Introduction

Purpose

This document describes the software changes introduced in release StoreNext28_524_STNXT1.3.1_Retalix58-WPSCO3_40C as compared to StoreNext24_479_STNXT1.3.0_Retalix55-WPSCO3_26C.

The changes are grouped into two categories:

- **New Features / Enhancements:** Contains a brief description of any new features or enhancements added to this software build.
- **Fixes:** Contains a brief description of any defects fixed in this software build.

All incidents are logged under delivery code STNXT8.

Audience

This document is intended for:

- Fujitsu personnel involved in the installation, configuration, implementation, and maintenance of the U-Scan® system
- Representatives of Fujitsu client organizations
- Clients involved in the operations of the U-Scan® system.

Referencing

Wherever possible, the PVCS Tracker incident number is included at the beginning of a note in parentheses '()'. This information allows Fujitsu personnel to trace the fix note and obtain more information about the note.

How to Upgrade

This section describes the software upgrade method for this build..

CD Installation

CD Installation is the traditional method for installation. It requires that you have the installation CD(s) on hand. After a successful CD installation, all changes related to the new release will be available and the software version will be changed to reflect the newly installed version. In this case, the software version will become StoreNext27_524_STNXT1.3.1_Retalix58-WPSCO3_40C.

Note: The resulting installation will have blank or default data files, except where the installation Field Engineer has ensured to preserve the desired data files. Also, local configuration settings (station type, left/right configuration, etc.) will need to be re-applied.

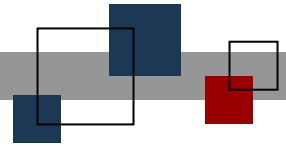

Refer to the StoreNext Software Service Guide for detailed instructions on how to upgrade the software. This guide is available from National Tech Support (Tech Web) for Field Engineers or from the Fujitsu Software Project Manager for store contacts.

New Features / Enhancements

- (17114) Added full support at the Attendant Station for the **Epson 6000II** printer.
- (21699) Enabled IsScanmaster registry setting for ScanMaster. Disabled IsScanmaster registry setting for ISS45.
- (23270) Added the ability to change the weight system from metric to imperial.
- (23297) Changed the language registry setting so the customer can choose the language they want as default (English, French or Spanish).
- (23362, 23366, 23728, 23766, 23920) Completed MSDE migration from Pervasive.
- Added the support of ECC (Electronic Check Conversion) with U-Scan and ISS45

Fixes

- (21708) Changed the following in the Scanmaster v2 implementation.
On the payment screen:
Removed the **Back** button if amount paid is > 0.
Removed the **EBT FS** button if amount paid is > 0.
Removed the **Cancel** button if amount paid is > 0.
- (21742) Added ScanMaster **vposcfg.ini** to custom set.
- (21743, 21746) Modified installer to only delete the **c:\grocery** folder if the file WG2.EXE is NOT present upon uninstall. If the WG2.EXE file is present, only the **vposcfg.ini** file will be deleted upon uninstall.
- (23246) Corrected issue regarding negative totals. When a negative amount is entered the system behaves properly.
- (23387) Resolved printer issue. The store logo will print on the Customer Station receipt.
- (24117) Resolved the **Till Report** issue. The report updates properly.
