# Introduction

A change was made recently to the ScanMaster system. This enhancement is reflected in the accompanying 2.07.01-060 software.

This change is explained below but is not included in your ScanMaster 2.07.01 User Guide.

## Weights and Measures Rule Reversal

As part of the Weights and Measures certification, POS development instituted a “Remove Previous Weight” warning message in ScanMaster 2.07.01-050 that was issued when the scale weight was not reset (to zero weight) prior to the next weight command being received.

A subsequent ruling by Weights and Measures reversed this requirement. Therefore, logic surrounding the enforcement of a stable, zero weight between scale reads has been removed in this release.
