

U-Scan1 Self-Checkout

Compact, single-bag solution

Give your shoppers the option!

Fujitsu's U-Scan1 is ideal for independent grocers and regional chains in areas with limited space and where smaller express-lane style orders are the rule. The freestanding self-checkout system allows busy shoppers to immediately purchase items at checkout stations located in convenient locations. This provides shoppers with a quick method to check out their items while minimizing the lineups at the front end of the store. Its compact size is also perfect for convenience stores, drug stores and other retailers with limited space.

Measurements are approximate. U-Scan® layout availability is subject to individual store set-ups, e.g.: accessibility to electrical outlets, width of shopping carts, direction of exit, etc.
