

PRODUCT

Equinox Payment Terminals

MB-POS-1214, Issue 24

November 26, 2018

Note: this Issue 24 provides miscellaneous updates and new items. Changes or additions of significance are highlighted in **RED**.

NCR is pleased to offer Equinox® payment terminals to NCR Channel Partners. NCR and Equinox have worked together to enable NCR Channel Partners to purchase these products at aggressive dealer net pricing.

NCR is marketing the following products, focused on requirements for independent and specialty grocers. Of course, these products will also meet Channel Partner needs in other areas as well. The NCR lineup of Equinox products includes:

- **Equinox L5300 terminal, provided in the PCI 3 version.** This mid-priced PIN pad provides a stunning shopper screen and the latest and most secure technology available. Options for Near-Field Communications round out the best payments terminal ever built.
- **The new Equinox L5200** - also certified under PCI 3, offers nearly the identical feature set of the L5300 with a brilliant and compact screen size in a smaller footprint and aggressive low price.

These terminals provide outstanding performance and value.

HARDWARE ENCRYPTION, CONNECTED PAYMENTS AND EQUINOX

NCR can provide Connected Payments Hardware Encryption with the L5300 and L5200, creating the strongest encrypted data and transmission security solution available today. A special Connected Payments hardware encryption key can be included that enables hardware-based point-to-point encryption (P2Pe) from the instant of card swipe on the PIN pad all the way through the store system, enterprise, Internet and to the Connected Payments hosts.

- **Exclusive** — available only from NCR for Connected Payments. A Channel Partner's customers can't shop you over the Web! The hardware encryption key is not normally available from other distributors or vendors, or with any non-Equinox payment terminals.
- **Secure** — hardware-based data encryption provides the ultimate methodology to protect store and shopper data through the payment process.
- **Easy** — the hardware encryption key is injected at initial purchase on new Equinox terminals purchased from NCR.
- **Inexpensive** — the list price of the Connected Payments hardware key is \$20, but Channel Partners receive it at no charge when the key is ordered for injection at purchase.
- **Automatic** — just get the hardware encryption turned on from the Connected Payments host and the encryption system will change from the standard Connected Payments software encryption to the new, ultra-secure hardware encryption. The hardware encryption key must be loaded in the PIN pad for hardware encryption to operate.
- **Unobtrusive** — the hardware key is inert within the PIN pad until the Connected Payments host turns on hardware encryption for the device connection. It doesn't lock the PIN pad for use with Connected Payments only.
- **Compatible** — the Connected Payments hardware key is compatible with all L5300/L5200 PIN pads, as well as the L4150 and L4250 terminals.

- **RKI Enabled** — Equinox Remote Key Injection (RKI) will install the Connected Payments hardware key into older terminals already in your customers' stores. A separate bulletin details the RKI release, but you will need to get set up for this Equinox service. Per-Key service charges apply for each RKI download, so it's better to key your terminals upon purchase.

The Equinox L5300 and L5200 are described in detail on the following pages.

EQUINOX L5300 PCI 3

The L5300 PCI 3.0 payments terminal is the flagship PIN pad in Equinox' next generation of high performance flexible payment terminals, designed with "future-proof" features to protect the customer investment. This sleek, customer-facing multimedia payment terminal features a large, high-resolution screen made especially for merchants that want to give their shoppers the richest, most interactive user experience available.

The L5300 provides almost all interfaces, capabilities and options in its base unit. A contact-less near-field communications ("NFC" or "RFID") version of the L5300 is also available, and the basic L5300 is field-upgradable — this contact-less module is also available separately for future upgrades if desired.

The L5300 PCI 3 provides advanced security, coupled with a superior application architecture, remote key injection (RKI) and full contact-less NFC capability. Many of these innovative features can't be found anywhere else, further helping to better future-proof your investment:

- PCI PTS 3.1 compliant
- Encrypting magnetic stripe reader
- Fully compatible with all commercially available point-to-point encryption schemas
- Linux operating system—open yet secure
- Flexible FPE application supports all standard POS interfaces
- Remote terminal management system
- Remote Key Injection ("RKI") — safe, secure and fully certified solution for remotely loading symmetric keys
- Attended or unattended key downloads—in-lane key-loading through the POS
- NFC Capable
- Ergonomic integrated contact-less reader installed in factory or in the field
- Fully compliant with ISO14443 and emerging ISO18092 standards
- Supports all major eWallets

Provides P-USB interface (supports standard USB client USB and P-USB) one (1) physical RS-232 ports (two logical RS-232 ports), Ethernet interface, 256MB Flash RAM and 128MB SD RAM, plus a micro-SD port for additional memory expansion. New purchases of this terminal include the operating system and SCAT/FPE software license and loading service at no additional charge. The NCR hardware encryption key for Connected Payments will also be provided at no charge on new system purchases.

See the [Equinox L5300 PCI 3 Information Sheet](#) for complete information.

EQUINOX L5200 PCI 3

The L5200 PCI 3.0 payments terminal provides a compact screen and smaller footprint than the larger L5300, but uses the same fast 400 MHz 32-bit microprocessor and otherwise provides the same features and uses the same accessories. The saturated hi-res screen gives shoppers a rich, interactive user experience while saving valuable space at the POS counter. And its outstanding pricing delivers the ultimate value in the PIN pad marketplace today.

The L5200 provides almost all interfaces, capabilities and options in its base unit. A contact-less near-field communications ("NFC" or "RFID") version of the L5200 is also available, and the basic L5200 is field-upgradable - this contact-less module is also available separately for future upgrades if desired.

The L5200 PCI 3 provides advanced security, coupled with a superior application architecture, remote key injection (RKI) and full contact-less NFC capability. Many of these innovative features can't be found anywhere else, further helping to better future-proof your investment:

- PCI PTS 3.1 compliant
- Encrypting magnetic stripe reader
- Fully compatible with all commercially available point-to-point encryption schemas
- Linux operating system-open yet secure
- Flexible FPE application supports all standard POS interfaces
- Remote terminal management system
- Remote Key Injection ("RKI") - safe, secure and fully certified solution for remotely loading symmetric keys
- Attended or unattended key downloads-in-lane key-loading through the POS
- NFC Capable
- Ergonomic integrated contact-less reader installed in factory or in the field
- Fully compliant with ISO14443 and emerging ISO18092 standards
- Supports all major eWallets

Provides P-USB interface (supports standard USB client USB and P-USB) one (1) physical RS-232 ports (two logical RS-232 ports), Ethernet interface, 256MB Flash RAM and 128MB SD RAM, plus a micro-SD port for additional memory expansion. New purchases of this terminal include the operating system and SCAT/FPE software license and loading service at no additional charge. The NCR hardware encryption key for Connected Payments will also be provided at no charge on new system purchases.

See the [Equinox L5200 PCI 3 Information Sheet](#) for complete information.

NCR Equinox Channel Partner Program

Equinox Representatives for NCR Channel Partners

To ensure your success, Equinox will assist NCR Channel Partners in the areas of sales, product information and support.

- For sales inquiries, please contact:

Megan Quinn — Sales Executive

Voice: 224-623-2481

Email: MQuinn@EquinoxPayments.com

- For technical questions and issues, please contact Equinox at the addresses below. Rather than emailing a specific person, using the new support team addresses is designed to ensure faster turnaround and responses when employees may be otherwise out of the office or traveling:
 - **Equinox Technical Support:** ProductSupport@EquinoxPayments.com
 - **Equinox RKI Technical Support:** RemoteKeyInjection@equinoxpayments.com

Product Information

- **Industry Compliance** — Equinox products are tested and certified as PCI compliant: Manuals and Technical Information - this information is provided to NCR Channel Partners via the Equinox/Hypercom. Page of the NCR Solution Provider Support Web site.
- **Brochures and Information Sheets** — Equinox information sheets can be found on the NCR Solution Provider Support Web site.
- **Presentations** — an Equinox/Hypercom PowerPoint presentation is available on the NCR Solution Provider Support Web site.
- **Manuals** — a set of technical and user manuals is available for the Equinox/Hypercom payment terminal products. See the Equinox/Hypercom Page on the NCR Solution Provider Support Web site.
- **Institutional Certification** — these payment terminals also have been certified on a wide variety of payment networks and banking institutions. See the Equinox/Hypercom Page of the Solution Provider Support Web site.
- **Terminal Stands** — Equinox terminals use industry-standard mountings and they fit the same terminal stand and adapters as most previous payment terminal designs, minimizing upgrade cost and hassle. For a list of terminal stand manufacturers, on page 18 below.

Warranty and Support

NCR CHANNEL PARTNER PROGRAM SERVICES AND RESPONSIBILITIES

The NCR program for Equinox provides the following product support facilities. To maximize service levels, all standard support and processes in the NCR/Equinox program are provided **directly to the Channel Partner**, not to the end-user. When direct support is required for an end-user customer, please contact your Equinox representative.

Channel Partners will handle the product on behalf of the end-user with respect to all early failure, warranty, extended warranty and out-of-warranty services. Under this program the warranty is with the

Channel Partner, not with the end user, and the end user is therefore not recognized as an authorized entity for returns and services under warranty arrangements.

Any payment terminal has two specific attributes that are dependent upon its environment:

- The encryption key, authorizing transactions to a specific processor or wholesaler program (e.g. First Data, UWG-Fifth/Third Bank - on page 14 below for a discussion of this topic) and,
- The payment terminal software load (of SCAT/FPE see page on page 17 below for this topic) that must be factory-loaded and assumes specific payments software (e.g. Connected Payments) that has been certified.

Equinox terminals ship to NCR Channel Partners from POSDATA, which performs logistics services for the program. Terminals returned for initial/out-of-box failures (to POSDATA), or for warranty and out-of-warranty services (to Equinox) will have the proper SCAT/FPE software reloaded and updated. And if the terminal was injected when shipped to the Channel Partner (by POSDATA or via POSDATA by a third party) POSDATA or Equinox will return the terminal pre-injected to the Channel Partner as part of the service. If injection was not originally ordered/delivered, the terminal will be returned to the Channel Partner with no key.

Since a grocer's lane is considered "down" if the payment terminal is not functioning, Channel Partners should carry spare units with the proper keys or use the Advanced Exchange spare-in-the-air program.

With in-house spares, the Channel Partner's local service will surpass even the fastest "spare-in-the-air" turnaround to get the lane back up and running, providing a competitive advantage for the Channel Partner's service. This means, however, retaining spares that are keyed for every processor in the Channel Partner's installed base.¹

OUT-OF-BOX FAILURES

POSDATA handles out-of-box failures. In cases of DOA/out-of-box failures, all products including accessory items will be replaced due to manufacturing defects on an expedited basis free of charge. This service is available for the first 30 days from the date of shipment. ***Channel Partners should test all hardware upon arrival! Equinox and POSDATA will not accept out-of-box or early-failure units beyond the 30-day limit.***

Cost — there is no additional charge to Channel Partners for the out-of-box service.

- **Initial installation** — if a new device fails to operate properly at time of initial installation, POSDATA will replace the product with a new device if within the 30-day out-of-box period.
- **Limitations** — the out-of-box service is limited to terminals that have not yet been installed. Abuse cases (such as non-approved stylus cutting through to the screen surface, broken connector pins from improper cables or installation) and "force majeure" (volcanoes, meteors of significant size etc.) exempt POSDATA and NCR from this policy.
- **Prerequisites** — the Channel Partner should contact POSDATA at 800-426-4004.
- **Key injection** — if original device had its processor key injected by or via POSDATA, the replacement terminal will be returned with the same key injected. If the key was injected by a third party by the Channel Partner or customer, the Channel Partner must have the third party re-inject the key after receiving the replacement unit from POSDATA.
- **Quantity limit** — no more than ten items may be included in any one RMA shipment to POSDATA of out-of-box failure products.

¹ Note: Terminal software or encryption keys are not normally specific to a single store or lane. A spare terminal with the software for Connected Payments and the standard First Data key can, for example, support any of a Solution Provider's Connected Payments/First Data installed stores. The Solution Provider does not have to wait for the original terminal to be repaired to replace the terminal in the store.

- **Software** — POSDATA will always load the registered version of software application originally supplied.
- **Turnaround** — POSDATA can normally execute same day turnaround for out-of-box failures if the returned terminal is received prior to 3:00 p.m. Shipping time is not included in the two-day turnaround service level.
- **Shipping and handling**
 - For **out-of-box** failure replacement, POSDATA pays for the return shipping, authorized by the RMA (as per prerequisites above).
 - Units must be returned in their **original packaging** to prevent damage and potential warranty void.
 - POSDATA will also pay for **return-ship**, via two-day carrier, all out-of-box replacement shipments up to ten units.
- **Acceptance** — after 30 days from product shipment or the install date – whichever comes first – the product is deemed accepted by the customer and is no longer covered by the out-of-box failure policy. After that point, the device will instead be covered via the warranty policy below that is handled through Equinox.
- **Items missing in shipment** — if items are missing in shipment, Channel Partners should contact NCR Order Entry immediately. NCR will check with POSDATA regarding the shipment on the Channel Partner's behalf, and POSDATA will provide two-business-day turnaround of any items missing in shipment. After 20 days from product shipment the device will be deemed accepted by the Channel Partner and neither NCR nor POSDATA will be considered responsible for missing items.

STANDARD 3-YEAR WARRANTY

Warranty for all L5300/L5200 devices is handled by Equinox.² For the first 36 months from the date of shipment, all Equinox L5xxx series products - including the touch-screen - will be replaced or repaired free of charge when the failure is due to manufacturing defects or workmanship.

- **Cost** — there is no additional charge to the Channel Partner for this warranty service.
- **Coverage** — all warranty and other repairs for L5xxx series terminals must be performed directly by Equinox. Warranty for L5xxx terminals cannot be handled by POSDATA as was previously done with the L4xxx series. Warranty terminals are shipped directly to Equinox after getting a RMA from Equinox. If a defect in workmanship for the payment terminal is found upon return, Equinox will repair the product or replace it with a similar device with error-free operation with cosmetic condition as good or better than the unit returned.
- **Accessories** — coverage is for the payment terminal only. Accessory items such as cables, power supplies and screen protectors are considered consumables and are not covered by warranty.
- **Limitations:**
 - Abuse (such as non-approved stylus cutting through to the screen surface, broken connector pins from improper cables or installation) and "force majeure" (volcanoes, hurricanes etc.) exempt Equinox and its agents from this policy.
 - Terminals returned for repair deemed to have been physically damaged through negligence will incur additional charges.
 - Scratched or damaged signature pad screens are not a warranty item.
 - Equinox has no responsibility to provide new, mint, unused or like-new products in return for used items.

² POSDATA will continue to handle warranty for L4xxx devices but not L5200/L5300 products.

- Stylus pens or broken holders are excluded. Equinox strongly suggests that you have additional replacement Electronic Stylus Pens and Screen Protectors (if applicable) on hand at all times to prevent damage to the screens, and that the units be mounted on approved pivots to protect them from damage.
- Re-programming and freight charges will apply in cases where units are sent in more than once during the warranty period for loss of data and found to not be defective.
- **Prerequisites** — contact Equinox directly at 800-584-1876 or e-mail Equinox at RMARequests@equinoxpayments.com.
- **Key injection** — if original device had processor key(s) that Equinox possesses and can inject, the terminal or replacement terminal will be returned to the Channel Partner with the same key(s) injected. If Equinox does not have and cannot inject the key, the Channel Partner must have the third party re-inject the key after receiving the replacement unit from Equinox.
- **Software** — Equinox will always load the registered version of software application originally supplied. If the original software is in end-of-life, Equinox will install the then-current version of the proper software load for the applicable payment system.
- **Services provided under warranty repair:**
 - Equinox performs complete diagnostics on all warranty returns to ascertain reported problems and uncover any unreported problems.
 - All hardware updates will be made during repair activity to bring the product to the currently-shipping hardware level.
 - All devices will be cleaned to remove any exterior dust, debris, and markings resulting from normal wear and tear.
 - Devices will be returned to the Channel Partner in new packaging materials and a new unit carton.
 - Equinox will replace the stylus and bezel (non-customized) at no-charge replacement of any of those components are missing, broken or otherwise non-functional.
- **Turnaround** — for returns including up to 20 units, Equinox executes warranty turnaround within fifteen (15) business days.³ Shipping time is not included in the warranty repair turnaround service level.
- **Shipping and handling:**
 - For warranty repairs, the Channel Partner pays for the return shipping to Equinox, authorized by the RMA (as per prerequisites above).
 - Units are to be returned in new/original packaging and cartons to prevent damage and potential voiding of the warranty.
 - Equinox will pay for return-ship, via standard ground shipping. Channel Partners may request expedited shipment at the Channel Partner's additional cost.
- **Complete warranty instructions and information** — is provided on the [Equinox Warranty Policy](#), also located on the Equinox Page of the NCR Channel Partner Support Site.

OPTIONAL EXTENDED WARRANTY — PREMIER SERVICE PLANS

Channel Partners can upgrade the standard three-year warranty with a “Premier 1” or “Premier 7” or “Premier 15” warranty program.

- **Premier 15** — Provides an RMA process with a 15-day turn-around time (from receipt of shipment). Services include:

³ Returns of 21-100 units are handled in 20 days, or as agreed on a separate statement-of-work.

- Testing
- Cleaning
- Software loading
- Key injection (as applicable and available)
- Replacement of all defective parts
- **Premier 7** — Provides the same services as Premier 15, but with an expedited 7-day turnaround time.
- **Premier 1** — Provides the same services as Premier 15 and Premier 7, but with same-day turnaround for requests made by 6:00 p.m. ET and next-day shipment of requests received after 6:00 p.m. ET. Saturday requests are taken until 4:00 p.m. ET and shipped out Monday morning. In addition:
 - Equinox pays for shipping to and from the client — replacement terminal is sent from the customer-owned pool via overnight saver delivery to the store, and the exchanged terminal is returned to Equinox via ground shipping.
 - Mandatory engineering changes are implemented at no additional charge.
 - Weekly, monthly and quarterly reports are provided to the customer.

Additional **PremierGreen™** disposal services, Deployment and On-Site services are also available from Equinox. Please see the [Equinox Services information sheet for details](#).

- Along with these special services, the standard three-year warranty can be extended for up to two additional years, including the services (see the Equinox Services section in the Pricing and Configuration below).
- The Premier services are available only at time of original terminal purchase only, and must appear on the original terminal order.
- Premier/Warranty extensions for years four and/or five can be ordered at any time during the initial three-year warranty period.
- If the warranty/service extension is desired, all terminals ordered on that sales order must receive the same service level. Since all warranty units are recorded by serial number upon shipping, NCR cannot accept a sales order where only some of the units are covered by the warranty extension. Channel Partners should simply submit two sales orders in cases where the warranty extension applies to a subset of the units ordered at any one time.
- If the optional warranty has been selected, the terms and conditions are exactly as those for the original three-year term. No services or service levels are augmented or reduced when using an extended warranty.
- The base terminal and the contactless reader must have the same service plan.

ADVANCED EXCHANGE PROGRAM — SPARE-IN-THE-AIR

(Applies to L4xxx only – information here for reference only) ⁴

With the L4150 and L4250, Channel Partners have the Advanced Exchange option available from POSDATA, which provided spare-in-the-air service during the first three years of warranty. With the exception of the service itself, all other terms and limitations of the standard warranty program continued to apply. To operate this warranty:

- The Channel Partner calls POSDATA at **800-426-4004** to request an overnight exchange.
- POSDATA ships a replacement terminal overnight.

⁴ Although no longer available for new sales, this section has been retained for reference regarding older terminals that may have been placed under this plan in the past.

- The replacement terminal will be shipped with the same software that was shipped by POSDATA on the original terminal.
 - If POSDATA injected the key (or had the key injected by a third party) on the original shipment, POSDATA will inject the key on the replacement terminal at no charge.
 - If the terminal was not originally ordered with injection, POSDATA can inject the key if available at standard pricing or arrange for injection via a third-party key injection. Third-party injection will delay the replacement shipment by 3-5 days and is priced at a flat \$50 per terminal.
- POSDATA will ship overnight to the location specified by the Channel Partner.
 - If Saturday delivery is required, that service is available for an additional freight charge.
- A call tag will be issued to pick up the failed unit from the Channel Partner.
 - The failed equipment, including all cables and power supplies, must be received at POSDATA within 14 days of signed receipt of replacement unit(s) or the Channel Partner will be billed for the cost of the equipment. A signed warranty request must be given. POSDATA cannot grant exceptions to this policy.
 - The location that the terminal shipped to will be the location to which UPS is dispatched to pick up the failed unit. UPS/POSDATA will attempt to pick up the terminal three times. In the event that UPS cannot pick up the terminal, the Channel Partner will receive an e-mail notification that the terminal is due back to POSDATA. Ten (10) business days after this e-mail notification, if the terminal is not received by POSDATA, an invoice for the full value of the terminal will be sent to the Channel Partner. (No further returns will be processed for this Channel Partner until the terminal is returned and credited or the invoice is paid.)
- POSDATA will pay shipping charges for overnight service both directions.
- Once the failed terminal is received and sent through repair, the Channel Partner will be notified if the terminal is outside of the warranty as defined in the program and will be given a repair estimate.
- The Advanced Exchange service is only available at the time of the original terminal purchase. The Advanced Exchange PIN must appear with the terminal PIN on the order.
- If the Advanced Exchange service is desired, all terminals ordered on that sales order must receive the Advanced Exchange service. Since all warranty units are recorded by serial number upon shipping, NCR cannot accept a sales order where only some of the units are covered by the Advanced Exchange service. Channel Partners should simply submit two sales orders in cases where the service applies to only a subset of the units ordered at any one time.
- At this point, Advanced Exchange is offered only for the first three years. An add-on program for subsequent years may be announced in the future.

NON-WARRANTY AND OUT-OF-WARRANTY SERVICE OPTIONS

Equinox can perform other services on behalf of a Channel Partner to refurbish Equinox terminal equipment. Channel Partners should contact Equinox for pricing based on the specific circumstances including terminal type, condition, quantity and turnaround time required.

- **Prerequisites** — the Channel Partner must contact Equinox at 800-584-1876 or e-mail Equinox at RMARequests@equinoxpayments.com to get an RMA number. Billing for these services will be conducted in accordance with POSDATA policy (see page 11).
- **Refurbishment** of working equipment - Equinox will:
 - Replace or upgrade all plastics as necessary
 - Inspect and clean all components
 - Conduct operational testing on all features and functions
 - Return the device to a "like-new" condition in new packaging materials and new unit carton

- If requested, replace/outfit the returned product with power packs, cables, and other accessory items. In such cases, the Channel Partner will pay only the cost of the accessories - there will be no additional fee for the service.
- **Key Injection service** — Equinox will inject the terminal with the requested key if this key can be injected by Equinox. A fee applies to this service.
- **Application upgrade** — Equinox will update the terminal software application (SCAT/FPE) to a newer or different version specified by the Channel Partner. A fee applies to this service.
- **Shipping and handling** — are the same terms and conditions as apply to warranty or extended warranty service (see page 7 above).

BILLING AND INVOICING OF POSDATA SERVICES

Other than the original purchase of the Extended Warranty or Advanced Exchange services, invoices for the service-related items in this section will be directly to the Channel Partner from POSDATA or Equinox as appropriate. All service and repair billing will be generated on the date the service is delivered or the repair is completed. Channel Partners will receive all billing within 30 calendar days.

- Equinox offers a series of incident and terminal-based charges for non-warranty repairs and services.
- Several levels of repair severity are provided, and different notification policies will apply depending upon the repair level and these policies.
- A list of specific items not covered under warranty (for example, scratches and blemishes from normal wear and tear, aging of equipment over time) is provided, as well as those items that will void the warranty (e.g. case opened, altered by third party, natural disasters and so forth).
- Channel Partners will receive the specifics of these policies as a part of executing the Service Contract with Equinox.

Remote Key Injection

Equinox/Hypercom PIN pads can now have financial encryption keys injected via a remote key injection system (RKI) hosted by Equinox with special pricing for NCR Channel Partners.

PIN pads that can be used with RKI include:

- Equinox L5300 PCI 3.0 and L5300 PCI 2.0
- Equinox L5200 PCI 3.0
- Hypercom L4250
- Hypercom L4150 ⁵
- The Hypercom L4100 may or may not be compatible with RKI ⁶

RKI (earlier referred to as "Hypersafe") enables Channel Partners to upgrade previously installed PIN pads on-site, with no need to pay for shipping or cycle installed units through a "float" of PIN pads while waiting for customer key changes. This is especially important for the Connected Payments P2PE Hardware Encryption key: RKI now provides the most practical method of injecting that key for Equinox/Hypercom terminals that have already been installed.

⁵ Includes L4150 part numbers 010338-xxx and 010358-xxx shipped by NCR. Earlier versions of the L4150 are not compatible or supported via RKI.

⁶ Some L4100s may be supported but this PIN Pad must meet minimum requirements. Specifically, certain older L4100 models will not support SCAT code higher than version 232 so will therefore not be able to support P2PE which requires a minimum of SCAT 434.

Equinox provides many encryption keys that can be injected via RKI, including most of the important keys for multi-lane grocery. In cases where a key is not available through RKI, the PIN pad will need to be injected via normal methods.

HOW DOES RKI WORK?

1. The Equinox RKI host server maintains a list of keys that are available for remote injection.
2. Channel Partners order the desired keys from NCR along with the serial number of the PIN pads to be injected. NCR sets up the key download session with Equinox using this data to configure the Equinox RKI host by loading the serial numbers against the financial keys needed by the Channel Partner for remote injection.
3. The Channel Partner goes to the store location (RKIs can also be executed in the Channel Partner's office) and attaches each PIN pad in turn to an Internet connection using a laptop loaded with the Equinox software. The Equinox host then validates the PIN pad and the required authorizations, and if successful, downloads the keys that have been ordered and set up. In some cases, Channel Partners may be able to download the keys to USB thumb drives, and then use those drives to update the payment terminals in the store using the PIN pad's serial number (see additional information below).
4. The PIN pads are re-installed in the POS lane and are immediately usable with the updated keys.

SETTING UP FOR REMOTE KEY INJECTION

Equinox will work directly with NCR Channel Partners to get you set up for RKI. The normal charge for the Equinox RKI setup kit is \$2,500, but NCR has arranged with Equinox to entirely waive this fee for NCR Channel Partners.

To get set up with RKI, contact:

- **Equinox RKI Technical Support:** RemoteKeyInjection@equinoxpayments.com

ORDERING KEYS FOR RKI SESSIONS

Channel Partners use the usual ordering methods with a P.O. Retailix Order Entry to procure remote key injection loads. An RKI Order Form provides the necessary location, key and serial number information for the terminals being upgraded, as well as the contact information for the Channel Partner's RKI lead tech to resolve any questions or issues with the RKI order.

The RKI Order Form is available on the Solution Provider Support Web site – [click here](#).

The list of keys available via RKI is published in this bulletin along with the other Equinox keys, terminals and accessories.

COMPATIBILITY AND REQUIREMENTS

RKI requirements for the Channel Partner:

- The Channel Partner must contact Equinox and get set up as an authorized RKI Channel Partner (see above).
- PIN Pads must have SCAT code installed. Version 434 or higher is the released version for the L4xxx terminal series. The FPE/SCAT version for the L5300/L5200 must be at least 7.P.211 with the installed operating system being version 1012 or subsequent.
- The Channel Partner must get the following information for each terminal to be injected:
 - The correct RKI Financial or Hardware P2PE Key part number (see the pricing listing below for the product/key list)
 - The serial number for each terminal to be injected

- RKI supports IP only (dial-up is not supported). The L5300/L5200 can have keys injected via USB thumb drives if these drives have been pre-loaded with the terminal-specific software.
- If the Connected Payments P2PE hardware encryption key is being installed, it must be injected in Slot 5.
- The Channel Partner must order the RKI download and the key using the RKI Order Form and with the Channel Partner's normal P.O. process.

PRICING FOR THE KEYS AND RKI INJECTIONS

- The normal charge for the Equinox RKI setup kit is \$2,500, but NCR has arranged with Equinox for a 100% waiver of this charge for NCR Channel Partners.
- Originally there was a flat \$15 RKI fee per terminal to download and inject any key. This fee has now been waived and does not need to be ordered.
- All the financial or P2PE keys themselves are priced at \$30 list with a \$20 Dealer net price per key per terminal.
- Orders for RKI should be provided a week in advance of the planned download to ensure that the order process is completed and the data is uploaded to the Equinox host systems and the keys are ready and waiting for download and injection.
- Orders for RKI will be invoiced upon acceptance of the order by NCR Order Entry. NCR has no control over, or acknowledgement of, when the Channel Partner actually downloads and injects the keys.

ADDITIONAL INFORMATION

- A [Hypersafe \(RKI\) Information Sheet](#) is available that provides some background and information. (Please note that this was created prior to the Equinox acquisition, and the logo, naming conventions, supported terminal list and some other information is not necessarily current. NCR will post an updated version when one is released by Equinox.)
- An [RKI client setup document](#) from Equinox is downloadable from the NCR Solution Provider Support Web site.

An alternative USB methodology may be used with the L5300/L5200 if convenient. [This document \(click here\)](#) explains its use.

Pricing, Configuration and Administration

Administration

Channel Partners should order Equinox items from NCR using Retailix Order Entry – orders for Equinox cannot be otherwise accepted. Contact Retailix Order Entry and use your standard order forms — other than Remote Key Injection orders (see section above) there are no special configurers or spreadsheets required for ordering Equinox products from NCR.

LEAD TIMES

All Equinox products are shipped from POSDATA, which handles Equinox's logistics for the NCR program.

NCR will accept Equinox orders and endeavor to provide these products in the minimum time possible to the Channel Partner. Channel Partners must keep in mind, however, that every order of a payment terminal is "custom" because of the requirement for the terminal to be loaded with the right software to match the store's payment software (for example, WinEPS/Connected Payments) and/or the encryption key.

Channel Partners should therefore expect a lead time of between 5 and 10 business days from the time the order is accepted at NCR to the time the product will ship from POSDATA. See the Lead Times Page of the NCR Solution Provider Support Web site for current lead times of all NCR offerings.

Encryption Keys and Payment Terminal Software

KEY INJECTION

Key injection services are now available for many processors and can be ordered along with the payment terminal. Please note the status of the injection PINs below and contact NCR Order Entry with any questions regarding availability.

For information about RKI key injection, see the preceding section on this topic.

If POSDATA cannot internally perform injection for a particular processor, POSDATA will have the key injected by the appropriate third party if a PIN for that key is offered by NCR. Some third parties will not bill POSDATA directly and it is required to bill the Channel Partner. Such policies can change without notice, so please bring any such cases – where both NCR and a third party billed the Channel Partner – to our attention so that we can adjust the situation.

If NCR does not offer a PIN for that key, POSDATA can direct the Equinox terminals to a Channel Partner's chosen key-injection service or processor if the Channel Partner's order includes the full address and all paperwork required by the injection service or processor. Where NCR does not offer the injection service, all shipping and injection service costs are the responsibility of the Channel Partner.

All payment terminals must have an encryption key "injected" (installed) in order to be used on a payment processor's debit network. This encryption key provides the security required for PIN debit transactions using standards from that payment processor. Each processor has its own encryption keys — and may use several depending upon circumstances such as different hosts, merchants or wholesaler programs. Encryption keys are unique to the payment processor — for example Concord, Shazam or First Data — but with most processors the key is not usually unique to a particular store or merchant (and never to a lane in a store). So, a payment terminal with a First Data Atlanta encryption key can normally be used in any lane

of any independent grocery store (assuming proper configuration) that is processing its transactions through the First Data Atlanta host.⁷

The ability to inject an encryption key requires that the entity doing so has encryption security clearance from the processor, and the processor may have further security requirements imposed by its up-stream financial institutions. Therefore, the number of parties able to inject keys is limited to those organizations able to provide the necessary “clean room” and certified personnel, equipment, processes and security procedures to guarantee ongoing protection of that key.

Some payment vendors provide their key to a limited number of payment terminal companies and other vendors — and some do not release the key to any other entity, preferring to inject all keys internally and charge for that service. For example, some payment processors may charge \$25-\$50 or more to inject their proprietary encryption key.

In addition, the typical \$10-\$15 of additional shipping cost — once from the Channel Partner to the processor and then once again back to the Channel Partner for installation — combines to significantly increase the end user’s cost for their new terminals. Some processors also use the key injection pricing as leverage, forcing the grocer to purchase the terminals directly from the processor. Channel Partners will want to make sure that grocers understand that these choices impact their terminal costs significantly.

NCR and POSDATA now provide key injection services at low cost for a growing list of processors, and we intend to continue to expand that list, negotiating with other processors to enable their keys to be included in NCR’s Equinox Channel Partner program.

EQUINOX TERMINAL SOFTWARE LOAD

Different EPS software products used in the store — for example, Connected Payments — require different version loads of the Equinox terminal software. These software loads are updated and re-certified as necessary by Equinox for proper operation with the terminal and with the payment network.

- **Equinox terminal software** — the Equinox terminal software, “SCAT/FPE” provides the operating system and security software upon which any software in the terminal provided by the EPS software must run. This software is required – there is no substitute or third-party software available for this task.

The Equinox software license must be purchased with all L5200 and L5300 payment terminals. This line item was provided in the past at no charge, but as of June 1, 2013 it became a required chargeable item and must appear on every P.O. in same quantity as the payment terminal orders. NCR cannot order and/or ship an Equinox PIN pad without this license appearing on the Channel Partner P.O.

- **Equinox terminal software load** — the PIN pad’s operating system and SCAT/FPE software must be factory-loaded at Equinox or POSDATA – it cannot be loaded by the Channel Partner or in the field. Different versions of the software must be loaded depending upon the in-store EPS software being used. It is assumed in general that Channel Partner Equinox orders will be used in conjunction with WinEPS or Connected Payments.

Assuming the payment terminal will be used with Connected Payments, orders via NCR will include this loading service at no additional charge to the Channel

⁷ There are exceptions to this rule. Wholesalers who have payment programs and aggregate their member stores for processing — like SuperValu, UWG or AWG — will often have their own encryption key. So even though stores in the SuperValu program would be going to First Data for processing, they would have a special SuperValu encryption key instead of the normal First Data key. UWG currently does the same with 5th/3rd Bank — this actually simplifies Solution Provider sparing for UWG members (since 5th/3rd Bank may otherwise provide different encryption keys per merchant outside of the UWG program).

Partner. Channel Partners should NOT ORDER or include the load service item on their Purchase Orders.⁸

In cases where Equinox terminal is not being used with WinEPS or Connected Payments — and a different in-store software load is required — please contact your NCR Equinox representative who will provide you with the correct product ID number to attach to your order if a different load is required from the standard WinEPS version. The standard \$10 Dealer net pricing for this service will apply in such cases.⁹

Equinox Payment Terminal Configuration

WHAT TO ORDER

To order an Equinox payment terminal, Channel Partners should order the following:

1. The terminal - Equinox L5200 or L5300 payment terminal. (The L4150 and L4250 payment terminals have been withdrawn.)
2. SCAT/FPE Software - the required Equinox SCAT/FPE software license must be ordered with all L5200 and L5300 terminals. But do not order the loading service.
3. The interface/signal cable - required in all cases since the terminal package and price does not include an RS-232/Serial, P-USB or USB signal cable.
4. Power - if the POS software and POS terminal port configurations support powered serial or powered USB, just order the appropriate powered cable.
 - Otherwise the terminal will require (1) the separate power supply, (2) AC mains power cable, and (3) the appropriate cable to enable power to be injected into the data cable or to the PIN pad.
5. P2Pe Encryption Key - while not strictly required, any PIN pad order for use with Connected Payments/ServerEPS should include this line item to inject the point-to-point hardware encryption. It is no charge to Channel Partners when accompanying the original PIN pad order.
6. Financial Encryption keys - order the encryption key(s) to be injected:
7. If an encryption key is available and ordered, NCR will have that key injected before shipment to the Channel Partner.
 - It is always less expensive for the Channel Partner to order the encryption keys with the initial order than to use RKI later to inject these keys. Also, not all keys are available via RKI that may be provided at initial sale and encryption via POSDATA.
 - For example, there is no charge for the Connected Payments P2Pe key (see above) when you order the terminal from NCR, but there is a \$20 charge per terminal to load this key via RKI.
 - If an encryption key is not ordered, no key will be injected and the Channel Partner is responsible for getting the key injected.¹⁰

⁸ The line item for this software loading service is provided below for reference, but the Solution Provider does not have to order this line item — the loading service (but not the license) for the current and certified WinEPS/ OpenEPS/ Connected Payments Equinox software and O/S versions will be provided automatically at no charge. So do not order the loading service on your P.O.s.

⁹ This additional PIN and cost applies only to the software loading service, not the Equinox software license itself. The PIN for the Equinox SCAT/FPE software license itself is required and must appear on every Equinox payment terminal order.

¹⁰ If the encryption key you require is not yet available from NCR, please understand that while NCR, Equinox and POSDATA are continuing our efforts to enable these keys, we require the agreement and support of the processor. We don't always get the keys we ask for.

- If NCR is not injecting the key and if the Channel Partner requests, NCR will ship directly to a processor or injection service of the Channel Partner's choice. Contact names and addresses for the service plus the order and all required paperwork for that service are the responsibility of the Channel Partner.¹¹

SOFTWARE OPTIONS

- The required Equinox SCAT/FPE software license must be ordered with all L5200 and L5300 orders. The PIN for this product below provides the Channel Partner pricing only: Channel Partners must order this line item on all orders and/or shipments.¹²
- At no charge, NCR provides the loading service for the Connected Payments/WinEPS version of the SCAT/FPE software. The PIN for this product below provides standard pricing for reference only: Channel Partners should not order this line item unless the payment terminal will be used with non-WinEPS electronic payment software or a previously deployed terminal requires reloading.
 - If different in-store EPS software will be used with the Equinox payment terminal, please contact your Equinox representative (see page 5 above) to get the correct and current loading service identification number for the EPS in question, and add this to your NCR order. There will be a \$12 MSRP (\$10 dealer net) for this line item.
- Operation with WinEPS and Connected Payments requires:
 - L5300 PCI 3.0 or L5200 PCI 3.0
 - FPE/SCAT 7.P.211 and Operating System 1012 or greater.
 - Connected Payments OpenEPS 827.3 or higher
 - WinEPS 828

POWER OPTIONS

Best option: Power can be provided from a powered USB (P-USB) port in cases where a P-USB port is available from the POS terminal. Use one of the P-USB cables indicated. This is the preferred option with both ISS45 and ScanMaster if there is a P-USB port available.

Next-best for ScanMaster: Power can be also provided directly from the POS terminal to an L4150 or L4250 via a powered serial port (this option is not available with the L5200/L5300 terminal, which uses non-powered serial cabling with power injection only). This option requires the terminal to have an available 12V-24V serial port (see note 13 below). The POS software (see note 14 below) and payment software (see note 15 below) must be able to recognize the payment terminal from that port. Order the

¹¹ Shipping costs from POSDATA to the injection service provider will be charged by NCR, but the Solution Provider is directly responsible for all shipping arrangements and costs. NCR cannot take responsibility for performance or events after shipping from NCR. The Solution Provider must directly arrange payment with the injection service and is directly responsible for all service and shipping costs.

¹² NCR does not package this product automatically with orders or shipments of these terminals. Make sure that you and your customers are aware of this requirement when creating proposals. This is a "universal" requirement from Equinox and applies to all shipments from all vendors as of June 1, 2013.

¹³ With TeamPoS 2000 M or the older "A-board" the ports to use are the three 24V powered ports – these have a female connector on the terminal and are designated as Ports 3, 5 and 6 (COM6, COM7 and COM9). Use the serial RS-232 cable HY-810356-002. (With TeamPoS S-Class you will need the external power supply for Equinox since the 24V powered serial port is unlikely to be available.)

¹⁴ ScanMaster releases (2.3.1 and forward) operate with WinEPS via the OpenEPS interface and communicate via a .dll that is indifferent to the port selection. So you can use any valid port configured in the WinEPS setup including directly-powered RS-232 or P-USB ports. ISS45 supports COM1-COM4 and therefore cannot reach the powered serial ports — at this time, you must use the ancillary power supply.

¹⁵ WinEPS can be set up to communicate via COM1-COM9 — if the COM port you need is not in the drop-down box at setup, you can just type in the COM port you want and WinEPS will accept and use it. This WinEPS capability is with Equinox terminals

correct powered serial cable. This is the current ScanMaster configuration when RS-232 connections will be used.

PORTS AND ANCILLARY DEVICES

- The L5300/L5200 provides a P-USB interface (supports standard USB client USB and P USB) and one (1) physical RS-232 port (two logical RS-232 ports).
- For L4xxx legacy terminals:
 - The L4150 provides two serial ports within one physical mini-DIN connector on the payment terminal. If both ports will be used, then the "Y" cable (HY-010311-001) must be employed to split the pin-outs of the single connector into two physical connections.
 - Unlike the L4100, the RFID option on the L4150 does not consume one of the serial ports. Even with RFIS, the L4150 continues to offer the two ports.
 - The L4250 provides a single serial port, which can be used to interface the payment terminal to the POS terminal or to connect an ancillary device. The ADA keypad option is not normally used with the L4250 since these terminals already provide a physical keypad.
 - The ancillary ADA keypad can be used with the L4150 on one of the serial ports while the other serial port is used to interface the payment terminal to the POS terminal.
 - The "Y" cable can also be used to connect an ancillary serial device for pass-through processing.
 - Exception: if the RFID/contact-less feature has been configured on the L4150 payment terminal, then the only ancillary serial device that will operate is the ADA keypad. This is because the terminal SCAT/FPE software can understand inputs from both the contact-less internal port and the ADA keypad, and it can logically sort out the timing expectations. The software is not able to handle RFID and other unknown devices simultaneously however.
 - Pass-through capability for ancillary devices is provided on the L4150 and L4250 terminal's USB connection.

PAYMENT TERMINAL STANDS

NCR and Equinox do not market checkstand terminal stands hardware. The following manufacturers provide these products and may be contacted directly by Channel Partners. Note that ENS products (below) are also available directly from POSDATA.

... table begins on following page ...

only since Equinox' software can accept a load from any COM port. Other makes of terminals may not support loading above COM4.

Equinox/Hypercom — Configuration and Pricing

Equinox Payment Terminals - L5300

All Equinox orders should include the following items 1 - 6. See also the detailed ordering instructions (What To Order) on Page 16 above.

1. The L5300 or L5200 Payment Terminal (pages 20-22)
2. SCAT/FPE Software (required on every order, page 23)
3. P-USB, USB or serial interface/signal cables (page 26-28)
4. Power Supply (if not provided by the interface cable, page 29)
5. Connected Payments P2Pe (Hardware Encryption) Key (page 30)
6. Injection of the Financial Key (page 32-34)

Channel Partners should take advantage of the 100% discount and order the Connected Payments Hardware Encryption Key (7952-K159-V001) with new orders in all cases! This proprietary Connected Payments key provides true, ultra-secure hardware-based point-to-point encryption from the Equinox PIN pad up through all transmissions from card swipe to the Connected Payments host. This key is not normally available via other vendors or distributors, and adding it later will be at significant additional hassle and cost. This key will NOT disable normal use - it is in background until triggered by the Connected Payments host.

SCAT/FPE SOFTWARE IS REQUIRED ON EVERY TERMINAL ORDER, but the loading fee for this item is waived on all new terminal orders. So do not order the loading "service": just order the license.

Equinox Payment Terminals - L5300: PCI 3.0 Terminals PIN	Description	List Price	Install Price	Maint Price
7952-0027-9906	— Equinox Terminal, L5300, PCI 3.0 Signature Capture, Tri-Interface, 256MB/128MB, w/Contact-less Reader, Triple-Black	\$643	\$60	\$125
+CTCTLESS	<p>This item was previously listed as StoreNext PIN: HY-010368-612E.</p> <p>¶-All orders for Equinox L5200/L5300 MUST include a SCAT/FPE Software License (7952-K148-V001) for each payment terminal ordered. Regarding the loading SERVICE (G770-0041-0000) for the software however, purchases of new terminals automatically include this SCAT/FPE software loading service at no additional charge. NEVER ORDER THE LOADING SERVICE WITH NEW TERMINALS. ¶-Provides P-USB interface (supports standard USB client USB and P-USB) one (1) physical RS-232 port (two logical RS-232 ports), Ethernet interface, 256MB Flash RAM and 128MB SD RAM, plus a micro-SD port for additional memory expansion. ¶-When connecting via a P-USB connector on the POS terminal's I/O panel, use the 12V P-USB cable (7952-C023-9906 / HY-810349-001). When a non-powered USB POS terminal I/O connector is used, combine the power-injecting USB cable (7952-C101-9906 / HY-810371-001) with the power supply (7952-C029-9906 / HY-870066-004) and AC mains power cable (7952-C022-9906 / HY-810003-007). When using serial/RS-232 from the POS terminal's I/O panel, use the power-injecting serial cable (7952-C027-9906 / HY-810408-002) with the power supply (7952-C029-9906 / HY-870066-004) and AC mains power cable (7952-C022-9906 / HY-810003-007). ¶-Requires Connected Payments with OpenEPS 827.3.xx.580 or above (also compatible with withdrawn WinEPS 828 or above. Requires SCAT 611 and Operating System 1012 or later for proper operation. This is a PCI PED 3.x terminal, and no sunset or retirement date has been set for PCI PED 3.x devices at this writing. This terminal has achieved SRED compliance and is scheduled for EMV certification in Q3/Q4 2016. ¶-Contactless reader compliant with ISO 14443 A & B, ISO 18092, contactless MSD + EMV and MiFare NFC. This contact-less reader and PIN pad is in black, matching the Equinox Triple Black color scheme. ¶-Replaces withdrawn item HY-010368-412E</p> <p>Pricing and Compatibility Note ▶ ▶ Partner Net Price: \$399. Equinox Software

Channel Partners MUST order the SCAT/FPE software license with every new terminal purchase.

But DO NOT ORDER THE LOADING SERVICE with new terminal orders! The Load Service items and prices apply only to previously deployed terminals that require the SCAT/FPE software to be reloaded.

Equinox Software: Current SCAT/FPE, O/S and Loading		List Price	Install Price	Maint Price
PIN	Description			
7952-K148-V001	— Equinox Software, License, SCAT/FPE	\$35		
SCAT/FPE LICENSE	This item was previously listed as StoreNext PIN: HY-930080-001. ¶-For Equinox L5300/L5200 as well as Equinox/Hypercom L4150, L4100 and L4250 payment terminals. ¶-The SCAT/FPE licensed software provides the base operating system and utilities for the Equinox/Hypercom L5xxx and L4xxx terminals, and must be loaded on every terminal in order for it to function regardless of electronic payment software in the store. ¶-This license is chargeable on all Equinox payment terminal orders or shipments after June 1, 2013 and is required on all orders.	Partner Net Price: \$15.		
G770-0041-0000	— Equinox Service, Load FPE (FPE 7.P211) software, L5300/L5200 PCI 3.0	\$12		
LOAD FPE PCI 3.0	This item was previously listed as StoreNext PIN: HY-930257-053E. ¶-DO NOT ORDER with new terminals - this service is provided at no charge. Applies to reloads of previously deployed terminals only. This item and service is included to NCR Channel Partners on new Equinox L5300/L5200 PCI 3.0 Payment Terminal orders. Order ONLY for subsequent changes or upgrades to L5300/L5200 PCI 3.0 models. Not compatible or for use with L5300 PCI 2.0 terminals. Use instead HY-930257-051E for L5300 PCI 2.0 terminals. ¶-This item provides the certified FPE 7.P.211 for use with WinEPS and Connected Payments on the L5300/L5200 PCI 3.0 terminal. If a different terminal load, or a load for a different in-store electronic payments software product is required, please call your Retalix Equinox field representative and liaison. ¶-This factory software load service cannot be performed in the field.	Partner Net Price: \$10. Do NOT order this item with new terminal orders. For reload of deployed units only. Do not order with new terminals! Applies only to reloads of previously deployed PIN pads.		
G770-0039-0000	— Equinox Service, Load Operating System 20121012 (O/S 1012), L5300/L5200 PCI 3.0	\$12		
LOAD O/S PCI 3.0	This item was previously listed as StoreNext PIN: HY-930256-123E. ¶-DO NOT ORDER with new terminals - this service is provided at no charge. Applies to reloads of previously deployed terminals only. This PIN and service is included to NCR Channel Partners on new Equinox L5300/L5200 PCI 3.0 Payment Terminal orders. Order ONLY for subsequent changes or upgrades to L5300/L5200 PCI 3.0 models. Not compatible or for use with L5300 PCI 2.0 terminals. Use instead HY-930256-121E for L5300 PCI 2.0 terminals. ¶-This item provides the certified Operating System 20121012 (O/S 1012) for use with WinEPS and Connected Payments on the L5300/L5200 PCI 3.0 terminal. If a different O/S load for a different in-store electronic payments software product is required, please call your Retalix Equinox field representative and liaison. ¶-This factory software load service cannot be performed in the field.	Partner Net Price: \$10. Do NOT order this item with new terminal orders. For reload of deployed units only. Do not order with new terminals! Applies only to reloads of previously deployed PIN pads.

PIN	Description	List Price	Install Price	Maint Price
7952-C023-9906	— Equinox Cable, Powered USB 12V 2x4, L5300/L5200 and L4xxx, 3M, Gray	\$58		
P-USB 3.0M 12V	This item was previously listed as StoreNext PIN: HY-810349-001. ¶-For L5xxx and L4xxx. Use with 12V powered USB output from the POS terminal. The Equinox/Hypercom L5300, L5200, L4100, L4150 and L4250 terminals will adjust properly to 12V-24V power inputs.		Partner Net Price: \$40.	
7952-C101-9906	— Equinox Cable, USB-A to P-USB L5xxx/L4xxx, 12 ft., Black	\$36		
USB-A to P-USB	This item was previously listed as StoreNext PIN: HY-810371-001. ¶-Use this cable when you need to connect an Equinox/Hypercom L5xxx or L4xxx terminal to a POS terminal with a non-powered USB port. This cable provides connectivity between a standard USB port (type A) on the POS terminal and the powered port on the L5xxx/L4xxx. An integrated power connector on a pig-tail cable at the POS terminal end is included for accepting power. ¶-Requires Power Supply (7952-C029-9906 / HY-870066-004) and the Power Cord (7952-C022-9906 / HY-810003-007), or specialty cables HY-810354-01 (P-USB port cable) or 7952-C100-9906 / HY-810355-01 (IBM tailgate) can also be used to inject power to this cable. ¶-Replaces item HY-810371-012 / 7952-C025-9906 which was functionally equivalent.		Partner Net Price: \$26.	
7952-C027-9906	— Equinox Cable, RS-232 Serial with DB9 Female and RJ45, accepts power from P/S (pigtail). L5300/L5200, Black, 12 ft.	\$25		
SERIAL DB9F - RJ45	This item was previously listed as StoreNext PIN: HY-810408-002. ¶-This cable attaches the L5300/L5200 to a POS terminal via non-powered male DB9 serial port (POS end) to RJ45 (PIN pad end). The cable provides a short pigtail to accept power from a stand-alone power supply (7952-C029-9906 / HY-870066-004) at the POS terminal connector end, enabling this cable to provide power to the terminal. ¶-This cable can be used with the power supply and injector cable, or specialty cables HY-810354-01 (P-USB port cable) or HY-810355-01 (IBM tailgate) can also be used to inject power to this cable. ¶-Similar to HY-810408-001 except this cable provides the pigtail to accept power instead of a power-accepting port on the DB9F connector.		Partner Net Price: \$15.	
7952-C029-9906	— Equinox External Power Supply/Adapter (PWRAD), L5300/L5200	\$32		
POWER SUPPLY	This item was previously listed as StoreNext PIN: HY-870066-004. ¶-Power supply, 90-250VAC 47-63HZ 12.0VDC 2A5 (2.1mm DC out plug) for Equinox L5300/L5200. Can also be used with Equinox/Hypercom L4xxx. ¶-Can inject power to serial cable (HY-810341-001/7952-C093-9906 or HY-810341-002/7952-C094-9906) at POS end of serial cable. ¶-This cable can also provide power directly to the L5xxx PIN pad. To connect to the underside power connector of the L5xxx, the short right-angle adapter cable (7952-C177-9906/HY-810411-001) or long right-angle adapter cable (HY-810411-003E) is required. These adapters convert the straight power plug end of the power supply's built-in cable to a right-angle plug. ¶-Requires mains power cable 7952-C022-9906/HY-810003-007.		Partner Net Price: \$24.	
7952-C022-9906	— Equinox Cable, AC Mains Power 110VAC C7 TO NEMA1-15, L5300/L5200 L4150/ L4100/ L4250, 6ft, Black	\$6		
AC MAINS POWER	This item was previously listed as StoreNext PIN: HY-810003-007. ¶-AC mains power cable required by L5300/L5200 power supply/adapter 7952-C029-9906 / HY-870066-004 or L4150, L4100 and L4250 power supply/adapter HY-870066-002.		Partner Net Price: \$4.	
7952-K159-V001	— Equinox Service, Key Injection, Connected Payments Hardware Encryption, with Payment Terminal Purchase	\$20		
CP P2Pe NEW	This item was previously listed as StoreNext PIN: HY-930220-115. ¶-This key injection service equips a new L5200 or L5300 Equinox terminal with the Connected Payments Hardware Encryption Key when the terminal and injection are simultaneously ordered. This is a special key used exclusively for hardware-based transaction encryption (P2Pe) with Connected Payments and does not affect or replace any traditional debit or other financial keys. ¶-This item should be used only to order the Connected Payments P2P3 key simultaneously with new terminal orders. If this key is not loaded at initial purchase and shipment via this item, it can be loaded later via Equinox' Remote Key Injection service, and standard pricing for the key and the service will apply: order 7952-K327-V001. If the Channel Partner is not set up or able to apply Remote Key Injection, order instead 7952-K159-V002, which is the same price but requires the terminals to be returned to be injected at POSDATA facilities. ¶-The Hardware Encryption Key for Connected Payments is proprietary to NCR. It is available only via orders via NCR, and may not be loaded by any other vendor or distributor without NCR authorization. ¶-This key does not affect operation of this terminal when Connected Payments is not being used. The Hardware Encryption feature must be enabled at the Connected Payments host for the key to hardware-encrypt transactions.			

Pricing Note ► ► No Charge to Partner. ◀

7952-K139-V001 — Equinox Option, Contact-less Reader Module for L5300/L5200, Triple-Black Color - Field Kit **\$95**

**TRPL BLACK
UPGD KIT**

This item was previously listed as StoreNext PIN: HY-010360-601E.

¶-This kit provides a contact-less reader module (Triple-Black color scheme) for all current or previous versions of Equinox L5300 and L5200 payment terminals. The kit enables easy field installation by removing the small cover plate, connecting the reader, and securing it with two set-screws. ¶-For example this HY-010360-601E kit can convert the current L5200 model HY-010369-611E to the HY-010369-612E, or the L5300 model HY-010368-611E to the HY-010368-612E. ¶-If ordering new L5300 or L5200 terminals and the contact-less reader is desired, order instead the versions that ship pre-configured with this reader at slightly lower cost. ¶-This model is in the Equinox Triple-Black color scheme, but is otherwise identical to the HY-010360-600R contactless reader kit in the Black/Blue colors.

Partner Net Price: \$79.

7952-K138-V001 — Equinox Option, Contact-less Reader Module for L5300/L5200, Blue/Black Colors - Field Kit **\$95**

**BLUE/BLACK
UPGD KIT**

This item was previously listed as StoreNext PIN: HY-010360-600R.

¶-This kit provides a contact-less reader module (Black/Blue color scheme) for all current or previous versions of Equinox L5300 and L5200 payment terminals. The kit enables easy field installation by removing the small cover plate, connecting the reader, and securing it with two set-screws. ¶-For example this HY-010360-601E kit can convert the current L5200 model HY-010369-611E to the HY-010369-612E, or the L5300 model HY-010368-611E to the HY-010368-612E. ¶-If ordering new L5300 or L5200 terminals and the contact-less reader is desired, order instead the versions that ship pre-configured with this reader at slightly lower cost. ¶-This model is in the Equinox Black/Blue color scheme, but is otherwise identical to the HY-010360-601E contactless reader kit in the Triple Black color.

Partner Net Price: \$79.

Equinox Cables - USB

Equinox Cables - USB: Powered and Non-Powered

PIN	Description	List Price	Install Price	Maint Price
	7952-C023-9906 — Equinox Cable, Powered USB 12V 2x4, L5300/L5200 and L4xxx, 3M, Gray	\$58		
P-USB 3.0M 12V	This item was previously listed as StoreNext PIN: HY-810349-001. ¶-For L5xxx and L4xxx. Use with 12V powered USB output from the POS terminal. The Equinox/Hypercom L5300, L5200, L4100, L4150 and L4250 terminals will adjust properly to 12V-24V power inputs.		Partner Net Price: \$40.

Equinox Cables - Serial

Equinox Cables - Serial: RS-232 and SDL

PIN	Description	List Price	Install Price	Maint Price
SERIAL DB9F - RJ45	<p>7952-C027-9906 — Equinox Cable, RS-232 Serial with DB9 Female and RJ45, accepts power from P/S (pigtail). L5300/L5200, Black, 12 ft.</p> <p>This item was previously listed as StoreNext PIN: HY-810408-002.</p> <p>¶-This cable attaches the L5300/L5200 to a POS terminal via non-powered male DB9 serial port (POS end) to RJ45 (PIN pad end). The cable provides a short pigtail to accept power from a stand-alone power supply (7952-C029-9906 / HY-870066-004) at the POS terminal connector end, enabling this cable to provide power to the terminal. ¶-This cable can be used with the power supply and injector cable, or specialty cables HY-810354-01 (P-USB port cable) or HY-810355-01 (IBM tailgate) can also be used to inject power to this cable. ¶-Similar to HY-810408-001 except this cable provides the pigtail to accept power instead of a power-accepting port on the DB9F connector.</p>	\$25		Partner Net Price: \$15.
SERIAL w/PWR	<p>7952-C026-9906 — Equinox Cable, RS-232 Serial with DB9 Female and RJ45, accepts power from P/S (DB9F). L5300/L5200, Black, 12 ft.</p> <p>This item was previously listed as StoreNext PIN: HY-810408-001.</p> <p>¶-This is the standard cable to attach the L5300/L5200 to a POS terminal via non-powered male DB9 serial port (POS end) to RJ45 (PIN pad end). The cable provides a locking power insert for use with the stand-alone power supply (7952-C029-9906 / HY-870066-004) at the POS terminal connector end, enabling this cable to provide power to the terminal. ¶-Can use with the power supply and injector cable, or specialty cables HY-810354-01 (P-USB port cable) or HY-810355-01 (IBM tailgate) can also be used to inject power to this cable. ¶-Similar to HY-810408-002 except this cable provides the power-accepting port on the DB9F connector instead of a pigtail to accept power.</p>	\$25		Partner Net Price: \$15.
SERIAL DB9 - mDIN	<p>7952-C093-9906 — Equinox Cable, RS-232 Serial with DB9 Female and mini-DIN 9-pin Male, accepts power from P/S. L4150/L4100/L4250, Black, 12 ft.</p> <p>This item was previously listed as StoreNext PIN: HY-810341-001.</p> <p>¶-Use for powered serial connections to ISS45. ¶-This is the standard cable to attach the payment terminal to a POS terminal's male DB9 serial port. This cable provides a power pin (#4) on its female DB9 to accept power from the POS' DB9 if power is available. If the POS does not provide power from its DB9, this cable also provides a locking power insert for use with a stand-alone power supply (HY-870066-002) at the POS terminal end to provide power. The payment terminal end of this cable provides the mini-DIN connector for the PIN pad's serial input port.</p>	\$18		Partner Net Price: \$15.
SERIAL DB9F-mDIN	<p>7952-C094-9906 — Equinox Cable, RS-232 Serial with DB9 Female and mini-DIN 9-pin Male, accepts power from P/S. L4150/L4100/L4250, Black, 17 ft.</p> <p>This item was previously listed as StoreNext PIN: HY-810341-002.</p> <p>¶-Use for powered serial connections to ISS45. ¶-This is the standard cable to attach to a POS terminal via non-powered male DB9 serial port. A powered (pin #4) female DB9 is at the POS end (to connect to a male DB9) with a mini-DIN connector for the payment terminal end. The cable provides a locking power insert for use with the stand-alone power supply (HY-870066-002) at the POS terminal end, enabling this cable to provide power to the terminal if the POS terminal does not provide a powered DB9 port (for example, TeamPoS S-Class or some IBM terminals).</p>	\$18		Partner Net Price: \$15.
SERIAL mDIN DUAL Y-CBL	<p>7952-C096-9906 — Equinox Cable, RS-232 Y-cable miniDIN 9-PIN male to dual miniDIN 9-PIN Female, L4150, L4100 and L4250, 18 inch</p> <p>This item was previously listed as StoreNext PIN: HY-810347-001.</p> <p>¶-Enables the second serial port of the L4150/L4100 terminal by splitting the single mini-DIN connector into the two discrete serial interfaces. One of these will connect to the HY-810347-001/2 serial cable to the POS terminal, and the other side will be connected to an ancillary device such as the ADA keypad (HY-010311-01). Power can still be provided from the serial terminal cable or via P-USB. ¶-An exception to ability of the L4150/L4100 to connect additional serial devices is that if the RFID/contact-less feature has been configured on the L4100 payment terminal, then the only ancillary serial device that will operate is the ADA keypad. This is because the terminal SCAT/FPE software can understand inputs from both the contact-less internal port and the ADA keypad, and it can logically sort out the timing expectations. The software is not able to handle RFID and other unknown devices simultaneously however.</p>	\$11		Partner Net Price: \$9.
SERIAL DB9M-mDIN	<p>7952-C095-9906 — Equinox Cable, Powered RS-232 Serial, DB9 Male - mini-DIN, L4150, L4100 and L4250, 4.5M/17 ft., Black</p> <p>This item was previously listed as StoreNext PIN: HY-810346-002.</p> <p>¶-Use with ScanMaster. ¶-This is the standard cable to attach to a POS terminal via powered female DB9 serial port.</p>	\$18		Partner Net Price: \$15.

7952-C095-9906 — Equinox Cable, Powered RS-232 Serial, DB9 Male - mini-DIN, L4150, L4100 and L4250, 4.5M/17 ft., Black **\$18**

SERIAL DB9M-mDIN This item was previously listed as StoreNext PIN: HY-810346-002. Partner Net Price: \$15.
¶-Use with ScanMaster. ¶-This is the standard cable to attach to a POS terminal via powered female DB9 serial port.

7952-C095-9906 — Equinox Cable, Powered RS-232 Serial, DB9 Male - mini-DIN, L4150, L4100 and L4250, 4.5M/17 ft., Black **\$18**

SERIAL DB9M-mDIN This item was previously listed as StoreNext PIN: HY-810346-002. Partner Net Price: \$15.
¶-Use with ScanMaster. ¶-This is the standard cable to attach to a POS terminal via powered female DB9 serial port.

7952-C100-9906 — Equinox Cable, Powered IBM SDL to Locking 2.1mm DC Plug, 18 inch, Beige **\$14**

IBM SDL 2.1mm DC This item was previously listed as StoreNext PIN: HY-810355-001. Partner Net Price: \$12.
¶-For L5xxx and L4xxx PIN pads. Substitutes for separate power supply/adaptor by pulling power from IBM RS485 tailgate POS port (SDL) and injecting into the power connector on the POS end of the HY-810408-001 or other similar power-accepting serial cable. For use with terminals (e.g. IBM) providing P-USB but without drivers or software to connect to the payment terminal via USB, and also without a powered serial DB9 serial interface connection. ¶-Compatible with any non-powered data cable (HY-810408-xxx or HY-810372-012 or power adaptor (HY-810411-001) that accepts power input via the 2.1mm barrel connector.

7952-C028-9906 — Equinox Cable, Mini-DIN to RJ45 Adapter, 12 inch, Black **\$15**

mDIN to RJ45 This item was previously listed as StoreNext PIN: HY-810410-001. Partner Net Price: \$12.
¶-Enables use of legacy cables (HY-810278-004 or HY-810278-005) with L5xxx PIN pads. Converts Mini-DIN female connector on legacy cable to RJ45 connector used with L5xxx terminals. ¶-Disclaimer: Equinox strongly recommends using new cables such as the RJ11-RJ45 cable. These cables provide secure locking, which is absent on the mini-DIN connector design.

7952-C029-9906	— Equinox External Power Supply/Adapter (PWRAD), L5300/L5200	\$32		
POWER SUPPLY	This item was previously listed as StoreNext PIN: HY-870066-004. ¶-Power supply, 90-250VAC 47-63HZ 12.0VDC 2A5 (2.1mm DC out plug) for Equinox L5300/L5200. Can also be used with Equinox/Hypercom L4xxx. ¶-Can inject power to serial cable (HY-810341-001/7952-C093-9906 or HY-810341-002/7952-C094-9906) at POS end of serial cable. ¶-This cable can also provide power directly to the L5xxx PIN pad. To connect to the underside power connector of the L5xxx, the short right-angle adapter cable (7952-C177-9906/HY-810411-001) or long right-angle adapter cable (HY-810411-003E) is required. These adapters convert the straight power plug end of the power supply's built-in cable to a right-angle plug. ¶-Requires mains power cable 7952-C022-9906/HY-810003-007.		Partner Net Price: \$24.	
7952-C022-9906	— Equinox Cable, AC Mains Power 110VAC C7 TO NEMA1-15, L5300/L5200 L4150/ L4100/ L4250, 6ft, Black	\$6		
AC MAINS POWER	This item was previously listed as StoreNext PIN: HY-810003-007. ¶-AC mains power cable required by L5300/L5200 power supply/adapter 7952-C029-9906 / HY-870066-004 or L4150, L4100 and L4250 power supply/adapter HY-870066-002.		Partner Net Price: \$4.	
7952-C177-9906	— Equinox Cable, Power Supply Right-Angle Plug Adapter Cable, 8cm, Black	\$15		
P/S ANGLE ADAPTER	This item was previously listed as StoreNext PIN: HY-810411-001. ¶-Right-angle plug end adapter, converts straight plug on 870066-xxx power supply to right-angle plug to enable fitting into the bottom of the L5xxx terminal. This cable is 8cm. If a longer adapter cable is needed, order HY-810411-003E, which provides the same capability in a 76cm/30 inch length.		Partner Net Price: \$11.	
7952-C144-9906	— Equinox External Power Supply/Adapter (PWRAD), L4150, L4100 and L4250	\$31		
POWER SUPPLY	This item was previously listed as StoreNext PIN: HY-870066-002. ¶-For non-powered serial or non-powered USB. 90-250VAC 47-63HZ 12.0VDC 2A5 (2.1mm DC out plug). Can inject power to serial cable (HY-810341-001 or HY-810341-002) at POS DB9 end. Requires mains power cable HY 810003-007. ¶-For Equinox/Hypercom L4150/L4250/L4100		Partner Net Price: \$24. Item may be withdrawn by vendor. Check availability and price with Order Entry.	

Equinox Services - Key Injection

The following encryption key injection services are currently available from NCR and POSDATA. Please see the Configuration Notes for the status and how the injected terminal will be provided to the dealer.

Channel Partners should take advantage of the 100% discount and order the Hardware Encryption Key (HY-930220-115) with new orders in all cases! This proprietary Connected Payments key provides true, ultra-secure hardware-based point-to-point encryption from the Equinox PIN pad up through all transmissions from card swipe to the Connected Payments host. This key is not normally available via any other vendor or distributor, and adding it later will be at significant additional hassle and cost. This key will NOT disable normal use - it is in background until triggered by the Connected Payments host.

Injection services for most other keys that are currently in-hand at POSDATA are priced at \$15 Dealer Net.

Keys that are not currently in POSDATA's inventory must be injected by a third party. The \$40 Dealer Net pricing is higher to cover the cost of third-party injection and the extra shipping cycle from the third-party service. When any of these keys becomes available to POSDATA, the dealer net price will be reduced to the \$15 level.

Note: the "Advanced Exchange" warranty pricing will be honored in either case.

Use the General Key Injection PIN (HY-930099-006) to order injection in cases where the key is known to be available at POSDATA but is not listed yet with its own PIN on these pricing and configuration sheets.

All key injection services are priced at dealer net.

Order:

Equinox Services - Key Injection: PIN	Description	List Price	Install Price	Maint Price
7952-K159-V001	— Equinox Service, Key Injection, Connected Payments Hardware Encryption, with Payment Terminal Purchase	\$20		
CP P2Pe NEW	<p>This item was previously listed as StoreNext PIN: HY-930220-115.</p> <p>¶-This key injection service equips a new L5200 or L5300 Equinox terminal with the Connected Payments Hardware Encryption Key when the terminal and injection are simultaneously ordered. This is a special key used exclusively for hardware-based transaction encryption (P2Pe) with Connected Payments and does not affect or replace any traditional debit or other financial keys. ¶-This item should be used only to order the Connected Payments P2P3 key simultaneously with new terminal orders. If this key is not loaded at initial purchase and shipment via this item, it can be loaded later via Equinox' Remote Key Injection service, and standard pricing for the key and the service will apply: order 7952-K327-V001. If the Channel Partner is not set up or able to apply Remote Key Injection, order instead 7952-K159-V002, which is the same price but requires the terminals to be returned to be injected at POSDATA facilities. ¶-The Hardware Encryption Key for Connected Payments is proprietary to NCR. It is available only via orders via NCR, and may not be loaded by any other vendor or distributor without NCR authorization. ¶-This key does not affect operation of this terminal when Connected Payments is not being used. The Hardware Encryption feature must be enabled at the Connected Payments host for the key to hardware-encrypt transactions.</p>			
Pricing Note ▶	▶ No Charge to Partner. ◀			
7952-K327-V001	— Equinox Service, Remote Key Injection, Connected Payments P2Pe Hardware Encryption	\$30		
RKI P2Pe EQUINOX	<p>This item was previously listed as StoreNext PIN: HY-930216-115.</p> <p>¶-This item should be used only to add the Connected Payments P2Pe key to previously deployed terminals in cases where the Channel Partner will be using Equinox Remote Key Injection (RKI) to inject the key. This item is orderable for Remote Key Injection service only - please see the information in this bulletin regarding RKI before ordering. ¶-If this key is to be loaded with the initial purchase and shipment, order instead 7952-K159-V001 simultaneously with the terminal, which provides this key and injection at no charge to the Channel Partner. If instead this is a deployed terminal and the Channel Partner is NOT set up and able to apply Remote Key Injection, order 7952-K159-V002, which is the same price as this item, but requires the terminals to be returned to be injected at POSDATA facilities. ¶-The Hardware Encryption Key for Connected Payments is proprietary to NCR. It is available only via orders via NCR, and may not be loaded by any other vendor or distributor without NCR authorization. ¶-This key does not affect operation of this terminal when Connected Payments is not being used. The Hardware Encryption feature must be enabled at the Connected Payments host for the key to hardware-encrypt transactions.</p>			
Pricing Note ▶	▶ Partner Net Price: \$20. ◀			

7952-K159-V002 — Equinox Service, Key Injection, Connected Payments Hardware Encryption, for Deployed Terminals (Send Back) \$20

**CP P2Pe
SEND BACK**

This item was previously listed as StoreNext PIN: HY-930220-115-PD.

¶-This key injection service equips a previously shipped or deployed L5200, L5300, L4150 or L4250 Equinox terminal with the Connected Payments Hardware Encryption Key when the terminal. This is a special key used exclusively for hardware-based transaction encryption (P2Pe) with Connected Payments and does not affect or replace any traditional debit or other financial keys. ¶-This item should be used only to add the Connected Payments P2P3 key to previously deployed terminals in cases where the Channel Partner will NOT be using RKI to inject the key. Instead, the key will be injected by POSDATA and the Channel Partner is responsible to ship the terminals to POSDATA for injection. If this key is to be loaded with the initial purchase shipment, order instead 7952-K159-V001, which is provided at no charge to the Channel Partner. If this is a deployed terminal and the Channel Partner is set up and able to apply Remote Key Injection, order instead 7952-K327-V001, which is the same price but does not require the terminals to be returned to be injected at POSDATA facilities. ¶-The Hardware Encryption Key for Connected Payments is proprietary to NCR. It is available only via orders via NCR, and may not be loaded by any other vendor or distributor without NCR authorization. ¶-This key does not affect operation of this terminal when Connected Payments is not being used. The Hardware Encryption feature must be enabled at the Connected Payments host for the key to hardware-encrypt transactions.

Equinox Services - Key Injection

Equinox Services - Key Injection: for New Terminal Orders		List Price	Install Price	Maint Price
PIN	Description			
7952-K152-V001	— Equinox Service, Key Injection, First Data Atlanta, T-DES	\$25		
FD-ATL	This item was previously listed as StoreNext PIN: HY-930099-006-FD. ¶-Order with Payment Terminal for connection to First Data Atlanta host. This is also known as the "Wells Fargo #351 Bypass Key." Users being connected should instruct First Data to enable this key for their connection - Channel Partners may have to ensure that the end-user customer makes this request. ¶-This key is currently available and orderable for injection at POSDATA prior to shipment to Channel Partners. This PIN usable only on new Equinox Payment Terminal orders.		Partner Net Price: \$15.	
7952-K156-V001	— Equinox Service, Key Injection, RBS WorldPay, T-DES	\$25		
RBS-WP	This item was previously listed as StoreNext PIN: HY-930099-006-RBS. ¶-Order with Payment Terminal for connection to RBS WorldPay host. This PIN usable only on new Equinox Payment Terminal orders. ¶-This key is currently available and orderable for injection at POSDATA prior to shipment to Channel Partners.		Partner Net Price: \$15.	
7952-K150-V001	— Equinox Service, Key Injection, Vantiv (5th/3rd Bank), DUKPT, St. Pete	\$25		
5TH/3RD	This item was previously listed as StoreNext PIN: HY-930099-006-5/3. ¶-Order with Payment Terminal for connection to Fifth/Third Bank "St. Pete" host (checksum ID 3B5E). This key provides DUKPT. This PIN usable for new Equinox Payment Terminal orders only. ¶-This key is currently available and orderable for injection at POSDATA prior to shipment to Channel Partners.		Partner Net Price: \$15.	
7952-K151-V001	— Equinox Service, Key Injection, Chase Paymentech, T-DES, 8100	\$25		
CHASE	This item was previously listed as StoreNext PIN: HY-930099-006-CHP. ¶-Order with Payment Terminal for connection to Chase Paymentech "8100 - 8100 Direct" host (checksum ID 47CD). This key provides Triple DES. This is the encryption key specified by Chase Paymentech to be used for all new Connected Payments business. This PIN usable only on new Equinox Payment Terminal orders. ¶-This key is currently available and orderable for injection at POSDATA prior to shipment to Channel Partners.		Partner Net Price: \$15.	
TBS	Equinox Service, Key Injection, Shazam	\$25		
SHAZAM	This item was previously listed as StoreNext PIN: HY-930099-006-SHZ. ¶-Order with Payment Terminal for connection to Shazam host. This PIN usable only on new Equinox Payment Terminal orders. ¶-This key is currently available and orderable for injection at POSDATA prior to shipment to Channel Partners.		Partner Net Price: \$15. NCR Product ID to be supplied.	
7952-K154-V001	— Equinox Service, Key Injection, Nova/Elavon, T-DES	\$25		
NOVA T-DES	This item was previously listed as StoreNext PIN: HY-930099-006-NOV. ¶-Order with Payment Terminal for connection to Nova/Elavon host (checksum ID 8190). Key provides Triple DES. This PIN usable only on new Equinox Payment Terminal orders. ¶-This key is currently available and orderable for injection at POSDATA prior to shipment to Channel Partners. ¶-Replaces withdrawn item HY-930099-006-NOD		Partner Net Price: \$15.	
TBS	Equinox Service, Key Injection, First Data Atlanta, T-DES, AWG Kansas City	\$50		
AWG	This item was previously listed as StoreNext PIN: HY-930099-006-AWG. ¶-Order with Payment Terminal for connection to First Data host via AWG KC wholesaler payments program. This PIN usable only on new Equinox Payment Terminal orders. ¶-This key can currently be ordered. It must currently be injected by a third party, so the terminal will be shipped to the third party for injection and then shipped directly to the Channel Partner.		Partner Net Price: \$40. See Configuration Note for additional release information. NCR Product ID to be supplied.	
7952-K153-V001	— Equinox Service, Key Injection, Mercury Payment Systems, T-DES	\$25		
MPS	This item was previously listed as StoreNext PIN: HY-930099-006-MPS. ¶-Order with Payment Terminal for connection to Mercury Payment Systems (MPS) host. This PIN usable only on new Equinox Payment Terminal orders. ¶-This key is currently available and orderable for injection at POSDATA prior to shipment to Channel Partners.		Partner Net Price: \$15.	

7952-K152-V003 — Equinox Service, Key Injection, First Data, SuperValu Independent T-DES, 16	\$25
FD-TDES-16 This item was previously listed as StoreNext PIN: HY-930099-006-FD16. ¶-Order with Payment Terminal for connection to First Data Atlanta host. This is also known as the "T-DES 16 key" and is frequently associated with SuperValu Payments Program independent grocery sites. Users being connected should instruct First Data to enable this key for their connection - Channel Partners may have to ensure that the end-user customer makes this request. ¶-This item is orderable only with new Equinox Payment Terminal orders. To order this key for payment terminals that have already been deployed, order instead item 7952-K152-V002, which is the Remote Key Injection (RKI) version of this key injection service.	Partner Net Price: \$15.
7952-K146-V001 — Equinox Service, Key Injection, Heartland (Marathon)	\$25
HEARTLAND MARATHON This item was previously listed as StoreNext PIN: HY-1153-00202-HTL. ¶-Order with Payment Terminal for connection to Heartland host for Marathon. This PIN usable only on new Equinox Payment Terminal orders. ¶-This key is currently available and orderable for injection at POSDATA prior to shipment to Channel Partners.	Partner Net Price: \$15.
7952-K145-V001 — Equinox Service, Key Injection, Heartland (Citgo)	\$25
HEARTLAND CITGO This item was previously listed as StoreNext PIN: HY-1153-00130-HTL. ¶-Order with Payment Terminal for connection to Heartland host for Citgo. This PIN usable only on new Equinox Payment Terminal orders. ¶-This key is currently available and orderable for injection at POSDATA prior to shipment to Channel Partners.	Partner Net Price: \$15.
7952-K282-V001 — Equinox Service, Key Injection, Heartland, Remote T-DES (General - Non-Fuel)	\$25
HEARTLAND GENERAL This item was previously listed as StoreNext PIN: HY-1153-00211-HTL. ¶-Order with Payment Terminal for connection to Heartland host for General/Non-Fuel sites. This PIN usable only on new Equinox Payment Terminal orders. ¶-This key is currently available and orderable for injection at POSDATA prior to shipment to Channel Partners.	Partner Net Price: \$15.
G770-0036-0000 — Equinox Service, Key Injection, First Data Envoy 350 Key	\$25
FDMS ENVOY This item was previously listed as StoreNext PIN: HY-1153-00168-FDENV350. ¶-Order with Payment Terminal for connection to First Data host for Envoy using the FDMS 350 key. May not be compatible with Connected Payments. This PIN usable for new Equinox L5200/L5300 terminal orders only. ¶-This key is currently available and orderable for injection at POSDATA prior to shipment to Channel Partners.	Partner Net Price: \$15.
7952-K143-V001 — Equinox Service, Key Injection, First Data Bank of America 601 Key	\$25
FDMS BA601 This item was previously listed as StoreNext PIN: HY-1153-00264-BA601. ¶-Order with Payment Terminal for connection to First Data host for Bank of America 601. This PIN usable only on new Equinox Payment Terminal orders. ¶-This key is currently available and orderable for injection at POSDATA prior to shipment to Channel Partners.	Partner Net Price: \$15.
7952-K280-V001 — Equinox Service, Key Injection, HSBC PC Tablet TD-992	\$25
HSBC 992 This item was previously listed as StoreNext PIN: HY-612-00055-HSBC. ¶-Order with Payment Terminal for connection to HSBC host using the 992 key. This item is orderable only with new Equinox Payment Terminal purchases. ¶-This key is currently available and orderable for injection at POSDATA prior to shipment to Channel Partners. For Remote Key Injection (RKI) of this key, order instead item 7952-K280-V002.	Partner Net Price: \$15.
7952-K149-V001 — Equinox Service, Key Injection - General	\$50
GENERAL This item was previously listed as StoreNext PIN: HY-930099-006. ¶-General key injection charge, typically used only when re-injecting a payment terminal when changing processors. Can also be used to order key injection services when a specific PIN for a processor is not available in the list of PINs for specific key injection services. For key injection services listed, see specific PINs for processors below. Applies to L4100, L4150 and L4250. ¶-This PIN does not include any shipping services or freight costs.	Partner Net Price: \$40.

All the Key Injection services listed above are priced at Dealer Net. Further discounts are not available.

Equinox Services - eWIC Key Injection: for New Terminal Orders

PIN	Description	List Price	Install Price	Maint Price
7952-K498-V001	— Equinox Service, Key Injection, Smart-Card WIC EBT, TX/NM	\$25		
WIC TX/NM	<p>This item was previously listed as StoreNext PIN: HY-930099-006-TX.</p> <p>¶-This PIN is orderable with new terminals only. For post-delivery injections of this key, use RKI and order the RKI key and service item 7952-K326-V001 (was HY-930216-020). ¶-This key supports Smart-Card WIC EBT as used in Texas, New Mexico, Wyoming, and some Indian Nations. ¶-Note! The POS system may require a Texas-New Mexico Smart-Card Option license. Smart-Card functions do not travel through the Connected Payments network, and local handling of Smart-Card WIC transactions is required via the POS. For example, ISS45 requires PIN G330-0070-0000 (ISS45 Smart-Card WIC Option - Texas-New Mexico). ScanMaster supports Ohio Smart-Card WIC but does not currently support the Texas-New Mexico Smart-Card WIC specification. ¶-With current Equinox L5200 and L5300 payment terminals, the Texas/NM Smart-Card WIC encryption key will be injected to into slots 36, 37, 38 and 39 for use in Texas, New Mexico, Wyoming and</p>		<p>Partner Net Price: \$6. No system facilities to support this item in ScanMaster.</p> <p>◀◀ See notes at left.</p>	
7952-K155-V001	— Equinox Service, Key Injection, Smart-Card WIC EBT, T-DES, Ohio	\$25		
WIC OHIO	<p>This item was previously listed as StoreNext PIN: HY-930099-006-OH.</p> <p>¶-This PIN is usable with new terminal orders only. To inject the Ohio WIC key after delivery or installation of the payment terminal, use instead the RKI key and service item 7952-K301-V001 (was HY-930216-149). ¶-This key supports Smart-Card WIC EBT as used in Ohio. ¶-Note! The POS system may require an Ohio Smart-Card Option license. Smart-Card transactions do not travel through the Connected Payments network, and local handling of Smart-Card WIC transactions is required via the POS. For example, ISS45 requires PIN G330-0166-0000 (ISS45 Smart-Card WIC Option - Ohio) and ScanMaster requires PIN SMG330-0166-0000 (ScanMaster Option, Smart-Card eWIC Option License). ¶-With current Equinox L5200 and L5300 payment terminals, the Ohio Smart-Card WIC encryption key will be injected to into slots 44, 45, 46 and 47.</p>		<p>Partner Net Price: \$6.</p>	
7952-K497-V001	— Equinox Service, Key Injection, Smart-Card WIC EBT, Arkansas	\$25		
WIC ARKANSAS	<p>This item was previously listed as StoreNext PIN: HY-930099-006-AR.</p> <p>¶-This PIN is orderable with new terminals only. For post-delivery injections of this key, use RKI and order the RKI key and service item. ¶-This key supports Smart-Card WIC EBT as used in Arkansas only. The Smart-Card specification may be the same as for Texas/NM, but newer rules require that Arkansas use a different encryption key. Additional Smart-Card WIC keys, for example for Texas/New Mexico, may be required depending upon state regulations governing WIC fulfillment for bordering states. ¶-Note! The POS system may require a Texas-New Mexico Smart-Card Option license. Smart-Card functions do not travel through the Connected Payments network, and local handling of Smart-Card WIC transactions is required via the POS. For example, ISS45 requires PIN G330-0070-0000 (ISS45 Smart-Card WIC Option - Texas-New Mexico). ScanMaster supports Ohio Smart-Card WIC but does not currently support the Texas-New Mexico Smart-Card WIC specification. ¶-With current Equinox L5200 and L5300 payment terminals, the Arkansas Smart-Card WIC encryption key will be injected to into slots 32, 33, 34 and 35.</p>		<p>Partner Net Price: \$6.</p>	

Equinox Services - Remote Key Injection (RKI)

Equinox Services - Remote Key Injection (RKI): for Deployed Terminals PIN	Description	List Price	Install Price	Maint Price
7952-K327-V001	— Equinox Service, Remote Key Injection, Connected Payments P2Pe Hardware Encryption	\$30		
RKI P2Pe EQUINOX	<p>This item was previously listed as StoreNext PIN: HY-930216-115.</p> <p>¶-This item should be used only to add the Connected Payments P2Pe key to previously deployed terminals in cases where the Channel Partner will be using Equinox Remote Key Injection (RKI) to inject the key. This item is orderable for Remote Key Injection service only - please see the information in this bulletin regarding RKI before ordering. ¶-If this key is to be loaded with the initial purchase and shipment, order instead 7952-K159-V001 simultaneously with the terminal, which provides this key and injection at no charge to the Channel Partner. If instead this is a deployed terminal and the Channel Partner is NOT set up and able to apply Remote Key Injection, order 7952-K159-V002, which is the same price as this item, but requires the terminals to be returned to be injected at POSDATA facilities. ¶-The Hardware Encryption Key for Connected Payments is proprietary to NCR. It is available only via orders via NCR, and may not be loaded by any other vendor or distributor without NCR authorization. ¶-This key does not affect operation of this terminal when Connected Payments is not being used. The Hardware Encryption feature must be enabled at the Connected Payments host for the key to hardware-encrypt transactions.</p> <p>Pricing Note ▶ Partner Net Price: \$20. ◀</p>

Partner Net Price: \$20.

Equinox Warranty

Premier-15 warranty/service is essentially the standard service level, and extensions for years 4 and 5 may be ordered at any time during the initial warranty period - that is, the first three (3) years of service. Premier-7 or Premier-1 service options for any time period must be ordered on the original hardware P.O.

Select the Premier program (1, 7 or 15) and the number of years of coverage for the base terminal and the matching service level and duration for the contactless reader module (if applicable). The Premier service level and the number of years of coverage must be the same for the base terminal and the contactless reader if the terminal is so equipped.

For complete details and information, see the Equinox Services section of this bulletin and the Equinox Services Information Sheet.

Equinox Warranty: Premier-15 Options for L5200 PIN	Description	List Price	Install Price	Maint Price
7952-K563-V013 — Equinox Service, Premier-15, L5200 for Base Terminal Only, Years 1-3		\$0
