

Update Bulletin

Fujitsu iPad Last-Time Buy

October 14, 2011

Fujitsu has provided the following information regarding the iPad. StoreNext is certifying a replacement device for U-Scan and will release it as soon as possible.

IPAD LAST-TIME BUY

This is just a friendly reminder that the last-time buy date of October 31st for the Fujitsu iPad is quickly approaching. After October 31st FAI will not be able to forecast or purchase any additional units that were not forecasted.

If your customers use the iPad as a Mobile Attendant with U-Scan they need to either forecast additional unit until they chose one of the two units (Honeywell 9700 / Motorola MC55A0) and upgrade to version 4.5 software. If they use the iPad as a retail device for inventory or other functions they need to choose a new device.

Please make sure that you have communicated the iPad EOL with each of your customers and that they understand and have communicated their current and needs for the foreseeable future.
