

Update

New Extended 1-Year Warranty

Revised April 16, 1998

ICL is pleased to announce the extension of the warranty on most of our hardware products to one year. **We're even making it retroactive.** This includes the **TeamPoS**, the **Orion 9500** and **SlimScan 1200**. PCs are not included.

The fine print:

- The warranty will be valid for 12 months from date of shipment.
- Material only is covered by this warranty. There is no labor coverage.
- Any warranty calls received starting March 1, 1998 will honor the 12 month period.
- The warranty items are listed on the following page.
- The new warranty period is valid for ICL RETAILpartner dealers only.
- Wholesaler sell-through maintenance agreements are unchanged.
- Call ICL Customer Care (800-780-5525) for Warranty service.

Examples:

1. A covered product is shipped March 15, 1998 and requires a replacement part on September 15, 1998. The 12-month warranty applies.
2. A covered product was shipped September 15, 1997 and requires a replacement part on March 15, 1998. The 12-month warranty applies.
3. A covered product is shipped June 15, 1997 and required a replacement part on December 15, 1997. The product was out of warranty by December 1997, and policy at that time caused the part to be chargeable. There are no refunds or chargebacks in such situations.
4. On April 15, 1998 an additional failure occurs to the same unit described in example (3) above. The 12-month warranty applies, since the call was received after March 1, 1998 and the unit was shipped within twelve months of the call date.
5. Fleming program maintenance is priced for a 90-day warranty, after which maintenance kicks in. There are no changes to this program: the end user will continue to receive a 90-day warranty, and the RETAILpartner will receive the 12-month warranty from ICL.

We hope this new policy will lower your cost of doing business, increase your maintenance flexibility and improve your service margins.
