

# ScanMaster from StoreNext

The ScanMaster you always wanted.  
The commitment you always needed.

*Only from StoreNext ScanMaster Dealers –  
totaling over 100 new features, capabilities and  
interfaces in the finest ScanMaster yet.*

Designed exclusively for the independent grocer and regional chain, ScanMaster® has long been one of the most powerful and dynamic POS systems, continuously enhanced to meet the developing requirements of your grocery business.

And StoreNext is keeping it that way with ScanMaster 2.4, our fifth major release, further proving our commitment. This Winter 2007 release alone has added 40+ enhancements and provides the smooth operation and ground-breaking capabilities for competing in today's grocery business.

Of course, ScanMaster from StoreNext is fully Visa/PCI Compliant. But ScanMaster also brings you dozens of new features that are simply unavailable on the old "capped" ScanMaster – and it brings them to you today on the proven ScanMaster system you already trust.

- **Full WinEPS/OpenEPS Operation –**  
Our new engine opens the entire scope of electronic payments, including signature capture, electronic check conversion, vendor gift cards and Pay By Touch payments. And since ScanMaster no longer stores, touches or even "sees" bank card data, you and your shoppers get the absolute maximum in security.

- **Automated End-of-Day –** ScanMaster End-of-Day Processing can now execute automatically at a designated time of day – even different times for different days. Full controls, parameters, schedulers, status notifications and logs are included.
- **PocketOffice –** your staff can now monitor cashiers, audit aisles, and check your flash sales and cashier productivity from anywhere in the store. Now with Q-Buster™ and remote manager authorization, handling all POS exceptions.
- **Full Touch-Screen Control –** only StoreNext's ScanMaster gives you the low cost, easy training, fast operation, reliability, lower maintenance and flexibility of touch screens.
- **Pay By Touch Loyalty –** take your card program to the next step with biometric ID that cuts your payment costs while adding convenience and prevents identity theft for your shoppers.
- **MobileLime® Loyalty –** this outstanding turn-key service uses cellphone text messaging and other media to keep you close to your shoppers. (CONTINUED...)

- 
- **U-Scan** – ScanMaster’s full integration enables the shopper service advantages, shrink reduction and operational savings of self-checkout.
  - **Blackhawk Gift Cards** – now you can offer 100 major gift card brands, including Starbucks, Circuit City and even Major League Baseball – with little or no inventory cost.
  - **Home Delivery** – enables customers to shop your store and have their groceries delivered to their homes.
  - **TeamPoS Terminal Support** – this is better: ScanMaster now supports the full range of Fujitsu TeamPoS terminals, including the TeamPoS 2000 M-Class, the highest performance POS hardware ever built. Plus you can use the new low-cost TeamPoS 2000 S-Class. Dual touch-screen 12” and 15” displays, TPG (Axiohm) and Epson printer options and operation with leading PSC scanner/scales round out the best terminal hardware set in the business.
  - **Shopper Picture ID** – give your shoppers – and your stores – the security of positive identification. Shopper photos appear on the checker screen to confirm check tendering, check cashing and in-store charge transactions.
  - **Electronic Shelf Labels** – Pricer® ESL is now interfaced to ScanMaster, and 2.4 brings even more capabilities and features. Ask your StoreNext dealer how you can join the independent grocers already enjoying the smooth operations and lower costs from this outstanding system.
  - **SIL Mapping** – ScanMaster can now map any standard SIL field to a supported ScanMaster SIL field. A simple rightside/leftside onscreen tool makes setup a snap and enables outstanding flexibility in meeting wholesaler SIL formats and data enhancements.
  - **SIL Character Handling** – along with the field mapping, ScanMaster 2.1.2 provides optional automated check-digit stripping and check-digit adding after movement extract processing. A new error-messaging system for SIL adds further feedback and security.
  - **Gift Card Re-charge** – now ScanMaster gives your shoppers the convenience and savings of updating their in-house gift cards instead of forcing new cards and leaving multiple cards with small remainders.
  - **Multimedia by Lane** – with ScanMaster’s upgraded Multimedia Maintenance system controls in-lane shopper display logos, images and movies based on selected lanes, plus time-of-day and day-of-week control. You control the sequence, and reports by lane enable easy billings.
  - **Upgraded S&H GreenPoints Support (including 1.09):**
    - ◆ Auto-redeem free-item points or discounts – the four-digit lookup code enters automatically, reducing clerk labor and errors while providing better shopper service.
    - ◆ Financial receipts now print on ScanMaster’s printer.
    - ◆ BuyCheck check-processing is now supported.
    - ◆ APT EFT handles gift card activation/balance inquiries.
  - **20-Digit Promotion Codes** – displaying in both the Item and Electronic Promotion screens, this new code gives you an improved promotion management tool to link items to electronic coupon promotions, with \$, % and @ - price offers. One code can link multiple items too.
  - **Electronic Journal Date-Spanning** – this exclusive new capability enables stores to select date-and-time controls and study item movement across the time span desired. These reports can further be provided in Acrobat® (PDF), Microsoft Excel®, Microsoft Word®, RTF and CSV formats.
  - **SRR Enhancements** – ScanMaster’s Store Reconciliation Reporting system has been further enhanced:
    - ◆ A sales percentage data column has been added reflecting the group sales percentages of total store sales.
    - ◆ Average sale amount is now available as a totalizer for the Memo Section of the SRR. This is the same number that will appear on the Store Totals Report.
    - ◆ A new parameter allows stores to control the printing order of receipts and paid-outs.
    - ◆ New totalizers for 3 tax-exempt and 3 tax-exempt food stamp sales totals are now provided.
  - **Expired Coupon Clearing** – this new application will automatically delete the expired coupons during end-of-day processing.
  - **Line Item Discount Accounting** – stores can now add these discounts back into sales figures for accounting purposes.
  - **Register Control File Enhancements:**
    - ◆ Coupons now controlled for amount or total order amount compared to the value of the items purchased.
    - ◆ Enabling discounts by type (1/2/4/5) will reduce the transaction level discountable totals.
    - ◆ Enabling discounts by manufacturer or store coupon, including doubled/multiple coupons, reduces the discountable totals by the coupon levels applied.
    - ◆ Gift card re-charge is now possible.
    - ◆ S&H point redemptions are supported, and xiNETix EFT merchant IDs can print on receipts and signature slips.
  - **New Balancing Equations** – many balancing equations have been enhanced, encompassing new software features. These include upgrades of the Individual Cashier Reports, SRR, and Back Office Control files for Cashier Reporting, Store Totals, Non-Resettable Totals and Line Item Discounts.
  - **100% Discount** – can now be applied in total time and line discounts 1/2/4/5.
  - **Food Stamp Handling** – has been enhanced to simplify the paper vs. EFT management for cashiers.
  - **T-Log Consolidation** – POS now consolidates to the server transaction log after the transaction is completed, ensuring synch between the StoreNext Connected Services reports and the ScanMaster in-store totals.
  - **Item and Movement Reports** – can now be provided in Acrobat (PDF), Microsoft Excel, Microsoft Word, RTF, tab-separated text and text formats.
