

## TeamKey® for ISS45

November 5, 2001

Fujitsu Transaction Solutions Inc. is pleased to announce TeamKey for ISS45. For the first time, there is a truly high-quality LCD/Touch Screen/keyboard/MSR package available at very competitive cost. Even better, TeamKey is offered in a modular configuration that allows TeamKey to be added to any Fujitsu Digital or Analog LCD Flat Panel.

It's the best of display, touch screen and keyboard technology all rolled into one. With ISS45, TeamKey uses the OPOS drivers to operate the keypad, keylock and MSR. The OPOS capability for TeamKey is available on and 7.7.1\_53 WinPoS, released last month.

*"Not available in stores ..."* – TeamKey delivers the full capability – not just the screen part. There are plenty of flat panel displays available readily at the strip mall, but Circuit City can't sell you:

- An integrated touch screen at a reasonable price
- A screen with an integrated keypad
- A Keylock
- An MSR
- The right size – TeamKey is the ideal size and shape for Supermarkets (bigger is *not* better).
- Retail hardened equipment – this machine isn't designed to sit passively on a desk
- Brilliant screen viewable from wide angles. 20% brighter than standard screens.
- An opportunity to make money – a Dealer can't make a decent margin on a commodity where the grocer can buy it the same price. You can make a lot more money with TeamKey.

TeamKey has been with a new pedestal (see photos) that's designed to take a beating from the torsional impact of checkers hitting the screen and punching the keyboard. This stand is designed for dispersed operation, although it can sit on top of a TeamPoS controller or cash drawer. See the latest edition of Marketing Bulletin 1157 for configurations.

To Your Success,

**Tony**
