

## Technical Bulletin

### ScanMaster WIC EBT Support in 2.07.02-050

SM-TECH-11:09

May 2, 2011

If you add linked items after you have processed a state's Approved Product List (APL) you will need to manually reprocess each state's historical APL to make the change effective. The EOD will only automatically update the linked items if the APL has not already been processed.

Note: This process will clear out the previous state APL file the POS uses. Make sure cashiers do not start a transaction while you process APL if you are processing during the store hours.
