Axiohm 7156 Printer Setup with ISS45 7.1.1.0

ISS45-TECH-06:17

August 2, 2006

With the release of ISS45 7.1.1.0-050 the peripherals handling has been changed to use the V8 peripherals DLL for use with OPOS/USB. A side effect of changing this DLL has been that a different setup selection is required for the Axiohm 7156 printer.

In the POST configuration (screen 6-1-4-1) when you connect an Axiohm 7156 printer to the post, under "Printer Type" select Axiohm 758 -- *not* Axiohm 7156.

Remember to make this change if you are performing an upgrade to an older version of V7. The "Printer Type" will not be changed automatically by the upgrade process.

To Your Success,
