

NCR RealPOS™ LCD Displays

Looking for a flexible LCD display that can provide information for either cashiers or consumers?

YES

NCR RealPOS LCD Displays deliver the information needed by today's cashiers and consumers

Built to be leveraged as a cashier interface device or as a consumer display, NCR RealPOS LCD Displays are designed to keep everyone informed. Whether providing application interaction or elaborate graphics through multimedia, LCD displays are a perfect complement to your total point-of-sale (POS) solution.

- **Keeps your customers informed**

Making it simple for your customers to see pricing, promotions and other items of interest not only enhances your communications, but your customers' satisfaction as well. Full-sized LCD displays offer additional real estate, allowing you to include interesting graphics, such as a scrolling receipt with detailed transaction data. A larger display also enables product advertisements, information on upcoming events, or even product promotions for an upcoming sale.

- **Designed for the retail environment**

All NCR RealPOS peripherals are certified with NCR RealPOS workstations to ensure a stable platform and eliminate potential conflicts. In addition, NCR's support for both OLE for Retail POS (OPOS) and JavaPOS drivers simplifies application integration. NCR RealPOS LCD Displays are also available in beige or charcoal gray to complement your store décor.

- **Built tough for the real world**

Comprehensive environmental and compatibility testing, along with strict manufacturing standards, provide you with confidence that your display will keep working for you despite the long hours in the retail world and mishaps at the checkout.
