Introduction

A new feature was made recently to the ScanMaster system. The change is reflected in the accompanying 2.07.02-080 software.

This enhancement is explained in detail in the following pages but is not included in your ScanMaster 2.07.01 User and Installation Guides.

Automated Reconciliation and Final Deposit Process

ScanMaster's end-of-day processing now has the automatic capability to both reconcile the office and deposit available funds. After the automatically settling of the tills, an automatic deposit can be made to a deposit account (based on two new Back Office settings). In previous releases, the final reconciliation could only be performed manually.

Modified Back Office Setting

To support automated reconciliation, an existing Back Office Setting has been modified in the System Configuration Editor.

Note:

Back Office Settings are changed using the fields listed under the column headed by the computer's name within the Global/Store and BackOffice Tabs.

Previous Setting

EOD: 1= AutoDelay, 2=AutoSettle

New Setting

Auto 1Delay,2Setl,3Setl/Rec/Dp

This field requires a numeric entry (0, 1, 2 or 3). If set to 0 (default), the feature is not used. If set to 1, the Auto Delay feature is enabled. If set to 2, the Automatic Settlement feature is enabled. If set to 3, the Automatic Settlement and Automatic Reconciliation/Deposit feature is enabled.

New Back Office Settings

To support automated reconciliation, the following new Back Office Settings are found in the System Configuration Editor.

Auto Deposit (0=None, 1=All)

This field requires a numeric entry (0 or 1). A setting of 0 (default) leaves the deposit totals in the Safe. A setting of 1 deposits the totals to Acct 1, 2 or 3 as determined by the Back Office Setting "Auto Deposit to Acct# (1,2,3)".

Auto Deposit to Acct# (1,2,3)

This field requires a numeric entry (1, 2 or 3). If the “Auto Deposit (0=None, 1=All)” is set to 1, this setting will determine which account receives the deposit totals 1, 2 or 3.

ScanMaster’s manual (mid-day) deposits can be made to one of three selected deposit accounts. The Back Office Setting “Num of Deposit Accounts (1-3)” determines the number of deposit accounts that may receive the safe totals.

Note:

If an EOD error occurs during the Automatic Settlement or Automatic Deposit, a message displaying information about the error will be present to the user at login (informing the user to manually run either the reconciliation or deposit programs).

Technical Reference Appendix

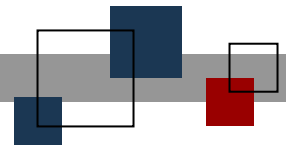

Out of Scope

Limitations of new features in this release are listed below (and were not addressed in development).

Note:

The limitations below are known as of this writing, and are provided in order to assist users and support personnel to plan, install and operate the capabilities described in this document. While StoreNext Retail Technologies LLC endeavors to ensure that this information is correct and fairly stated, no attempt is made here to catalog all limitations that could be construed or that may become known in the course of use or experience.

Enhancement	Out of Scope
Automated Reconciliation and Final Deposit Process	The Automated Reconciliation and Final Deposit feature is available for the current release only (and will not be made compatible with previous ScanMaster releases).
