ScanMaster Patches and Sub-Releases Now All Inclusive

SM-TECH-10:09

March 17, 2010

To be more efficient and minimize confusion when applying “patches,” the following change is being implemented regarding ScanMaster patch releases.

- In the past, ScanMaster releases would include (1) a patch version for each patch *and* in addition (2) a cumulative patch for each patch version called “ThePatch.”
- Starting today with the 2.07.00-060 ScanMaster patch release, there will *not* be further releases of “exclusive” patches. Instead, all ScanMaster patches will be *inclusive*, including all maintenance and patches since the -050 CD release of that version.

As long as the -050 release has been installed first, “ThePatch” version will always be available and used when applying further patches to ScanMaster systems.
