

ScanMaster

Now stronger than ever — from StoreNext.

Premium POS...

Designed for the independent grocer and regional chain

Now offered from the only company that's exclusively dedicated to independent grocers, ScanMaster® is finally where it belongs. With special features and an architecture built for the unique requirements of independents, ScanMaster from StoreNext combines the wide range of capabilities and services you'll need to thrive in today's service-oriented, cost-conscious grocery environment.

ScanMaster's open design and reliance on industry standards enables you to leverage your previous system investments and take full advantage of emerging technologies. ScanMaster works with a wealth of best-of-breed industry third-party applications.

So whether it's ScanMaster, or the new ScanMaster Express™ or ScanMaster Espresso™ packages with extraordinary value for smaller stores, ScanMaster provides you with a truly comprehensive solution with flawless front-end operations.

ScanMaster from StoreNext

StoreNext is proud to market ScanMaster as a cornerstone application of its total solution offering. StoreNext supports existing V1 and V2 ScanMaster software releases, plus StoreNext's inaugural ScanMaster release with its 25+ new features and capabilities – only from StoreNext.

So no matter which software release you have – or when you bought it – StoreNext's ScanMaster Certified Dealers back you with support, maintenance and an ongoing stream of important new capabilities to keep you competitive. StoreNext's dedication to continuous ScanMaster development delivers the investment protection you expected when you selected ScanMaster. So welcome to StoreNext, where *Every Day is Independents' Day.*SM

ScanMaster

... and it's Just the way you need it.

Features ... new features ... more features

ScanMaster delivers a full complement of features and applications that make it an ideal turnkey solution. ScanMaster was one of the first systems to provide crucial capabilities like "clean" receipts, coupon printing, cashier age restriction, transaction suspend/recall, in-house charge accounts, WIC, DEA over-the-counter drug limitations and frequent shopper functions.

ScanMaster also includes high-performance accounting and file maintenance functions. More power is provided by user-customizable browser interfaces, simultaneous maintenance sessions, delayed cashier balancing and elegant data handling and redundancy control. And your store gets pause-free, 24-operation, too.

And don't forget ScanMaster's legendary "SRR", the Store Reconciliation Report system. Fast, flexible and powerful, ScanMaster's SRR remains one of the finest tools for ensuring proper financial operation and reporting.

But StoreNext has already taken ScanMaster to the next level, bringing your productivity and shopper satisfaction to new highs with these compelling new features:

- ★ **Shopper Picture Display** – protecting both your store and the customer, the shopper's photograph will display on the POS terminal whenever check tendering, check cashing, or in-house charge tendering takes place.
- ★ **Multi Media Maintenance** – now ScanMaster can store, control and display movies and images individually. There's even a function to display a special "Welcome" image and a special logo on the customer information display.
- ★ **Promotion Code** – the new 20-digit promotion code gives you much more flexibility on running and analyzing your in-store promotions.
- ★ **SIL Field Mapping** – another ScanMaster exclusive, this virtual drag-and-drop capability is the feature every SIL user wants – but only ScanMaster users get. Now you can assign any ScanMaster-supported SIL field to any industry-standard defined SIL field.
- ★ **Electronic Journal Movement** – put that EJ to more use with the ability for ad-hoc reporting of date-and-time oriented item movement reporting.

ScanMaster makes it a lot nicer to shop in your store. Its ability to move shoppers through checkout lanes with unmatched speed, combined with exceptional shopper service features will enhance the perception of your store. The possibilities for increasing shopper satisfaction and loyalty – and your resulting profits – are virtually limitless.

Packaged software that works for you...

...Not the other way around! ScanMaster engineered its entire office application around an industry-standard user interface office. So grocery personnel will find ScanMaster's office functions easy to access – even managers with minimum PC training will be able to master these functions end-to-end. ScanMaster's simple but powerful reporting tools enable your store managers to make better, more informed decisions and make them faster – so they can get out of that office and back to the aisles and spend time with those most important assets – your shoppers.

All StoreNext systems give the independent "products, not projects" and ScanMaster is no exception. ScanMaster's customization is via parameterization instead of expensive one-off development. The vast majority of ScanMaster users never need special custom software modifications. Instead they enjoy the benefits of constantly enhanced capabilities that grow as a reflection of the entire supermarket business.

Easy to get started

Independent grocers and regional chains don't have the big-chain crews of expensive technology managers – but with ScanMaster you don't need them.

As an independent-focused solution, ScanMaster puts a premium on ease of implementation, quick learning and easy, low-impact maintenance.

How? Unlike most Windows® applications with their incomprehensible maze of database, operating system, application and registry interaction, ScanMaster uses simple and straightforward executable functions. They install, start, run and can be maintained independently to give you a great Windows interface, superb flexibility and tremendous performance without the instability and hassle.

Hardware flexibility and scalability

StoreNext offers a broad range of terminal options and pricing for ScanMaster with Fujitsu's outstanding TeamPoS terminals.

ScanMaster's flexibility gives you a great choice of displays, printers, keyboards and scanners.

And now with StoreNext's upgraded versions, ScanMaster is finally available with touch-screen LCD monitors. For the first time, ScanMaster can help you reduce training costs through its intuitive cashier touch-screen interface, increasing cashier productivity and shopper loyalty.

ScanMaster also provides you exactly the same software regardless of store size. Store servers are fully scalable so you can apply different amounts of processing power to stores of varying size. And of course the TeamPoS hardware delivers a vast array of options as well as legendary reliability — just ask any user.

ScanMaster's software adheres to StoreNext's premium on stability. Its reputation speaks for itself, so you *can* expect the best. But ScanMaster automatically prepares for the worst, giving you complete file back-up at every terminal. And this protection for your business and your shoppers' convenience is fully automatic.

Exceptional service and support

ScanMaster is supported by StoreNext's nationwide team of hand-selected Certified ScanMaster Dealers. Not only do they have a complete mastery of ScanMaster and our other systems for independent grocers, but they understand your local market needs and provide outstanding service and support.

Certified Dealers integrate StoreNext systems with their own services and understanding of your needs. The result is a relationship that is the envy of the industry — and one that explains why over 11,000 StoreNext systems are helping grocers operate their stores and lower their costs while attracting and retaining shoppers.

StoreNext Dealers will install your ScanMaster system to serve the unique way that *you* do business, not ask you to change your operations to suit POS. They will also integrate other StoreNext systems like Pricer[®] that automatically re-prices items at your shelves.

Or run your store with PocketOffice[™] on an 11-ounce hand-held computer. Or manage your business and analyze results from anywhere there's a telephone line with StoreNext Connected Services.[™] We can even spot problem cashiers before they cost you money and tell you in plain English how to fix the problem. And with U-Scan[®] from StoreNext, you can let shoppers check themselves out while *increasing* shopper service — and *decreasing* shrink!

So call StoreNext or your StoreNext dealer and get started — there's just no point in waiting any longer.

StoreNext didn't become the industry leader just by developing superior systems. Equally important is building business relationships that endure. Our unmatched record of successful relationships — and our unwavering commitment to them — is built on understanding each grocer's special needs, store by store, company by company, and then providing the open, extended solutions to satisfy those needs.

About StoreNext

StoreNext is the No. 1 supplier of retail technology to independent grocers and regional chains, and the only major technology company focused exclusively on their needs. StoreNext's Connected Services and store automation offerings enable independents to compete on level technology playing field with industry giants.

StoreNext's one-stop technology resources include POS systems and equipment, store office applications, self-checkout systems, store headquarters and hosting applications, shopper loyalty management and analysis systems, electronic shelf labels, fuel POS and petroleum management and in-store mobile wireless computing.
