## **StoreNext integrates Retalix BackOffice with ISS45 POS software** **Combination gives independent grocers fluidity between POS, back office**

**PLANO, Texas – Sept. 10, 2003** — StoreNext Retail Technologies LLC has integrated its ISS45 point-of-sale (POS) software with the Retalix BackOffice 4.02 (RBO) application suite to create a total software package for small-chain and independent grocers. The combination is available immediately.

“RBO 4.02 is the only back-office system that fully integrates with ISS45,” said Tony van Seventer, head of marketing at StoreNext. “The combination gives independent grocers fluidity and greater functionality between the POS and the back office by integrating menus, simplifying database management and providing better overall security.”

StoreNext is a joint venture of Fujitsu Transaction Solutions Inc. and Retalix Ltd. (NASDAQ: RTLX) that focuses on independent grocers and the dealers that serve them.

Retalix BackOffice, developed by Plano, Texas-based Retalix, is a complete in-store solution for the Windows operating system, using an open architecture approach. It is available as a suite of modular components, including item maintenance and reporting; store receiving; hand-held terminals for verification and receiving; label and sign printing; and ordering.

### **About StoreNext**

StoreNext Retail Technologies LLC is the No. 1 supplier of retail technology to independent grocers and small chains. Based in Plano, Texas, StoreNext is a joint venture of Retalix Ltd. (NASDAQ: RTLX) and Fujitsu Transaction Solutions Inc. and markets Fujitsu POS hardware, Retalix’s ISS45 POS software and Internet Connected Services for managing stores via Web-enabled applications. StoreNext is the only retail IT company focused exclusively on meeting the needs of this wholesaler-served market with packaged solutions that were previously available, affordable or practical only for large chains.
