StoreNext Incorporates PSC Scanners in Product Lineup

PLANO, Texas and EUGENE, Ore. – Aug. 16, 2005 – StoreNext Retail Technologies LLC has signed an agreement with PSC Inc. to offer PSC’s stationary and hand-held scanners to StoreNext dealers and the independent grocers they serve.

PSC is ranked as the worldwide leader in total shipments of stationary bar code scanners, as well as first in stationary scanners for the retail point-of-sale (POS) sector, according to market research and strategy consulting firm Venture Development Corporation (VDC), in its most recent report based on 2004 market data.

“This agreement couples the grocery industry’s leading POS systems — StoreNext’s ISS45 and ScanMaster — with the world’s leading scanners,” said Dave Sullivan, Sr. Vice President of Worldwide Sales and Services for PSC. “Together PSC and StoreNext will give independent grocers unparalleled performance and capabilities at checkout and offer shoppers a quicker and more convenient in-store experience.”

The new product lineup includes PSC’s Magellan® family of high-performance bar code scanner/scales designed to enhance productivity in high-volume retail environments, as well as the QuickScan® line of hand-held scanners typically used for peripheral lanes and bulky items.

“Our strategic alliance with PSC expands our product offering and gives independent grocers more options when configuring their POS systems with StoreNext dealers,” said Tony van Seventer, vice president of marketing and products at Plano, Texas-based StoreNext. “This is another important step in our continuing commitment to independent grocers and regional chains by fully integrating the finest products for their stores. For example, we intend to couple our POS software with the unique value-added features of PSC’s Magellan scanners to give StoreNext users more control and even higher productivity in their front-end operations.”

PSC made history in 1974 when it installed the world's first grocery store scanner and scanned a 10-pack of Wrigley's chewing gum at the Marsh's Supermarkets in Ohio. Since then, PSC has established and maintained a leadership position by building innovative data-capture equipment with unparalleled reliability and performance, evolving from simply a bar code scanner manufacturer to a complete supply chain management solution provider.

About PSC Inc.

PSC Inc. is a global provider of breakthrough data-capture products and services. Wired or wireless, PSC® products serve multiple industries including the retail, manufacturing, distribution, transportation and logistics sectors.
