

Subject: New U-Scan Universal Bag Scale

Overview

The New U-Scan Universal Bag Scale is being released and offers highest level of flexibility and scalability due its modular implementation.

The same one bag scale module is used to upgrade the system from one bag to two while multiples of the same module will allow for 4, 6 and 8 bag configurations.

Most of the internal scale components are common between these configurations, and also common with currently released bag scales.

If the Customer chooses, they can order conversion kits to upgrade their current system. The conversion of a one bag configuration to two or two to four can now be achieved at the store location. For more information please reference Marketing Bulletin #PB00-3260. The next release of the Genesis Installation and Site Prep Manual will include the Universal Scale.

The Universal Bag Scale configurations are released for manufacturing and production as follows:

- 1) 1 Bag
- 2) 2 Bag
- 3) 4 Bag
- 4) Optional 4" Riser
- 5) Optional 12" Riser
