supply (NCR-7892-K111) for the scanner/scale, available separately. ¶-This is the Feature-Coded version of this cable and may be used only with new 7879 scanner/scale orders. For existing deployed 7879 scanner scales, order instead the component/kit version (NCR-1416-C070-0040).			There are no plans to Certify this Feature with ISS45, ScanMaster or ACS. No system facilities to support this Feature.
NCR-1416-C070-0040	— NCR Cable, Scanner/Scale, Port 9B/9E Non-Powered to IBM POS Terminal, 4M, Black	\$40		
IBM N/P 4M PORT 9B/9E	Non-powered RS-485 4-meter cable for connection to IBM POS terminals (4682 /4683 /4684/ 4693 /4694). ¶- Connects to Port 9B on IBM 4682 and 4693 terminals, or Port 9E on IBM 4694 and SurePOS 700 series terminals. ¶-Use of this cable requires the external power supply (NCR-7892-K111) for the scanner/scale, available separately. ¶-This is the component/kit version of this cable. For new 7879 scanner/scales, order instead the Feature Coded version (NCR-7879-F501, or NCR-7878-F501 for Model 7878 scanner/scales) at a lower cost.			There are no plans to Certify this item with ISS45, ScanMaster or ACS. No system facilities to support this item.
NCR-1432-C217-0040	— NCR Cable, Scanner/Scale, Port 9B/9E Powered to IBM POS Terminal, 4M, Black	\$70		
IBM PWR 4M PORT 9B/9E	Non-powered RS-485 4-meter cable for connection to IBM POS terminals (4682 /4683 /4684/ 4693 /4694). ¶- Connects to Port 9B on IBM 4682 and 4693 terminals, or Port 9E on IBM 4694 and SurePOS 700 series terminals. The cable is split at the scanner end to provide signal and power to separate connectors. ¶-Use of this cable requires the IBM host terminal to provide power to the scanner/scale via the host's Port 9x I/O connector. Testing is required to ensure sufficient power for proper operation. If host power is insufficient, select instead the non-powered version of this cable (NCR-1416-C070-0040 / NCR-7878-F501 / NCR-7879-F501) with an external power supply (NCR-7892-K111), all available separately.			There are no plans to Certify this item with ISS45, ScanMaster or ACS. No system facilities to support this item.
NCR-1416-C263-0040	— NCR Cable, Scanner/Scale, RS-232 Non-Powered to POS Terminal DB9 Port (Male, Wincor), Shell, 4M, Black	\$65		
RS-232 4M N/P WINCOR	Non-powered 4-meter RS-232 cable with MALE 9-pin D-Shell host connector for Wincor POS terminal. Similar to NCR-416-C019-0040 cable, but provides a male RS-232 D-Shell connector instead of a female connector. ¶- Usable for scanner or single-cable scanner/scale communications with Wincor terminals only: do NOT use as the scale cable within a dual-cable scanner/scale installation. ¶-Requires external power supply (NCR-7892-K111), available separately.			There are no plans to Certify this item with ISS45, ScanMaster or ACS. No system facilities to support this item.
NCR-1432-C218-0040	— NCR Cable, Scanner/Scale, RS-232 Powered to POS Terminal DB9 Port (Male, Wincor), Shell, 4M, Black	\$70		
RS-232 4M w/ PWR WINCOR	Powered 4-meter RS-232 cable with MALE 9-pin D-Shell host connector for Wincor POS terminal. ¶-The cable is split at the scanner end to provide signal and power to separate connectors. Usable for scanner or single-cable scanner/scale communications with Wincor terminals only: do NOT use as the scale cable within a dual-cable scanner/scale installation. ¶-Use of this cable requires the Wincor host terminal to provide power to the scanner/scale via the host's serial I/O connector. Testing is required to ensure sufficient power for proper operation. If host power from the serial port is insufficient, select instead the non-powered version of this cable (NCR-1416-C263-0040) with an external power supply (NCR-7892-K111), both available separately.			There are no plans to Certify this item with ISS45, ScanMaster or ACS. No system facilities to support this item.

RealScan79 Scanner/Scale Cables: Special Purpose

PIN	Description	List Price	Install Price	Maint Price
NCR-1432-C100-0040	— NCR Cable, Scanner/Scale, RS-232 Non-Powered Scale to POS Terminal, 4M, Black	\$50		
RS-232 4M SCALE ONLY	<p>This scale cable provides the scale signal interface when a dual-cable connection is used with NCR scanner/scales. A separate interface cable for the scanner is required. ¶ Power is not provided over this cable. Power must be provided by other means.</p> <p>► Not supported but there are no known ISS45 or ScanMaster problems with this item. There are no plans to Certify this item with ISS45, ScanMaster or ACS: support not available. ◀</p>		◀◀ See Compatibility Notes at left	

NCR-1432-C316-0040	— NCR Cable, Scanner/Scale, Display Extension Cable, for Model 7825 Scale Displays, 4M	\$35		
DISPLAY 4M EXTENSION	Extension cable, 4 meters, to extend cabling for Model 7825 single or dual scale displays to a total of 8 meters.			

Your standard NCR POS hardware discounts apply to all items in the above section that are not otherwise marked. These discounts are specified in your NCR Interact Solution Provider Agreement.

RealScan79 Scanner/Scale Options

RealScan79 Scanner/Scale Options: Power - Supplies

PIN	Description	List Price	Install Price	Maint Price
NCR-7892-K111	— NCR Scanner/Scale, Power Supply, with US Power Cable, Kit	\$35		
PWR SUPP KIT	Provides power for 7879, 7878, 7874, or 7883/7893/7884 scanner/scales when used with Serial/RS-232 or non-powered USB interface connection. Not required if using P-USB (Power-Plus) cabling. Universal Input/+12VDC Output. ¶-This is the Kit version of this power supply and AC mains power cord. If purchasing a new scanner/scale, order instead the Feature Code version if available at lower cost. ¶-Similar to NCR-7892-K129, which provides the same power supply unit but with a twist-locking AC mains (US) power cord for additional connection security. Available at the same price if desired.			
NCR-7892-K129	— NCR Scanner/Scale, Power Supply, Universal Input/+12VDC Output, with AC Power Mains Cord, Twist-Lock, Kit	\$35		
P/S with TWIST-LOCK	Provides power for 7879, 7878, 7874, or 7883/7893/7884 scanner/scales when used with Serial/RS-232 or non-powered USB interface connection. Not required if using P-USB (Power-Plus) cabling. ¶-Similar to NCR-7892-K111, which provides the same power supply unit but which uses a standard (not a twist-locking) US AC mains power cord. Available at the same price if desired.			

RealScan79 Scanner/Scale Options: Power - Cables

PIN	Description	List Price	Install Price	Maint Price
NCR-7879-F620	— NCR Cable, Scanner/Scale, P-USB Plus Power, 12V, 4M, Black, 7879 Feature	\$40		
P-USB 4M	12V P-USB cable, 4 meters, provides signal and power from a host POS terminal to the 7879 scanner/scale. ¶- Connects to a latching 12V USB-Plus-Power type connector on NCR or other POS terminal. Note: If used to power the scanner from the host terminal, the terminal power supply must be large enough to supply adequate power to both scanner and all other terminal-powered devices. Customer consultation and testing is required before proposing. This cable may also be used with an external power supply, in which case the cable is used for communications only. ¶-This is a Feature-Coded item available only with new purchases of the Model 7879 scanner/scale. For existing/deployed 7879 scanner/scales or other purposes, order instead NCR-1432-C156-0040.			Certified with ISS45 and ScanMaster. This is the preferred selection. ACS Certification in process. This will be the preferred selection.
NCR-1432-C156-0040	— NCR Cable, Universal, P-USB Plus-Power, Standard, 12V, 4M, Black	\$65		
P-USB 4M	12V P-USB cable, 4M, for use with P-USB displays, 7879, 7878 and 7874 scanner/scales and other devices requiring 12V P-USB. ¶-Provides 4-meter (157.48") 12V USB power cable with latching connectors on host and device end with strain relief. Requires 12V USB port on host terminal. ¶-This is the component version of this item, and it can be ordered for existing deployed devices. For new orders, select instead the Feature Coded version where offered, for example NCR-7879-F620 for the Model 7879 scanner/scale, which may have a lower cost.			Certified with ISS45 and ScanMaster. This is the preferred selection. ACS Certification in process. This will be the preferred selection.

RealScan79 Scanner/Scale Tools

RealScan79 Scanner/Scale Tools: Enterprise Version Tool Suite PIN	Description	List Price	Install Price	Maint Price
NCR-G370-2745-0100	NCR Scanner/Scale Software, License, Support Tools for NCR Scanners, Enterprise Version, Windows	\$25,000		
<div style="border: 1px solid black; padding: 2px; display: inline-block;">ENTERPRISE SUPP TOOLS</div>	A fully functional trial version of this product (90-day trial period) is available to NCR Authorized Solution Providers. See the RealScan 79 Solution Provider section of Reference Bulletin 1243 for details regarding this product and access information for the trial version.		Partner Net Price: \$25,000.	

Configuration and Pricing

NCR Demo/Lab Hardware

To enable effective sales campaigns and technical capability, Solution Providers can purchase NCR POS products for at special prices for showroom and lab use. The on-boarding process must be completed or in process. NCR POS hardware or software products for demonstration or lab use are specially priced at 80% off MRP/list price.

For hardware items, each Solution Provider may order up to a quantity of two (2) of any main-line item type for each of their primary sales offices. That is, two RealPOS 60s, two RealPOS 82XRTs, two 7878 scanner/scales, two DynaKey cashier displays etc. (Solution Providers are not offered two of every possible configuration line item – that is, not offered two DynaKeys with touch, two DynaKeys without touch etc.) Software demo licenses are not quantity-limited.

Demo/lab equipment (hardware) may be refreshed annually. After one year from the previous purchase of the same main line, dealers may order new or additional lab or demo hardware items from that main line. Software demo items may not be re-sold.

Solution Provider demonstration and lab hardware and software items are for the partner's internal use only. Demo hardware and software must remain with the Solution Provider and cannot be used for customer labs, customer trial sites etc. Solution Providers requiring NCR products for customer trials use should contact their CAMs and use NCR's Customer Trial offer.

Purchase orders for demonstration equipment should be separate from all other orders. ONLY demo/lab equipment may appear on a demo/lab P.O. and the P.O. must include the Lab/Demo PIN below.

Items not currently offered for sale (items not listed, certified or compatible with Solution Provider POS) are not included under the demo/lab discount offer.

For complete details, see the "NCR POS Demo and Lab Hardware" (Solution Provider Policies and Procedures CO11). The NCR Program Bulletin (1237) also provides this information.

With all Demo orders, use the standard PINs and prices with the 80% discounts to order. Then add the no-charge PIN below, which is required on any Demo/Lab P.O.

NCR Demo/Lab Hardware: Demo/Lab PIN	List Price	Install Price	Maint Price
PIN	Description		
NCR-DEMO-ORDER — NCR Demonstration/Lab Order Designator PIN		\$0	
DEMO PIN	To receive the special lab/demo discount for NCR demo/lab products, add this no-charge PIN to designate your P.O. as an NCR demo/lab order. ¶-All items on the order MUST be demo or lab items - do not mix standard customer orders or Customer Evaluation orders with demo/lab items or orders. ¶-This PIN is no-charge, but all other items on the order are chargeable at the Demo/Lab discount rate. See Policy CO-11 for full details.	No Charge to Partner.	

NCR Customer Evaluation Hardware

To assist NCR Solution Providers to secure major opportunities with NCR hardware and software products, NCR offers POS hardware and software licenses with special terms for Customer Evaluation situations.

To summarize:

- The Solution Provider works with the Channel Account Representative (CAM) to evaluate the opportunity. The CAM will then seek approval from NCR management.

- If approved, the Solution Provider orders the NCR POS hardware or software at standard pricing and discounts. A special PIN is added to designate the order as a Customer Evaluation order.

- The Solution Provider installs the products in the customer's lab or site.

- Payment terms are extended for 60 days, so no payments are due while the trial is underway.

- After 45 days, the Solution Provider informs Retalix if the trial was successful, and the customer will retain the hardware or software. If so, the Solution Provider will pay the original invoice as normal as per a standard hardware purchase.

- If the trial does not result in the customer purchasing the evaluation hardware equipment, the Solution Provider is required to collect the equipment immediately. The Solution Provider retains the equipment and Retalix will issue a credit so that the Solution Provider's discount on the equipment will equal 75% off list price. The Solution Provider may then keep the hardware for internal use or sell the equipment as "used" or "dealer refurbished" to anyone other than the original evaluating customer.

- Software items put on customer evaluation (but not purchased by the customer) may be returned under RMA for a full refund.

The complete details are provided in the Update Bulletin (Aug13CEP.pdf) and Policy CO-12.

With all Customer Evaluation orders, use the standard PINs, prices and discounts to order. Then add the no-charge PIN below, which is required on any Customer Evaluation P.O.

NCR Customer Evaluation Hardware: Customer Evaluation PIN	Description	List Price	Install Price	Maint Price
NCR-EVAL-ORDER— NCR Customer Evaluation Order Designator PIN		\$0		
EVAL PIN	This PIN for use only with Customer Evaluation orders for NCR POS equipment. This PIN must appear on any Customer Evaluation order. ¶-Customer Evaluations must be approved in advance: please discuss with your NCR CAM, who will review and seek management approval. Customer Evaluation orders will not be accepted by NCR Plano Order Entry without management approval. ¶-NCR POS Customer Evaluation orders may include NCR POS items only, and all items on the order will be considered part of the Customer Evaluation. Customer Evaluation orders may not exceed \$20,000 at total list price. ¶-This PIN is no-charge, but payment is required for the products themselves. See Policy CO-12 (Customer Evaluations of NCR POS Hardware) for the policy details and requirements.	No Charge to Partner.
