

Technical Bulletin

ScanMaster 2.7.0 with DVI DynaKey

SM-TECH-10:07
February 25, 2010

PROBLEM

If the NCR register configuration includes a DVI DynaKey, the c:\grocery\makepos.exe program places a /dynakey switch in the c:\grocery\regstart.dat file causing the cashier screen to appear out of alignment.

SOLUTION:

1. Path to c:\grocery on the register
2. Edit regstart.dat and remove the /dynakey switch.
3. Save regstart.dat

Note: This process will need repeated if c:\grocery\makepos.exe is executed.
