

Bill-Back Manager from StoreNext

The only product of its kind, it completely automates the bill-back process, from agreement to invoice. Perfect with Category Analyzer.

You earned those bill-back dollars – now make sure you get every penny back. And you won't stay up all night juggling reports anymore.

Every year, grocers receive many special discount deals from direct store delivery and other vendors where the grocer is owed bill-back dollars according to actual movement of specific items during a promotional period.

And every year, grocers lose thousands of these crucial dollars due to administrative bill-back problems such as:

- > ***It's easy to miss*** tracking movement on all the promoted UPCs
- > ***Manually calculating*** accurate movement data from store reports is a hassle – and store personnel may never get around to it
- > ***Managers can put off*** the reporting process and wait too long to file the bill-backs and may miss vendor cutoff dates
- > ***Short cuts*** are taken, submitting purchase data instead – which the vendors reject
- > ***Vendors often question*** movement data if reports don't look credible.

StoreNext's new Bill-Back Manager works with Category Analyzer to provide a foolproof process that is automated, streamlined and simplified providing irrefutable documentation:

- > ***The Bill-Back Manager*** takes the vendor and PLU information – together with the start and end dates – and creates a grocer-vendor agreement that confirms the offer.
 - > ***At the start date***, the Bill-Back Manager automatically starts to track and record movement for all the appropriate PLUs through Category Analyzer.
 - > ***After the end date***, the Bill-Back Manager generates an invoice to the vendor providing complete and detailed scan-movement data.
 - > ***The Bill-Back manager*** manages aging of these vendor invoices with 30-60-90 day tracking options.
 - > ***When you use the Bill-Back Manager***, Category Analyzer will even automatically calculate cost and margin data based on the temporary special pricing and case-cost reductions during the promotion period. Finally: 100% accuracy!
- Bill-Back Manager is available for Retailix Store, Retailix HQ, RBO and StoreNext Connected Services. Category Analyzer is required.
