

Technical Bulletin

**RBO Item Maintenance: Release Manager Error
like ____4005**

RBO-TECH-05:25
May 10, 2005

When you enable PLU Object Security in the FrontOff database, you disable the ability for outside sources – like RBO – to update that database. Maintenance can still be performed from PLU Management, but not from RBO. When Release Manager is entered, the errors will be visible. The key error ends in 4005 and the error is an unspecified error.

The parameter is found here:

To Your Success,

Dwayne
