

# Saving Your Hardware with ScanMaster Upgrades

StoreNext and your Dealer can save most or all of your legacy NCR hardware when you upgrade your system to the new Visa Compliant ScanMaster V2

*You can have ScanMaster V2 running great in your operations without having to throw out your legacy hardware.*

Maybe your ScanMaster stores were installed recently and there will likely be no requirements for hardware upgrades at all. So you'll be able to implement ScanMaster Version 2 from StoreNext – with Visa Compliance and its host of new features – with just a simple software upgrade. Lucky you!

But even if you've had your ScanMaster installed for several years, your operation can now upgrade to StoreNext ScanMaster V2 at a minimum cost. Now, your Dealer can ensure that most or all of your investment in scanner/scales, displays, printers – and even cash drawers – can stay right there in your checkout stands while trading your electronics boxes up to the great TeamPoS 2000 M or S-Class terminals.

At StoreNext, *"Every Day is Independent's Day"* and that means providing independent grocers and regional chains with high value software while minimizing your cost. Well even give you a trade-in on your old NCR PC-POS electronics boxes.

So even if your electronics box has run its course, moving to ScanMaster V2 can be as simple as putting our TeamPoS 2000 S-Class to work. This new terminal provides outstanding value at the lowest cost. And of course the TeamPoS 2000 "M" is the highest-performing POS terminal ever manufactured, outperforming every other POS terminal and thereby ensuring the longest possible economic life.

But it's not just the value of the new hardware – maybe it makes dollars and sense to keep some or all of your front end in place. The StoreNext ScanMaster V2 software now will support these TeamPoS terminals in conjunction with the following peripherals:

- ✓ **Scanner/Scales** – so long as you're using model 7872 or 7875 scanner/scales with a single-cable interface (or can implement a single cable option), you're good to go.

Otherwise, StoreNext and your dealer will make you an outstanding offer on new PSC Magellan® or Fujitsu SmartScan9950 scanner/scales with performance and throughput improvements you'll find astonishing since your last purchase. And we'll have something to fit in virtually any checkstand opening without expensive counter modifications.

- ✓ **Printers** – you'll be happy to know that your 7156, 7158 and 7167 thermal printers are all supported. If you have a dot-matrix or OCIA printer, well, that just gives the opportunity to see how great (and quiet, and fast) your receipts will look to your shoppers with the new TPG A776 or Epson H6000 printers.
- ✓ **Cash Drawers** – ok, maybe these aren't the highest-cost item ... until you consider the possible checkstand modifications. So we're supporting virtually any legacy cash drawer, or you can install a smooth, new TeamPoS 2000 drawer that will probably last you for decades.
- ✓ **Displays** – even if your checkstands use a relatively new DynaKey, you'll want to look at the vast improvements in shopper service, convenience and training time you'll get with ScanMaster's V2 Touch Screens. Not only do they make the most complex operations simple, but the reliability and maintenance alone provide the payoff you'd expect. But if you need to get another year or two out of your color 10½" DynaKeys, we're behind you and your new ScanMaster V2/ TeamPoS 2000 platform run with these DynaKeys.

So you don't have to put off getting all ScanMaster's great new features in fear of a big hardware bill. Instead, just call your StoreNext ScanMaster dealer and get.
