

Update Bulletin

ScanMaster Express™ and ISS45 Express™

March 11, 2005

- New Configurations with Lower Prices
- New Configurations with TeamPoS 2000 S-Class

Issue 2

StoreNext is very pleased to announce *ScanMaster Express*. These new ScanMaster configurations provide dealers with competitive ScanMaster system pricing in 1-5 terminal configurations based on the Fujitsu TeamPoS 2000 and TeamPoS 2000 S-Class terminals.

StoreNext is also making the following changes in StoreNext's Express system program:

- **TeamPoS 2000 S-Class** – StoreNext is introducing new "Core" Express configurations using TeamPoS 2000 S-Class controller slices. These configurations are available for both ScanMaster Express and TeamPoS Express.
- **\$300-per-Lane Lower Pricing** – List prices for the new S-Class Express "Core" configurations are lower in price across the board.
- **Old Express Configurations will Stay** – The new S-Class Core Express systems add configurations not previously available – but they do not replace the old configurations which remain available.
- **Dealer Discount** – Effective immediately, the maximum dealer discount for ISS45 (and ScanMaster) Express will be the same discount as for TeamPoS terminals.

Please see the new issues of [Marketing Bulletins 1206 and 1157](#) for details about the TeamPoS 2000 S-Class, and the new issue of [Marketing Bulletin 1100](#) for complete details on ISS45 and ScanMaster Express. Standard ScanMaster configuration and pricing is provided in [Marketing Bulletin 1208](#).

To Your Success,

Antony van Beenter
