

ISS45 Mobile Computing Update

December 5, 2001

There have been some new releases in Fujitsu's Mobile Computing lineup.

- The QuickScan 6000 scanner has been successfully integrated with the TeamPad to enable the user to perform in-the-aisle data entry via scanning.
- The *ISS45 Mobile Computing Installation and Configuration Guide* has been updated to include step-by-step configuration information for the QuickScan scanner. You can get Rev. 3 of the updated manual from the ISS45 Web Site at <http://www.iclretail.com/support/iss45/FrameIss45Manuals.html>.
- A new version of the TeamPad 7500 – the 7510 – has been released. The 7510 features an ultra-high performance NEC RISC V4121 168MHz processor (the 7500 uses a 85MHz processor) and a larger 11.2" display specially designed for both indoor and outdoor viewing. An updated Data Sheet for both TeamPad versions is on the Brochures page of the ISS45 Web Site.
- When attaching a scanner or printer to the TeamPad, a Comlan license is required for both the server and the client. Pricing for these have been dramatically reduced. In fact, if you purchase one of the ISS45 Mobile Computing packages, they are provided at no additional charge – these packages have been updated to include the Comlan Server and Client license.
- If you are purchasing outside the packages, the Comlan Server license has been reduced to \$120 (from \$300) and the client licenses are bundled with new TeamPad PINs that include that license.
- To support the Mobile Computing system, the ISS45 Web Site has been enhanced to provide the additional necessary drivers for the Scanner or Printer attachments for TeamPad. Check the Software Support section.
- Other prices have also been reduced.
- The ISS45 Mobile Computing Marketing Bulletin (MB 1165) has been enhanced with all the new products, peripherals and pricing.

To Your Success,

Tony
