

Update Bulletin

Workstation License LFS at No Charge for ISS45 V84

Issue 1a June 3, 2013

Some users may prefer implementing an ISS45 Workstation (LFS) to the standard V8 Master File Server 2 (MFS2) configuration. This new item enables customers to add an ISS45 Workstation without the usual license charge if they forego the MFS2 in favor of an LFS/Workstation.

- Users that already have one or more ISS45 Workstation licenses can use this PIN to order an additional Workstation if desired.
- This PIN can be used only with “standard” ISS45 licenses that include both the MFS1 and MFS2. It is not applicable to Express or Espresso sites that do not include an MFS2 license.
- Since the MFS2 will not be used, the second HASP key is not necessary for the system and must be returned to receive the no-charge LFS license. (No return needed for new systems.)
- The usual \$35 HASP service fee (45000/010) does not apply and is not required when ordering this PIN.
- The e-mail HASP upgrade for the site will be provided upon receipt of the MFS2 Key.

To get the free LFS to replace MFS2:

- Order the PIN below from Retalix Order Entry. Do not use any other PIN for this purpose.
- [Use the new SKIF](#) that provides check-boxes for the MFS2→LFS Swap.
- Send the unused MFS2 key to:

Attn: Dave Bowser
Retalix
797 Commonwealth Drive
Warrendale, PA 15086

- When the key is received in Warrendale, the dealer will be sent the e-mail upgrade to add the Workstation/LFS license to the store’s existing license.¹ The upgrade will only be provided once the HASP is received (return applies to existing systems only).

PIN	Item	Price	Inst	Maint
40304/KISMFSS	ISS45 Workstation Software License (LFS), MFS2 Substitution	No Charge	\$ 150	\$ 55

¹ Ordering this PIN and returning the unneeded HASP does *not* limit the existing ISS45 license: it will remain a dual-controller site and does not degrade the site from an ISS45 “standard” license to an “Express” single-controller license. Should the customer choose to reverse course in the future and re-establish the MFS2 configuration, Retalix will re-provide the second key upon a dealer order of a Workstation/LFS license at normal pricing.
