

Update Bulletin

PocketOffice Special Free Offer with ISS45 and ScanMaster Express Systems

August 2, 2005

To celebrate the release of PocketOffice support in the new ScanMaster 2.2.0, StoreNext is pleased to make a special offer for customers of ScanMaster Express and ISS45 Express systems. For all Express systems shipped between July 1 and December 31, 2005, the software license for the first unit of PocketOffice software will be provided at no charge.

This offer adds even more competitive value to ScanMaster V2 and ISS45 Express against competition that cannot offer “remotely” similar features on their systems. Plus, of course, it gives small-store ScanMaster and ISS45 users the opportunity to use this outstanding product that will cut costs and improve the independent’s shopper service. PocketOffice application modules include:

- Shelf Audit
- Item Maintenance
- Q-Buster™¹
- Remote Cashier Monitoring
- Grocery Dashboard™
- Remote Manager Authorization¹

The PocketOffice Roving Master option is also available, allowing a PocketOffice hand-held unit to be used in any of the grocer’s stores.

The Remote Manager Authorization with ISS45 has been recently enhanced with both V8 and V7 to provide “traffic light” signals to the cashier — red when the terminal sends the authorization request, yellow when the manager has seen the request and green when the manager has approved the request. The system integration of this feedback makes cashiering even easier with PocketOffice and Remote Manager Authorization.

There are several brochures and selling sheets available for PocketOffice. Make sure you see the PocketOffice Brochure with its clever set of iPad-shaped application description inserts with quick-turnaround available from The StoreNext Store. There are PDFs of both the brochure folder and the inserts on the StoreNext Dealer Support Web site on the [Brochures Page](#). That’s also where you’ll find a set of three Selling Sheets for PocketOffice, suitable for local printing and distribution.

To get the free PocketOffice first unit software (you’ll need to get the hardware of course — see the [PocketOffice Bulletin](#) for PINs and pricing) order the following:

¹ Available with ScanMaster V2 on 2006 RoadMap.

PIN	Item	Price	Inst	Maint
45PO-01S	PocketOffice Software Only, First Unit in store	\$ 1,500	\$ 100	\$ 225

If ISS45 Express or ScanMaster Express (V2 only!) appears on the same order and this item is ordered, the PocketOffice license will be added to your order at no charge and the software key will be delivered with the license for the first unit enabled.

Please note the following fine print:

- If the above PIN is not ordered with the ISS45 of ScanMaster Express system, the no-charge software license will not be provided. It *cannot* be added at a later time.
- If additional second/third etc. PocketOffice units are desired for the store, they need to be added to the order under standard terms and conditions — the PINs are in the PocketOffice Reference Bulletin.
- PocketOffice is compatible with ScanMaster V2 only — not V1. ScanMaster Express systems must be for V2, signaled by the inclusion of the Pervasive database license on the order. If the Pervasive licenses are not ordered, the system will be assumed to be a ScanMaster Express to be installed with V1, and the license for the PocketOffice software not be provided.
- If the above PIN is *not* ordered with the Express system, it cannot be added at a later time at no charge. If the store is going to get the free PocketOffice first unit license, this PIN must be on the original Express order.
- This no-charge first-unit PocketOffice is for the software only. Hardware is not included. Hardware does not need to be purchased with the order to get the software license however.
- Any Express systems shipped from July 1 through December 31 of 2005 are eligible for the offer. Do not order in December for January delivery and expect the order to include the free PocketOffice first-unit software license: it will not.
- Any Express systems already delivered since July 1 of this year are eligible to have their software license updated to include this PocketOffice offer. Just order the above PIN for any such Express stores — ISS45 or ScanMaster — *before the end of August 2005* — and the store's software license and software key will be updated. The window to upgrade systems shipped in July at no charge will close at the end of August, so if you have any such systems, do it now.
- This offer is for ScanMaster and ISS45 Express systems only, including special Express systems such as the Nash Finch Express product. It does not apply to Espresso or standard ISS45 systems.

To Your Success,

Anthony van Seventer
