## **New SlimScan 1000 Scanner for RETAILpartner Solution/Supermarket**

MB-RPSSU-914  
October 28, 1993

ICL is pleased to announce the ***SlimScan 1000***, a fixed mode presentation-style scanner designed for use in medium throughput environments where work space is at a premium. SlimScan is a significant improvement over MS-260 or Omniscan type products.

Retailer will often need a compact, reliable and low-cost scanner for use in peripheral lanes or specialty checkout areas. Also, Liquor, Convenience, and other cash wrap checkouts where transaction counts span 1-10 items are natural environments for SlimScan. Handheld scanners have often been used, but hands-free use is generally preferred. Here, SlimScan fills the bill perfectly, also providing increased reliability over handheld devices.

Some of SlimScan 1000's benefits include:

- Greater reliability than Hand Held laser scanners,
- Advantages of a fixed scanner, but with very high performance/price ratio,
- Competitive with Spectra-Physics Sp\* Ace, NCR 7890, etc. devices,
- Industry-leading ***two year warrantee***,
- Space saving with little or no footprint within small work areas,
- Ergonomically designed for hands-free scanning,
- Clerk can use "heads-up" to maintain friendly shopper contact,
- All cables are recessed and modular for easy installation,
- Reads UPC, EAN (and UPC/EAN with add-ons), Interleaf 2-of-5, Code 39 and Code 128,
- Soft power-down feature further prolongs scanner life,
- Adjustable volume to match environmental needs,
- Attractive one-piece enclosure.

When selling SlimScan, you can strategically position the product as a lower cost alternative to larger, in-counter mounted fixed scanners on the one hand, then as a more reliable and hands-free solution than visible Laser Diode handheld scanners.

SlimScan has been selected and installed by many major companies, including Chevron, Diamond Shamrock, BP America, Harvard University, Guess Jeans, Barnes & Noble Books, National Record Marts, Bealls, and Atlantic Wholesale.
