

**Subject: New Version of Nero Software (Version 8.3.2.2) for TP3K**

**Overview**

There is a new version of Nero software has been validated and will soon be incorporated into all new TP3K images and shipping on new imaged TP3K systems. Nero 8.3.2.2 proved to exhibited incompatibilities when upgrading Windows WePOS software from previous versions. These problems have been resolved, and updated WePOS images for the TP3K-XL and XL<sup>2</sup> have been generated. The new TP3K XL and XL<sup>2</sup> Images are as follows:

- XL image goes from Rev 1.03 to Rev 1.04
- XL<sup>2</sup> image goes from Rev 1.01 to Rev 1.02

**Upgrades**

When upgrading existing WePOS systems from previous versions of Nero to version 8.3.2.2, the following steps must be taken BEFORE installing the new Nero software.

1. Hit Start, then click on “Run” and type in “REGEDIT”
2. Go to HKEY\_LOCAL\_MACHINE\Software\Microsoft\DirectX\Version\4.09.00.0902 and change the version to 4.09.00.0904
3. Go to the Sustaining Engineering FTP site ([FTP://FTP.FTXS.Fujitsu.com/pos/possuataining/retail/TeamPoS3000XL/drivers/Nero Update](ftp://ftp.ftxs.fujitsu.com/pos/possuataining/retail/TeamPoS3000XL/drivers/Nero Update) and download a copy of the following files (opengl32.dll, glmf32.dll, and glu32.dll)
4. Paste these files into C:\Windows\system32

Note: These changes are only necessary if the customer is currently running WePOS and is updating to Nero version 8.3.2.2.
