

It pays to connect with StoreNext.

If you're an independent grocer looking to cut your electronic payments costs and get your stores PCI compliant, take a close look at StoreNext *Connected Payments*™. Our breakthrough technology not only connects you to the lowest-cost processors, it also disconnects you from up-front software charges and much of the hassle and expense of meeting PCI.

PLUG-AND-PLAY FSA New federal mandates require special "IIAS" software, or your shoppers' FSA and other health-care card payments will be rejected. Grocers must also retain records of benefit card transactions for five years. But don't worry. StoreNext has you covered. We're offering secure, fully automated, hosted storage and reporting for a low monthly subscription. Our new ISS45 and ScanMaster software updates with FSA support keep your payments – and your customers – moving smoothly. Connect with your StoreNext dealer today.
