Introduction

Purpose

This document describes the software changes introduced in release StoreNext24_479_STNXT1.3.0_Retalix55-WPSCO3_26C as compared to StoreNext14_445_STNXT1.2.7_Retalix46-WPSCO3_9C.

The changes are grouped into two categories:

- **New Features / Enhancements:** Contains a brief description of any new features or enhancements added to this software build.
- **Fixes:** Contains a brief description of any defects fixed in this software build.

All incidents are logged under delivery code STNXT7.

Audience

This document is intended for:

- StoreNext and Fujitsu personnel involved in the installation, configuration, implementation, and maintenance of the U-Scan® system
- Representatives of StoreNext and Fujitsu client and Dealer organizations
- Dealers and Clients involved in the operations of the U-Scan® system.

Referencing

Wherever possible, the PVCS Tracker incident number is included at the beginning of a note in parentheses '()'. This information allows personnel to trace the fix note and obtain more information about the note.

How to Upgrade

This section describes the software upgrade method for this build.

CD Installation

CD Installation is the traditional method for installation. It requires that you have the installation CD(s) on hand. After a successful CD installation, all changes related to the new release will be available and the software version will be changed to reflect the newly installed version. In this case, the software version will become StoreNext24_479_STNXT1.3.0_Retalix55-WPSCO3_26C.

Note: The resulting installation will have blank or default data files, except where the installation engineer has ensured to preserve the desired data files. Also, local configuration settings (station type, left/right configuration, etc.) will need to be re-applied.

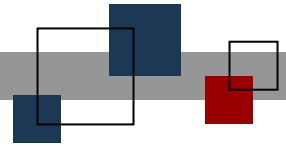

Refer to the StoreNext Software Service Guide for detailed instructions on how to upgrade the software. This guide is available from the StoreNext Dealer Support Web site.

New Features / Enhancements

- (16461) Added support for configuring a different end of day time for the reporting period. The user modifies the **AutoResetTime** entry (default = **0.00** - midnight) in the **cashier.ini** file.
- (20798) Added support for automatically enabling the scan function on the iPad Mobile Attendant every time the MA software application starts.
- (20799) Added support for automatically disabling the scan function on the iPad Mobile Attendant every time the MA software application exits.
- (21355) Set up the report configuration so that a wider date range is available.
- (21356) Added failover support for the NBC Station Manager application. The NBC screens are now available at the Customer Station when the Attendant Station is unavailable.
- (21597) Created an ASM Update Package (**UPD4000.zip**) that contains a snapshot of the NBC Database which can then be deployed (as an ASM Update Package) to other Stations.
- (21598) Added support for manual tare entry in the **PLU_Info.dat** file.

Fixes

- (17209) Resolved issues with order recall bar codes printed on the U-Scan Attendant Station Printer. The bar code now scans when the attendant attempts to recall an order.
- (20822) Added support for indenting the Frequent Shopper savings entries on the Customer Station receipt screen.
- (20824) Resolved issues with voiding items. The Customer Station no longer freezes when two items are voided and then removed from the Bag Scale at the same time.
- (20825) Corrected system behavior. The **WinPoS Sign Off** screen no longer displays at the Attendant Station after the attendant signs on at the Attendant Station.
- (21437) Added support for installing the **dealerconfig.exe** file in the **C:\Robot\Data** folder instead of **tendercustomizer.exe**.
- (21731) Updated **storenext.xml** and **storenextcashier.xml** to be compatible with **commonbase.xml** version 1.3.x.
