

Update Bulletin

IBM/ToshibaTEC Express/Esspresso Packages Withdrawn

May 8, 2013

Retalix has withdrawn all ISS45 and ScanMaster Express and Espresso packages based on IBM/ToshibaTEC hardware platforms.

The new configurations from IBM/ToshibaTEC are higher in price, and Retalix will replace these offerings shortly with new Express packages providing the highest competitive value.

Please contact your Retalix representative immediately if you have Express/Esspresso proposals currently in active process (that is, committed and in writing) with customers that may cause a hardship.

Retalix will honor purchase orders already accepted in-house at the then-current pricing provided that such orders are shipped by June 30, 2013.
