TeamPoS 3600 Integration Kit / Stacking Tray

May 2, 2011

Issue 2

An Integration Kit/stacking tray is available for the TeamPoS 3600 terminal family that enables peripherals to be stacked and locked down on the TeamPoS 3600 for an integrated configuration.

The peripheral set is the same as those that lock to the TeamPoS 3000XL and TeamPoS 3000 XL2 – that is, the DT50 printer, D22 and D25 display. The same locking brackets are used as with the TeamPoS 3000 XL and XL2. The stacking tray is available in black only.

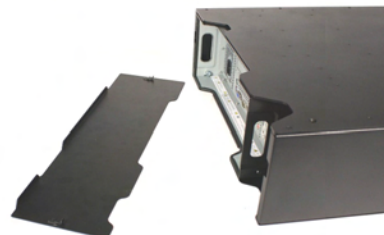

Although it's called a "tray," the device is more like an enclosure. This device wraps around the TeamPoS 3600, and the assembly stacks on top of the TP15 cash drawer. The TeamPoS 3600 is easily removed if required.

In addition, a back panel option is available which covers the rear I/O panel and cables. This cover requires and attaches to the Integration Kit.

For additional information on the Integration Kit, see the hardware bulletin [PSB-09-034.pdf](#).
