StoreNext Partners with MTXEPS, Inc. to Offer Electronic Payment Solution

Independent Grocers Gain Access to Industry's Core Payment Engine

PLANO, Texas – June 27, 2005 – StoreNext Retail Technologies LLC and MTXEPS, Inc. have formed a strategic partnership that will enable independent grocers to offer shoppers a wide range of secure electronic payment options, providing a faster and more convenient shopping experience.

StoreNext will now market the WinEPS electronic payment application with its ISS45 and ScanMaster point-of-sale (POS) systems while WinEPS for non-StoreNext POS systems also will be available to certified StoreNext dealers. WinEPS provides electronic payment options ranging from debit and credit card transactions, to EBT, gift card and check authorization. Biometric interfaces for secure shopper identification with WinEPS and ISS45 also are being released. According to MTXEPS, WinEPS is the leading payment engine in the retail food industry and is the only host-, terminal- and POS-independent electronic payment software currently on the market.

“WinEPS has become the most popular electronic payment system for the wholesaler-served independent grocery industry,” said Tony van Seventer, vice president of marketing and products for StoreNext. “As payments software becomes ever more sophisticated, StoreNext will benefit from new joint solutions, closely integrated through our partnership. With independent grocers’ ability to move quickly, they will be able to offer their shoppers broader payment options while this software works in the background to minimize grocers’ transaction costs.”

“We’re delighted to be working with StoreNext,” said MTXEPS president Jon Elwood. “Not only does this agreement provide StoreNext’s marketing and distribution for our WinEPS and OpenEPS product line, but we can now coordinate our point-of-sale and electronic payment system software to give grocers truly synchronized systems – with higher performance and more capabilities.”

This announcement follows a similar agreement between StoreNext and Pay By Touch under which StoreNext, through its nationwide dealer network, will resell Pay By Touch’s biometric

authentication and payment system. MTXEPS is providing the payment engine for transactions and data on that system, which will ultimately be processed via StoreNext's Connected Services suite of Internet-based store management application.

Under an agreement announced in February 2004, Retailix USA (NASDAQ: RTLX) also has integrated the WinEPS payment engine into its POS software applications for the Grocery, Drug and Convenience Store sectors.

About MTXEPS, Inc.

MTXEPS is a privately held company, based in California, which markets their products directly and through their reseller channels. The WinEPS software product has been in the market place for over 10 years and now is a feature-rich, mature product with over 5,000 installations. The MTXEPS solution integrates with Point of Sale software from AutoStar, Innovax, JDA, JPMA, NCR, Retailix, Fujitsu Transaction Solutions, StoreNext, Systech, and Pin Pad solutions from Hypercom and Verifone. For additional information, please visit www.MTXEPS.com.

About StoreNext

StoreNext Retail Technologies LLC is the No. 1 supplier of retail technology to independent grocers and regional chains. Based in Plano, Texas, StoreNext is a joint venture of Retailix Ltd. (NASDAQ: RTLX) and Fujitsu Transaction Solutions Inc. and markets Fujitsu POS hardware, Retailix's ISS45 POS software, ScanMaster, Retailix Store and Retailix HQ, as well as Internet Connected Services for managing stores via Web-enabled applications. StoreNext is the IT company that's dedicated to meeting the needs of this wholesaler-served market with packaged solutions that were previously available, affordable or practical only for large chains.
